Fury at Mexico over air traffic control contract

Three multinationals have formally complained to Mexico about alleged irregularities in the award of a \$21m contract for renewing Mexico's air traffic control system. Thomson of France has won the contract for the data processing system, and Alenia of Italy for the radars.

The complaints - from IBM, Westinghouse and Raytheon's Canadian subsidiary - come as the North American Free Trade Agreement awaits ratification in the US and Canada, Page 16; Tender upset in Mexico, Page 8

Israeli offer rejected: Israel's opposition Likud party attacked prime minister Yitzhak Rabin's offer to take back 100 of the more than 400 Palestinians expelled to Lebenon. The deportees have rejected the offer. Page 16; Scramble to preserve US links, Page 4

Brontman shares hit: Shares of several companies controlled by Toronto's Brouiman family slid amid concern over losses at property and financial service arms. Brascan, a key holding company, slipped by 62 cents to C\$3.75. Page 17

Finn opposition to EC grows: Opposition among Finns to the country joining the European Community has risen by 12 percentage points in less than six months, with only 43 per cent of people in favour. Page 2

Daf's collapse threatens 12,650 jobs in Europe

David Brown in Amsterdam

DAF, the Dutch commercial vehicle manufacturer which is one of Europe's leading truckmakers, yesterday was forced to file for protection against its creditors. The collapse was pre-cipitated by the failure of Dar's banking consortium and the Dutch government and Flemish regional authorities in Belgium to reach agreement on emer-

gency short-term funding.

Daf has run up losses of more than FI 800m (\$434m) in the last three years. Its total indebtedness is estimated at about Fl 1hn for the main manufacturing companies and more than Fl 2bn for its financing subsidiaries.

Production at the group's plants in the Netherlands, Belgium and Britain — where Dar took over the former British Leyland truck and van operations in 1987 - was immediately hit as many suppliers stopped deliver-ing parts. The collapse puts at risk about 12,650 jobs. A spokesman for ABN Amro,

■ Driven to a grinding balt by Page 15 - Suppliers keep dalm over Def's demise Page 20 accounting charge

the biggest Dutch bank and the leader of Dar's banking consor-tium, said the planned rescue deal had broken down over disagreements between the banks and Dutch and Belgian authorities over short-term and long-term financing.
Mr Koos Andriessen, Dutch

economic affairs minister, said: We were faced with the situation where the bridging finance was simply insufficient to meet Dat's needs. The period of uncertainty over its future was unacceptably long. The government was being asked to shoulder an open-ended financial commitment and this it was not prepared to do. The hope is that a solution can still be found to premedium and heavy trucks."

Daf's court-appointed adminis-trators in the Netherlands have carte blanche to act as they see fit, which means that they can close down or negotiate the sale of subsidiaries. Mr John Talbot of accountants Arthur Andersen was last night expected to be announced as the administrative receiver for Leyland Daf, Daf's UK subsidiary.

The collarse embroiled the UK government in fresh controversy over failing to save jobs. Mr Michael Reseltine, trade and industry secretary, was heckled and jeered in the House of Commons when he refused to intervene with public money.

Pressed about assistance for long-term investment, he said a sum of £450m (\$648m) had been mentioned and the governmen had made it clear that it could not contemplate such a project. Britain's Department of Trade and Industry had not been asked to provide short-term working finance and, in any case, won

industry spokesman for the oppo-sition Labour party, condemned the refusal to provide assistance and warned that the collapse of Leyland Daf would inflict another bitter blow on Britain's

shrinking industrial base. He said Daf had advised him that the minority of banks who had wrecked the planned rescue deal, were all British - National Westminster, Barcleys and Lloyds. Mr Heseltine said: "There is not, as far as I am aware, one shred of evidence to substantiate

that charge". NatWest, Lloyds and Barclays said their decision not to support the refinancing plan was justi-fied. The UK banks said they were presented with an unacceptable ultimatum on Monday afternoon by the Dutch and Flemish

The three are members of Dal's main banking syndicate led by ABN Amro. Daf has drawn \$300m from this syndicate, of which about £140m came from ABN,

US recovery speeds up as home sales rise

THE biggest increase in nearly a decade in the US index of leading indicators and a sharp rise in new home sales provided further evidence yesterday of an accelerating economic recovery.

The figures were released amid hints from officials that the Clin-ton administration may be planning a short-term economic stimulus of about \$31hn, rather than the \$15bn-\$20bn mentioned by aides last week.

The leading index rose 1.9 per cent in December, the Commerce

Department said, the largest increase since December 1983. Separate figures showed a 6.3 per cent increase in new home sales in December and a large

upward revision for figures for vember. New home sales rose 19.4 per cent in 1992 as a whole the largest annual increase for nearly a decade.

A White House spokeswoman said President Bill Clinton was

on Monday night. The possible \$31bn stimulus cackage would include an immediste increase of about \$15bn in faderal spending to take effect this fiscal year, with the remain-der devoted to an investment tax credit. No final decisions, how-

ever, have yet been made.

The administration is continuing to search for ways to cut the budget deficit by \$145bn by fiscal 1997. Some senior advisers fear that mooted tax increases - such as a broad-based energy tax — would represent a politically damaging repudiation of Mr Clin-ton's pledge to lower the tax burden on middle-income families. West German workers face real wage cuts

By Christopher Parkes In Frankfurt

WEST GERMAN workers will this year suffer their first real cuts in wages for a decade, according to documents due to be next week.

Wage rises are expected to range between 2.5 per cent and 3 per cent, while inflation will average 3.5 per cent, the economics ministry says in its official new year forecasts.

The leak of the figures, two days before the Bundesbank council is due to consider the country's economic plight, and review - but not change - its interest rates policy, coincided with the publication of key indicators which showed recession tightening its grip on industry. Chancellor Helmut Kohl, mean-

while, told the European assembiy in Strasbourg that he and the government would do everything ssible to enable German rates to be reduced. A decision on fed-eral spending cuts would be reached in four weeks at the most, he said.

Since the last recession of 1962, pay rises have consistently out-stripped incresses in living costs. The trend appeared to peak in 1991 when average wages rose 6 per cent and inflation was 3.5 per cent. Last year the consumer prices index rose 4.5 per cent and average wages went up by 5.4 per

An interruption of the trend would send a further signal to the Bundesbank that wage driven inflation could be coming under control. Much depends, however, on public sector pay talks, due to resume today, in which federal, state and local government employees are demanding packages worth up to 5.5 per cent.

The employers have so far refused to raise their opening offer of 2.25 per cent. Taken together, Mr Kohl's soothing promise in Strasbourg and the economics ministry forecasts, suggest anything above 3 per cent is out of the question.

The public services settlement is likely to set the pattern for the remaining 1993 deals primarily involving banking, insurance and construction workers.
The economics ministry, mean-

while, reported a 2 per cent drop in industrial production from November to December, and the VDMA engineering industry association said new orders booked during December were 9 per cent

unchanged, while domestic demand slumped 17 per cent, the association said. A comparison of the last quarter of 1992 with the final three months of 1991 showed a 13 per cent fall in new duction figures showed strong declines in most sectors except construction, which benefited from relatively mild weather.

Darkening the picture further, the Ifo economics institute in Munich said it expected west European growth to stagnate or fall by 0.5 per cent this year. Describing conditions as "close to the edge of recession", it said slight improvements in demand and output were expected, but no earlier than late in the year. The RWI economics institute in

Essen said German steel output would fall from 36m tonnes to 33.7m tormes this year and 12,000 industry employees would lose their jobs. If the forecast upturn did not materialise, the cuts would be much greater, it said.

Bérégovoy urges

By Alice Rawsthorn in Paris

MR Pierre Bérégovoy, the French prime minister, yesterday called on Germany to reduce interest rates as soon as possible to enable other European economies to follow suit. He also sought to damp specu-lation about further increases in

French base rates. Speaking on French radio, he urged Germany to "shoulder its responsibilities" by bringing its rates down. Germany's internationally sensitive Lombard rate, the rate the Bundesbank charges banks for emergency funding

against collateral, currently stands at 9% per cent. France's real interest rates, among the highest in Europe, are one of the main drags on the French economy, and threaten to be a sensitive issue in next month's legislative elections. There is considerable speculation about another rise in French base

Money market rates have risen since the Bank of France last month introduced a new one-day

Amnesty | Kohl sets deadline for solidarity pact

The chancellor is playing the foreign travel card as he seeks to concentrate minds, writes Quentin Peel

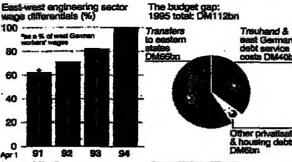

HANCELLOR Helmut Kohl has finally set himself a deadline, of a sort, to tie up the details of his much-vaunted solidarity pact to finance German unification.
The day is February 17, and the reason is that on February 18 he leaves on a two-week trip - already once postponed - to india, Japan and south-

The only question is whether the chancellor's travel plans will prove enough of an incenof coalition and opposition leaders, trade unions, employers and the 16 federal states to agree on a coherent package in time. As D-day approaches, the differences not only between the negotiating partners, but within each camp, are multiplying. That may allow the wily German chancellor more room for manoeuvre to do a deal, which would set savings in west Germany against spending in the east, and exchange increased investment for wage restraint. Equally, it

The solidarity pact is impor-tant for two reasons. First, it will begin to find an answer to

threatens to cause total confu-

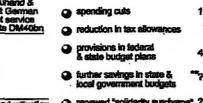

of financing the flow of western subsidies to east Germany, which are forecast at around DM150bn (£62.5bn) or more a year for the next decade.

It may not quite fill the gap – estimated at around DM110bn in 1995 – but it will make a start. More immediately, if a soli-

darity pact can show that the public sector – central govern-ment, the 16 Länder and local government - can seriously cut its budget deficits, and that the trade unions can restrain their wage demands, the mighty German Bundesbank

manoeuvre" to cut its interest Both government and trade unions urgently want those interest rates cut to prevent

find the necessary "room for

the recession from deepening. And it just so happens that the central bank has a council meeting on February 18. The pact is supposed to oper-ate on two parallel planes. On one level it would exchange guarantees of increased investment in the east for wage restraint: a deal between gov-

ernment, employers and

that the bill is already too large to be borne without unacceptable cuts in services. It would mean an annual transfer of DM6bn from his state, or twice the state budget for hos-pitals, roads and houses. "This is simply inconceivable," he said in a television interview yesterday.

prime minister of wealthy Baden-Württemberg, insists

The left wing of the party. led by Mr Norbert Blüm, the labour minister, and Ms Rita Süssmuth, president of the Bundestag, are worried that planned cuts in social spending will hit the lower-paid too hard. They want new tax rises soon to cushion the blow. Mr Blüm has floated the idea

of rethinking the entire financing of employment and retraining schemes in east Germany, to spread the burden more fairly: to switch from financing through national insurance payments (borne by only 70 per cent of the population) to a form of tax surcharge, borne by all income tax payers, including the self-employed. Mr Kohl and Mr Waigel say no tax rises before 1995. They would be "poison for the

economy".

haps, conveniently close to thinking coming from the opposition Social Democrats (SPD). Therein may lie the seeds of compromise.

The SPD is officially set against anything like the sort

of spending cuts, including a reduction in unemployment benefits, proposed. Yet Mr Björn Engholm, the party leader, and Mr Hans-Ul-rich Klose, the parliamentary leader, both seem keen to do a

deal in the end. As for the trade unions, one pillar of SPD party support, Mr Franz Steinkühler of the powerful IG Metall engineering union, has been a key participant from the start.

Mr Steinkühler believes that he has won important concessions from the Chancellor to preserve the "core areas" of east German industry. He doesn't want to throw that away for nothing.

Few doubt that some sort of package will emerge. The only question now is whether it will end up as a unilateral plan presented by the chancellor, or a cross-party deal for which he can claim broad-based support. And in either case, will it be enough to persuade the Bund-

state his aims and indicate

April's poll.

Frankfurt dissident targets Emu again

By David Marsh,

MR Reimut Jochimsen, a leading Bundesbank official, yesterday took further aim at the Maastricht treaty by say-ing that Germany was being "forced" into economic and

monetary union. Confirming a reputation for outspokenness which has attracted criticism from the Bonn government, Mr Jochim-sen said Emu "was more forced on the Germans than that we wanted it".

Speaking at the Royal Insti-tute of International Affairs in London, Mr Jochimsen singled out the French government as the main force behind the drive for a single currency. The quest for monetary union had been a "recurrent" feature of French politics since 1973, he said. Mr Jochimsen, president of the North Rhine-Westphalia central bank, said the present franc-D-Mark exchange rate was in line with the fundamentals in the French economy. But he called on Bonn's partners to "depoliticise" rate changes in the European monetary system. In a pointed reference to

recent attacks on "specula-tors" by Mr Michel Sapin, the French finance minister, Mr Jochimsen called operators on currency markets "portfolio managers and investors". He said he did not want to use methods of the French revolution against them.

Mr Jochimsen, a heavy-weight member of the Social Democratic party, has earned the ire of both the Bonn government and Mr Helmut Schlesinger, the Bundesbank president, since he joined the Bundesbank council in 1990.

In August 1992 he caused controversy by stating, in remarks prepared for a speech in Düsseldorf, that EMS members were shunning realignments for "prestige" reasons.

Mr Horst Köhler, state secretary in the Bonn Finance Ministry, took Mr Jochimsen to task this week for having criticised the government's recent efforts to cut spending.

Amato floats free from Craxi's levers of power

By Robert Graham in Rome

MR Giuliano Amato, the Italian prime minister, yester-day admitted his six-month-old four-party coalition was defying political gravity.

Just like a cartoon character, the government would keep going as long as no one realised it was riding on air. He is managing to stay in office even though the govern-ment has ceased to represent the specific interests of the Christian Democrats and

Socialists, the two main coalition partners. The two parties' credibility is daily diminished by the mounting revelations of corruption and illegal party financing over the past decade.

Mr Amato, a Socialist, has been obliged to cut free from Mr Bettino Craxi, his party

leader. It has been a post-war political tradition in Italy for party leaders to control prime ministers. The break with Mr Craxi, formalised on Monday. was essential to prevent the government from being directly involved in the Socialist leader's fight for political survival in the face of allegations of corrupt behaviour and

illicit funding of the party. The prime minister's divorce from Mr Craxi has been followed by three other Socialist ministers, including Mr Claudio Martelli, the ambitious justice minister.

Mr Amato is thus no longer the prime minister for the Socialist party but a socialist chief executive of the administration. If Mr Craxi and his dwindling band of followers so choose they can withdraw

Italy's balance of payments deficit quadrupled in 1992 despite a modest improvement in the final quarter following the September float of the lira, writes Robert Graham.

The 1992 payments deficit was L32,549bn (£14.5bn) compared to 18,571bn in 1991. The deterioration, reflecting an overvalued lira, is even more marked when measured against the 1990 surplus of L15,156bn.

The worst month was last September when the monthly deficit reached L29,000bn after the massive lira support operation. But from October Italy began to record a surplus again.

their parliamentary support, thereby removing the coalition's narrow 16-seat majority in the chamber of deputies.

In recent days Mr Craxi has posed this threat, especially in the light of a motion of confidence tabled by the former communist Party of the Democratic Left (PDS). However, on Monday night Mr Craxi was persuaded this would be counter-productive, and could even

hasten the break-up of the party he has dominated for a

As in every instance over the past six months when the Amato government has appeared unstable, it has survived for two reasons; none of 16 parties in parliament has suggested viable alternatives; and second the major parties have neither the funds nor the public support to call fresh

tries' policy of neutrality for the EC's plans to forge a for-

tance himself from Mr Craxi, make firmer commitments to combat corruption and focus

dums imposing such reforms.

This key debate requires government stability — as does the management of an economy in recession. He would be reluctant to leave office before electoral reform was in place and the parties had regained their composure. But for this to happen he will have to expand the coalition. The no-confidence

more on the increasingly serious problem of unemployment. The no-confidence debate, due to wind up tomorrow, will give Mr Amato a platform to

"opposition", like the PDS, to spell out terms for joining an enlarged government.

company's data. The time, which will not exceed 2 days, the dates and the remaining checking procedure will be specified by the
LR.O. on the basis of the date of submission of the binding offices, the number of interested parties and the priority in receiving the Offering Memorandem. Potential buyers who will sak for and obtain the Offering Memorandem beyond the time limit and on their own responsibility, will be treated and facilitated in the time left without any discrimination towards them, resulting solely from their own fault in receiving the Memorandum at a list date, being possibly construed as unequal treatment.

Sabsulstion of Binding Offers - Unsealing Binding Offers must be submined at the latest by 1300 has on Thursday, 25th February 1993 at the offices of the 1.R.O. at the address mentioned above, in return for a receipt. Offices which have not been handed in personally but sent in any other masser (by post, etc.) will be considered as having been submitted in time and will be taken into account only if they have reached the offices of the LR.O. before the above time limit irrespective of the date of posting or any other means of despatch. Offices

submitted beyond the time limit will not be taken into account. The offers will be unsealed on Thursday, 25th February 1993 at 1400 hours at the offices of the 1.R.O. The unsealing may be attended by anyone who has legally submitted a binding offer or by his legally authorised representative as described above. The offers will be unsealed, checked with regard to formality (letter of guarantee, composition, etc.) will be entered and will be attached to a special report of the unsealing which will be signed by those present. A copy of this report will be given to each person who has legally submitted an offer. Copies of the offers will not be released until the end of the metion for the highest bid.

Resolverbay - Additionalism

Offices are kept by the LR.O. and are evaluated at its discretion. The Board of Directors of the I.R.O. will make the final decision

as to the acceptance (adjudication) of an offer, or its rejection, within two mouths of its submission, i.e. up to 26th April 1993.

Recalls, modifications, improvements, etc. of offers up to the final decision of the LR.O. to adjudicate or to reject, and counter-

offers are not acceptable and will not be considered.

CONTENT OF THE OFFER Offices must be submitted within a realed envelope entitled "BINDING OFFER FOR THE PURCHASE OF THE SHARES OF

BLINDA S.A.*. They must be written and signed and must not have ensures, deletions or insertions. Offers submitted in any other manner (e.g. by telegram, telex, fax, etc.) unsigned, or bearing ensures, deletions or insertions will not be considered. The offices must refer to the total of the shares for sale (14,338,830) and if this is not specifically mentioned or wrongly indicated it will be taken as referring to the total (14,338,830). They will contain a price expressed in drachmas. They will specify the manner of payment and, if payment is to be made of the whole amount or in instalments, will specify the exact dates of payment, without interest or with interest (and in this case at what rate), of each instalment, and the guarantees provided for payment of these instalment, and the guarantees provided for payment of these instalments. It should be noted in this respect that in evaluating such offers, their conversion to current value will be calculated at 22%. Any terms contained in the offers shall be absolutely clear and specific on pain of giving the right to the I.R.O. at its ion, to go as far as rejecting the offer. The offer must include data on the identity and activity of the bidder, while a description of a business plan and the bindin

thereof, will be daily appreciated.

The duration of the offers must be of at least two months (i.e. up to 26.4.93).

LETTER OF GUARANTEE

The offer must be accompanied by a letter of guarantee from a bank legally operating in Greece for Drs. 200,000,000. The LR.O., on delivery of the Offering Memorandum, will provide a draft of this letter of guarantee which must be adhered to. Offers unaccompanied by a letter of guarantee, or accompanied by a letter of guarantee, or accompanied by a letter of guarantee. The present is not a proposal for drawing up an agreement but an invitation to submit an offer.

The LR.O. retains the right to cancel or postpone the auction at its discretion, to supplement or clarify or modify the terms of the present amounteernest and in general set within the framework of article 199 of the Civil Code and Law 2000/91, bound only by

All the expenses concerning or related to the transfer of the shares and the participation in general and execution of the procedure shall be borne by the buyer and each of the participants accordingly.

The participation of each of the potential buyers in the present suction presupposes the full and unequivoval accepts

Any previous relative amnouncement, invitation or proclamation, etc is hereby revoked and the only valid terms are those cost

EC aspirants agree agenda

EC's first new members since 1986 began in earnest yesterday at separate meetings between the EC president Denmark and ambassadors from Austria, Finland and Sweden,

Renters reports from Brussels. Diplomats said the talks had gone well and the applicants had agreed to an EC plan to start talks in the first instance in eight areas.

Those areas are the free movement of services, workers, and capital, external relations, social policy, agriculture and forestry, customs union and

We are looking for twenty five young,

agreed to seek additional areas where the applicants' opening speeches on Monday had demonstrated talks could proceed swiftly. The diplomats said a date was not set for the next set of meetings.

The EC and the applicants

hope talks can be wrapped up in a year, allowing the three, who could be joined soon by Norway, to enter the EC fold on January 1, 1995.

Talks are expected to focus on the applicants requests' for

eign and security policy. All three countries offered assurances on Monday that they would abide by the EC's plans laid down in the Maastricht treaty. • Support among Finns for their country's application to join the EC has fallen in recent

special arrangements for their farming sectors and on the

months, according to an opin-

ion poll yesterday, Reuter reports from Helsinki. The latest results showed 43 per cent in favour, down from 54 per cent.

FT SURVEYS

Bonn seeks full isolation of Belgrade

By Judy Dempsey in Berlin and Laura Silber in Belgrade

GERMANY will ask the US to support a total isolation of Serbia as one of the few remaining options aimed at stopping the war in the former Yugoslavia. But it will not support a selective lifting of the arms embargo, even though Washington appears to be shifting its policy towards arm-

ing the Bosnian Moslem forces. The request, which will be made when Mr Klaus Kinkel, the German foreign minister visits Mr Warren Christopher. his US counterpart, in Washington tomorrow, reflects the growing frustration and fears within Germany that Croatia and Serbia could be moving

towards an all-out war. Foreign ministry officials in Bonn yesterday said they have asked President Tudiman of Croatia to stop his offensive into the demilitarised "pink zones" of the republic. These straddle United Nations protectorates set up last year on Croatian territory seized by Serb

"We want Tudiman to stop this offensive, even though we understand why he is doing it, and to accept an extension of the UN mandate in the republic. If not, then this could provoke the Yugoslav army into attacking Croatia. The pressure must be kept up on Serbia, but pressure should be imposed on Croatia as well," a

foreign ministry official said. Despite pressure from public opinion, both in the US and Germany, Mr Kinkel does not support arming the Bosnian Moslems. "We would not go it alone in lifting the arms embargo," an official said,

cult to see how more arms in the region would stop the war from spreading.

Germany also recognises that the US, unless President Bill Clinton is prepared to make a radical change in policy, will not commit ground troops as a means of lifting the siege off the Bosnian capital of Sarajevo, impose a no-fly zone, which is "fairly irrelevant by this stage", or back selected air strikes either in Bosnia, or Serbia.

"Once you go down that lat-ter road, you have to pull out the UN troops," another offi-cial said. "We are running out of options. That is why we believe pressure on Croatia to stop its offensive, and total isolation of Serbia, is one of the few options left to us."

In Belgrade General Satish Nambiar, the commander of UN forces in the former Yugoslavia, yesterday said the renewed Serbo-Croat clashes had derailed the peace plan in Croatia but dismissed fears of a pull-out by the 14,000-strong peacekeeping force.

"We have gone back to square one. What we are engaged in now is damage limitation. We are trying to assure that the conflict does not spread," he told reporters.

Gen Nambiar suggested that the peacekeeping forces should have their mandate extended in order to deal with the situation. "I have made certain suggestions to the Security Council but in the end it is the people [at the UN] who give us a mandate, provide troops and resources for execution of the mandate. It is for them to decide how much of a risk they are prepared to take."

Serbs feel the pinch from UN sanctions

Milosevic may turn the embargo to his advantage, but the economy is crumbling, writes Laura Silber

SERBIAN barges may be running illicit cargoes of oil up the Danube under the eyes of United Nations monitors, but nevertheless eight months of sanctions and the oil embargo, in particular, have hit hard.

The latest casualties of sanctions were two McDonald's hamburger restaurants in Belgrade, which this week closed down after their supplies of foreign toppings

Yugoslav media meanwhile, has mourned the loss of the Disney cartoon figures Mickey Mouse and Donald Duck, after Disney Publications severed a contract it has had for nearly 60 years with Yugoslavia. Rising inflation and a sharp

decline in the availability of

goods also reflect the debilitating impact of sanctions on the Serbian economy, already reeling from 18 months of war and the collapse of trade with the former Yugoslav republics. Prices rose 100 per cent in

December, while industrial production was down 22 per cent on a year ago. More than 800,000 workers have been sent on compulsory holidays as state enterprises have cut production. Some 70 per cent of Serbia's 9.8m inhabitants are

Serbian forces advancing near the village of Barabe as clashes with Croats continue

estimates economist Mr Tomislav Popovic.

The value of the Yugoslav dinar continues to plummet as the government printing s work overtime. On the bustling black market, hard

the official rate. In a move which could indicate the virtual abandonment of the dinar, JUMCO, a major textile manufacturer in southern Serbia, this week announced that all prices would be

payable in dinars at the black market rate. Last November the UN tightened the sanctions

originally imposed last May on Serbia and Montenegro for supporting Serb forces in the

The United States is to give Romania three fast patrol boats and radar surveillance us to help with the policing of the river Danube, the Romanian government said

yesterday, writes Virginia Marsh in Bucharest. Romania has also proposed a meeting with Ukraine tomor-row to discuss better enforce-ment of UN sanctions against Serbia. The move follows what the UN termed a "flagrant violation" of sanctions last week by five Serh barges, carrying around 40,000 tonnes of oil. The barges, loaded in Ukraine, reached Serbla after evading Romanian and Bulgarian

patrols on the Danube.

But diplomats believe Serbia, under President Slobodan Milosevic, has not been compelled to cut off oil supplies to industry or the Yugoslav army. Instead, it has extended winter holidays for schools and universities due to the shortage of heating oil. Although oil is undoubtedly in short supply, analysts point out that Serbia produces 25 per

cent of the oil it needs. "There is absolutely no reason to believe the army doesn't have topped-up fuel tanks. They do have problems, some of which are logistical, of getting fuel to places," says one western diplomat. "But Serbia has not yet made the tough choices which would hit industry or transport."

Sanctions have, however provided Serblan President Milosevic with an alibi for Serbia's economic decline. Backed by his control of state television, Mr Milosevic has vowed that the west will never succeed in bringing Serbia to

its knees. "In terms of the economy the sanctions are doing a better job than before. But on the political front, they are having a counter-effect," said a western diplomat in Belgrade.

Belgrade economists and diplomats fear that Mr Milosevic so far has capitalised on the decline in the standard of living, and has used the sanctions to his advantage. "They have provided the government with an excuse to impose wage and price controls and destroy the market economy," believes Mr

embargo radicalised the population, by feeding the propaganda about international conspiracies

Reformer to lead Armenia

ARMENIA'S president yesterday replaced his prime minister with a young economist who pioneered land priva-tisation in the former Soviet republic, writes Leyla Boulton

President Levon Ter-Petrosian said he had sacked outgoing premier Mr Khosrov Arutunian for a "gross breach of etiquette" in criticising parts of his own economic reform programme. His successor, Mr Grant Bagratian, previously deputy prime minister, had quarrelled bitterly with Mr Arutunian, who wanted the state to have greater control over economic reforms.

The change of government comes as Armenia is reduced to begging for electricity from its neighbours, including Turkey, its historical enemy. The landlocked republic, starved of natural resources and at war with Azerbaijan, fears energy shortages could lead to a breakdown of law and order.

Its last source of fuel - a pipeline from war-torn Georgia was blown up last week. Its nuclear power station has been closed since a 1988 earthquake.

Russians at loss on bankruptcy

RUSSIAN legislators and would be problems in implementing a long-awaited bankruptcy law, due to go into effect on March 1, because of and a shortage of qualified staff, writes Leyla Boulton.

Mr Alexei Manannikov, member of the parliament's economic reform committee, said for instance the government's postponement of a deci-sion on indexing enterprises fixed capital to keep up with inflation would leave the door open to fraudulent bankrupt-cies. Although arbitration court judges were being trained to handle bankruptcy procedures, an economics min-istry official said a lack of qualified staff remained ther serious probk

Mr Manannikov said be believed that galloping infla-tion would discourage creditors, who may have to wait up to two and half years for the completion of bankruptcy pro-ceedings, from retrieving money owed to them, except if the debts were denominated in

Second rescue for **Faroe Islands bank**

THE Danish government has put up DKr350m (£36.3m) to rescue the largest bank on the Farce Islands, Sjovinnubanken (Fisheries Bank), from col-lapse, the second time the Danes have had to help within

Financial Times (Scandinavia) Vimmelskaftet 42A, DK-1161 Copenhagen-K, Denmark, Telephone (33) 13 44 41, Fax (33) 935335.

Barnes in Copenhagen. The North Atlantic island group, population 47,000, is a part of the Kingdom of Denmark but

enjoys extensive home rule. The islands have been plunged into crisis by a combination of high government spending programmes and a decline in income from fisheries, which account for 97 per

cent of export earnings.
The Danish government propped up the privatelyowned Sjovinnubanken with DKr500m last autumn, on condition that the islands' government sought the advice of experts from the International Monetary Fund on a policy to restore the economy.

This week's support for the

bank was made conditional on a reduction in the fisheries fleet, tax changes, and a halt to public investment pro-grammes. The islands' crisis follows large expansion of the fisheries fleet and filleting fac-tories in the 1980s, encouraged by direct and indirect govern-ment subsidies, and an ambi-tious investment programme. The investments were financed by borrowing heavily

abroad, with the result that the net foreign debt at the end of

1991, at DKr8.1bn, was about DKr175,000 per inhabitant.

A new cross-border payment system is being launched in Europe. Partnership between the above financial organisations has led to the creation of EUROGIRO — an integrated electronic network which will set new standards in transferring payments across national frontiers.

The EUROGIRO network will provide secure and paperless crossborder payments between any of the 40 million private and business customers of these organisations.

EUROGIRO will do so at low cost, at high speed and with great reliability. And it will provide the basis for a range of products

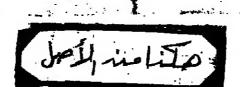

designed to handle all types of transactions — from small, single and infrequent payments, to large, multiple and regular ones.

That's why EUROGIRO represents an important development in cross-border payments — and a form of monetary union which can win everyone's vote.

THE FAST, COST-EFFECTIVE PAYMENT SYSTEM

TO REQUEST FURTHER INFORMATION ON EUROGIRO, PLEASE FAX COPENHAGEN (45)42 52 62 66. OR WRITE TO EUROGIRO RETWORK A/S, PO BOX 188, DK-2670, TAASTRUP, DENMARK, OR REFER TO THE ORGANISATION IN YOUR COUNTRY AS SHOWN ABOVE.

The deportee issue has shaken Israel's relationship with Washington, writes Roger Matthews

THE SPEED and relief with which Mr Warren Christopher, the US secretary of state, welcomed Israel's offer to take back 100 of the 415 Palestinians it deported in December revealed far more about American-Israeli relations than it did about the future of the Middle East peace

It had taken Mr Christopher several days and phone calls to persuade Mr Yitzhak Rabin, Israel's prime minister, to drop his insistence that the decision on the deportees was final and irrevocable. The Palestinians had said that they would not unless the fate of the men was satisfactorily resolved, but it was not this issue which appears to have been uppermost in Mr Christopher's mind.

His primary concern was that the new administration, which condemned the expulsions, should not be forced into using its veto to block any move to impose UN sanctions against Israel for refusing to implement Security Council resolution 799. Very quickly after Israel's statement on Monday night, Mr Christopher asserted that not only was talk of sanctions now unnecessary. but that it could undermine

the whole peace process. To this extent, a relieved Mr Christopher and a bruised Mr Rabin might reflect on their success in sustaining the single most critical relationship in the Middle East. However, it cannot augur well for the peace process, launched in Madrid in October 1991, and

Israeli prime minister Yitzhak Rabin outlines his terms on the deportees' return at a Jerusalem press conference yesterday

will not have quashed moves for sanctions against Israel. The episode has already cost

Mr Rabin domestic political capital that he needed to pre-serve for the day when Middle East peace negotiations move on to substantive issues which demand Israeli concessions.

After performing the partial U-turn, the Israeli leader may seek to reinforce his already hardline stance on security issues, while being even less ready to compromise at the negotiating table. There will also be less enthusiasm for compromise on the other side of the table. Mr Rabin's decision to expel the Palestinians was aimed at crippling Hamas, the radical Islamic organisation which is gaining ground in the occupied territories at the expense of the Palestine Liberation Organisation.

Instead, Hamas has been given a substantial political

boost. Deportees on their hillside in southern Lebanon provide potent images of defiance. While they remain, it is almost impossible for the more flexible PLO to ask its negotiators to return to the negotiating

The US did not want to be forced into vetoing UN sanctions against Israel

table in Washington, Mr Rabin's offer to let 100 men return does nothing to satisfy PLO demands and may perversely be damaging israel's own peace talks strat-egy. In the past few months . Israel's negotiators have increasingly come to sense that

it might just be possible to strike a deal with Syria over the Golan Heights. Furthermore, any hint of real progress with Syria would provide a big impetus for the Palestinians to become more pliant to avoid being left behind.

Syria has been providing some encouragement for this belief with Mr Farouk al-Sharaa, the foreign minister, stressing last month that Arab delegations should not break off bilateral talks where they had most to gain. If they wished to boycott anything, he argued, it should be the multilateral talks which involved greater benefit to Israel.

But Israel's negotiators con-cede that while the Palestinians stay away it will be difficult for the Syrians, Jordanians and Lebanese to return. At the very least, the framework for a solution to the plight of the deportees had to

be in place, and Mr Rabin's concessions on Monday do not meet that requirement.

if anything, argue some Arab diplomats, the apparent US endorsement of Mr Rabin's action has made the situation worse by damaging American credibility as an honest broker. They say Mr James Baker, former Secretary of State whose efforts made the peace process possible, would have played his hand more astutely.

This sense of frustration is share offerings to proposals for heightened by the understandthe early sale of a controlling ing that the three Arab governstake to a strategic investor. Goulding ends role as peace negotiator

Bv Michael Littlejohns, UN

MR MARRACK Goulding, the senior Briton in the United Nations secretariat, who has been in charge of its peace-keeping operations for the past six years, is to become under-secretary general for political affairs as part of a reorganisation programme initiated by Mr Boutros Boutros

Ghali, the secretary general. Mr Goulding's successor will be his Ghanaian deputy. Mr Kofi Annan. Mr Goulding, a former member of Britain's UN mission and later ambassador to Angola, replaces Mr Vladimir Petrovsky, a former Soviet deputy foreign minister, who moves to Geneva as head of the UN European Office.

Mr Antoine Blanca, current UN chief in Geneva, will be returning to the French gov-ernment service from which he was seconded. The changes are

effective on March 1. Mr Boutros Ghall will soon have to replace Mr Bick Thornburgh, former US attor-ney-general, who has been serving as head of UN administration and management but resigned after President Bill Clinton's victory.

UN stops travel near Jalalabad

By Farhan Sokhari

THE United Nations yesterday suspended road travel for its staff between northern Pakistan and the city of Jalalabad in eastern Afghanistan, after four of its staff members were killed on Monday in an ambush by unknown gunmen. The road provides the most important land link for transportation of relief goods from Pakistan to the Afghan capi-tal, Kabul.

Rival groups of mujahideen tribesmen have recently exchanged fire to gain control of the road, western diplomats and officials say.

The bodies of two of the UN's international staff memhers were brought to Islama had yesterday to be flown to their home countries.

Army denies attempt on Khmer Rouge HQ

overnment yesterday denied its latest military offensive was aimed at capturing the Khmer Rouge headquarters near the Thai border, and suggested UN troops be repositioned to act as a "buffer" between government

forces and the guerrillas. The government said a series of recent attacks on Khmer Rouge positions in northern and western Cambodia were aimed at driving the guerrillas back to the territory they held before all the country's main factions signed a ceasefire and

They were responding to accusations by UN peacekeepers on Monday they were engaged in a big offensive which could not be justified on grounds of self-defence.

ity," Mr Khieu Kanharith, senior adviser to prime minis-CAMBODIAN ter Hun Sen, said. "Now the mission is complete. It's a great success."

Gen Pann Thay, military spokesman, said the offensive was almed at protecting villagers working on the rice harvest and at forcing back Khmer Rouge artillery shelling government positions.

He said there was no plan to take the gem-mining town of Pailin, regarded as the Khmer Rouge headquarters, but added: "We finish right now. have to attack them again."

Arafat in talks with Saddam

MR Yassir Arafat, leader of the Palestine Liberation Organisation, yesterday met Iraqi President Saddam Hussein, Reuter reports from Baghdad.

Diplomats said the visit, the first since the PLO's public attempts at reconciliation with Saudi Arabia, could be a mediation attempt by Mr Arafat to help bring Iraq back into the Arab fold. It was the first time the two leaders have held

ANNOUNCEMENT OF A PUBLIC AUCTION FOR THE HIGHEST BID

GREEK EXPORTS S.A., registered in Athens at 17 Panepistimiou Street and legally represented, in its capacity as Liquidator in accordance with article 46a of Law 1892/1990, as supplemented by article 14 of Law 2000/1991 and then by Decision No. 9583/1992 of the Athens Court of Appeal ANNOUNCES

n Public Auction for the Highest Bid with sealed, binding offers for the purchase, in toto, of the assets of the company under special liquidation named COATED ABRASIVES INDUSTRY (VIEL) S.A. registered in Athens.

ACTIVITY AND BRIEF DESCRIPTION OF THE COMPANY VIEL S.A. was founded in 1981 (Govt. Gazette 2627/81) and is engaged in the production of coated abrasives, the sale of these products in the Greek market and their export abroad. The Company's manufacturing installations are in the Industrial Estate of Paras at Patras. The factory stands on a plot of about 12,806m2. The factory building covers a space of 3,568m2. There are also auxiliary buildings totalling 587m2 (offices, etc). The basic manual chinery is of German make (BRUCKNER) and the auxiliary machinery is Austrian (IGEL).

TERMS OF THE AUCTION

- To take part in the auction, interested parties are invited to receive from the Liquidator the Offering Memorandum and the draft Letter of Guarantee in order to submit a scaled, binding offer to the Athens Notary Public assigned to the auction, Mrs. Adriana-Dimitra Economopoulou-Zapheiropoulou, at 18 Voukourestion Strest, 5th floor, Tel. 30-1-361.8249 up to Tuesday, 23rd February, 1993 at 1900 hours. Bids must be submitted personally or by
- Bids will be unscaled before the above Notary on Wednesday, 24th February 1993 at 1100 hours with the Liquidator in attendance. Bidders who have submitted their offers within the prescribed time limit will also be entitled to attend. Bids submitted beyond the prescribed time limit will not be accepted and will not be taken into
- The scaled offers must clearly state the purchase price offered for the assets, in toto, of the Company and must be accompanied by a Letter of Guarantee from a bank legally operating in Greece, to the amount of fifty million drachmas (50,000,000 dra.) or its equivalent in U.S. deliars (U.S.\$).
- The Company's assets and all fixed and circulating constituent parts thereof, such as immovable and movable property, claims, trademarks, titles, rights, etc. are to be sold and transferred "as is, where is" and, more specifically, in their actual and legal condition and location on the date on which the sale contract is signed, sardless of whether the Company is operating or not.
- The Liquidator, the Company and the creditors representing 51% of the total claims against the Company (Law 1892/90 article 46a, para. I as in force), known hereafter as the Majority Creditors, shall bear no liability for any legal or actual defects or for any deficiency in the effects and rights for sale nor for the possible refusal of the State to approve, as required, the transfer of elements of the assets, nor for their incomplete or faulty description in the Offering Memorandum and in any correspondence. In the event of inconsistencies, entries in the Company's books, as they stand on the date of signature of the sale contract, shall prevail. pective buyers hereinafter referred to as "Buyers", shall be obliged, on their own responsibility and due care,
- and by their own means and at their own expense, to inspect the object of the sale and form their own judgment and declare in their bids that they are fully aware of the actual and legal condition of the assets for sale. The Buyers are hereby reminded that, in accordance with the provisions of Law 1892/90, article 46a, para, 4 as in force, having agreed in writing to maintain confidentiality, they are entitled to have access to any information they may require concerning the Company for sale.
- Bids should not contain terms which might prevaricate their bindingness or any vagueness concerning the offered price and its method of payment, or any other matter of importance to the sale. The Liquidator and the Majority Creditors have the right, at their incontestable discretion, to reject offers which contain terms and conditions, irrespective of whether these offers contain a higher price than that of other bidders. Such unacceptable terms would be, for example, requests for the repair, improvement or transfer of fixed assets, or requests for guarantees in the collection of claims or the outcome of court actions brought by the Company in this respect, or compliance with recommendations regarding the security of the installations, or for safeguarding the insurance cover, etc.
- In the event that the person to whom the auction is adjudicated, fails in his obligation to appear within twenty (20) days from being invited to do so, and sign the relative sale contract and fails to abide by the other obligations accruing from the present announcement, then the above-mentioned guarantee of fifty million drachmas (50,000,000 drs.) is forfeited to the Liquidator in compensation for expenses of any kind, time spent, and any actual or hypothetical loss sustained, with no obligation on the Liquidator's part to furnish any specific proof or deem that the amount has been forficited to him as a pensity clause, and collect it from the guarantor bank.

 Guarantees deposited by other bidders shall be returned to them after the Liquidator's evaluation report has been approved by the Majority Creditors and the highest bidder's guarantee shall be returned to him after the has paid the sale price and the act of settlement has been drawn up and signed.
- The highest bidder is deemed the one whose offer has been so judged by the Liquidator and approved by the Majority Creditors as being in their best interests.
- 10. The Liquidator shall not be liable to participants in the auction either with respect to the evaluation report or for his selection of the highest bidder and neither will be be liable to them for the cancellation of the auction in the event that its outcome is not approved by the Majority Creditors.
- 11. Participants in the auction do not acquire any right, claim or demand from the present announcement or from their participation in the auction, against the Liquidator, for any cause or reason. 12. Transfer expenses of the assets for sale (taxes, stamp duty, notarial and mortgagor's fees, rights and other
- expenses for drawing up topographical diagrams as required by Law 651/77, etc.) are to be borne by the Boyer.
- 13. Those taking part in the auction will be committed to keeping the enterprise operating in its present form.
- For any information, interested parties can apply to:

TENDER NOTICE UK GOVERNMENT ECU TREASURY BILLS

For tender on 9 February1993

Majesty's Treasury of ECU 17000 million nominal of UK Government ECU Treasury Bills, for tander on a bid-yield basis on Tuesday, 9 February 1993. An additional ECU 50 million nominal of Bills will be allotted directly to the Bank of

The ECU 1,000 million of Bills to be issued by tender will be dated 11 February 1993 and will be in the following

ECU 300 million for maturity on 11 March 1983 ECU 300 million for maturity on 13 May 1993 ECU 400 million for maturity on 12 August 1983

3. All tenders must be made on the printed application forms available on request from the Bank of England. Completed application forms must be lodged, by hand, at the Bank of England, Securities Office, Threadneedle Street, London not later than 10.30 a.m., London time, on Tuesday, 9 February 1993. Payment for Bills allotted will be due on Thursday, 11 February 1993.

Each tender at each yield for each maturity must be made on a separate application form for a minimum of ECU 500,000 nominal. Tenders above this minimum must be in multiples of ECU 100,000 nominal.

5. Tenders must be made on a yield basis (calculated on the basis of the actual number of days to maturity and a year of 360 days) rounded to two decimal places. Each application form must state the maturity date of the Bills for which application is made, the yield bid and the amount tendered for.

The Bank of England will announce early on 9 February the maximum yield for each maturity of Bills on offer which will be acceptable in the tender. Any tenders at yields above the relevant maximum yield will be rejected. The maximum yields for each maturity of Bills on offer will be published on the following wire services: Reuters (pages GBAA - AF); Telerate (pages 6473-78) and Topic (page 44751).

6. Notification will be despatched on the day of the tender 6. Notification will be despatched on the day of the tender to applicants whose tenders have been accepted in whole or in part. For applicants who have requested credit of Bills In global form to their account with Euro-clear or CEDEL, Bills will be credited in the relevant systems against payment. For applicants who have requested definitive Bills, Bills will be available for collection at the Securities Office of the Bank of England after 1.30 p.m. on Thursday, 11 February 1993 provided cleared funds have been credited to the Bank of England's ECU Treasury Bills Account No. 59005518 with Lloyds Bank Pic, International Banking Division, PO Box 19, Hays Lane, House, 1 Hays Lane, London SE1 2HA. Definitive Bills will be available in amounts of ECU 10,000, ECU 50,000, ECU 100,000, ECU 500,000 nominal.

Her Majesty's Treasury reserve the right to reject any or part of any tender.

part of any tender.

8. The arrangements for the tender are set out in more detail in the Information Memorandum on the UK Government ECU Treasury Bill programme issued by the Bank of England on behalf of Her Majesty's Treasury on 28 March 1989, and in supplements to the Information Memorandum. All tenders will be subject to the provisions of that Information Memorandum (as supplemented) and to the provisions of this notice.

9. The ECU 50 million of Billis to be allotted directly to the Bank of England will be for maturity on 12 August 1993. These Bills may be made available through sale and repurchase transactions to the market makers listed in the Information Memorandum (as supplemented) in order to lacilitate settlement.

Any Bills of any maturity on offer not allotted in the tender will be allotted to the Bank of England. Such Bills may subsequently be sold into the secondary market or made available through sale and repurchase transactions to the market makers listed in the Information Memorandum (as simplementaris).

10. Copies of the Information Memorandum (and supplements to it) may be obtained at the Bank of England. UK Government ECU Treasury Bills are Issued under the Treasury Bills Act 1877, the National Loans Act 1968 and the Treasury Bills Regulations 1968 as amended.

Jakahaha

THE ITAME

The nose of the average hotel concierge has been known to turn 3mm north at the sight of any visitor who happens to fall below his rather regal expectations.

Which is quite amusing, really. Except on those few (or not so few) occasions when you happen to be the guest.

After half a day in an airline seat which seems to defy

every existing airline advertising claim, this is, perhaps, not the best of welcomes.

Nevertheless, tired and weary, you shrug it off and proceed silently to your room.

At dinner, however, the trial continues.

The atmosphere in the restaurant is sombre.

Four waiters hover around your table a trifle too attentively.

(As if in an attempt to make up for the concierge.)

And even a soft, gentle cough is interpreted as a cry for help.

All in all, it's a harrowing experience.

But you accept it quietly, along with all the other little annoyances, as part and parcel of "London tradition". As examined by The Regent, London. Hold your breath, we're in NW1,

Now, thankfully, you have an option.

The Regent, London. The first classic London hotel without the stuffy atmosphere.

A hotel designed with the practical needs of today's business traveller in mind.

So does this mean we're some glassy, glitzy modern structure? Far from it.

What really makes us so special, is that we are a young, irreverent spirit, in a grand hundred-year-old Victorian building.

Above the sprawling courtyard at the entrance, where horse-drawn carriages once waited, we've built an atrium eight storeys high.

Creating one of the most spectacular hotel lobbies in the world. And setting the trend for the rest of the hotel.

The rooms, of course, are equally surprising.

The light, understated and contemporary decor is in stark contrast to the old architecture of the building.

We wouldn't have it any other way.

Because while we've tried to keep all the charming aspects of the old days, we've made sure we haven't forgotten the needs of the modern business traveller.

And let's face it, it's a lot easier to get work done sitting at a desk in a neat, elegant, efficiently planned room, than while sitting under the most elaborate curtains in Great Britain.

(Sorry, but it had to be said.)

We must admit that there is one thing about our rooms that's dreadfully old fashioned. The size.

With an average floor area of fifty square metres, our rooms show scant regard for the shortage of space in

London today.

As far as technology goes, quite obviously, we've kept pace. So if you'd like to toss away the old quill, we can send up a computer to your room.

Even a fax machine, if you like.

But enough of that. It's not all work and no play at The Regent.

For those interested in keeping their bodies as active as their minds, we have a health spa, gymnasium and swimming pool.

As well as access to twelve tennis courts just down the road.

Well, seeing that you've read this far, perhaps it's time we told you where we are located.

near Marylebone station.

Before you yell "not on Park Lane" and turn the page, there are a few things to consider.

For a start, what's so great about Park Lane anyway? Do you really care whether or not you're next to five other hotels?

If you have to get to the heart of the financial district, it's quicker from where we are.

There's less traffic, and there are fewer red lights.

We also have Regent's Park just three minutes away, where you can stroll around and take in some of the freshest air in London.

But don't take our word for all this. Just do us a favour.

The next time you're looking for a hotel in London, make sure you examine The Regent.

Germany 0130 2332.

The Regent, London, a Regent International Hotel, is located at 222 Marylebone Road, London NW1 6JQ, UK. Telephone: (44 71) 631 8000 Facsimile: (44 71) 631 8080.

Opening February, 1993.

The supercilious concierge.

Patten faces surgery as HK reforms loom

By Simon Davies in Hong Kong

HONG KONG Governor Chris Patten has been taken into hospital for minor heart surgery just weeks before his controversial political proposals are due to pass before the colony's legislature.

Hong Kong stock prices climbed on the news in London yesterday, as brokers speculated on the exceptionally remote possibility that the illness could prepare the way for Mr Patten stepping down from a reform programme that has attracted the ire of China and damaged investors' confidence.

Mr Patten is to undergo angioplasty (the full term is "percutaneous transluminal coronary angioplasty") treatment, after doctors identified a narrowing of two coronary

Patten: heart surgery

hospital for four days and was expected to be back at work within a fortnight. Mr Patten chaired a meeting

of the Executive Council (LegCo) - the governor's cabinet - during the morning, and A government spokesman the full reform package is still suggested he would remain in on track, to be presented to the

legislature before the end of February. It is unlikely that his hospitalisation will delay

this process. But the timing is awkward, as it coincides with a stepping-up of China's opposition to Mr Patten's plans to broaden democratic representation in the Legislative Council, following a brief Juli in the verbal

On Monday evening, China's most senior representative in Hong Kong, Mr Zhou Nan, reit-erated China's stance that it would not "barter on princi-

He also claimed that the British proposals were a serious stumbling block to Hong Kong's stable transition back to China in 1997.

This was seen as a warning directed at executive councillors, and observers expect the criticism to intensify in the lead-up to the LegCo debate on

South African riot police fire tear gas and shotguns after taxi drivers threw stones and caus at them during a protest yesterday

Downturn pushes Japan's unemployment to 2.4%

By Charles Leadbeater in Tokyo

JAPAN'S unemployment rate rose to 2.4 per cent in December as the downturn in the economy began to take its toll upon the jobs market.

Most Tokyo economists expect the official unemployment rate will rise in the course of the year to nearly 3 per cent, the peak it reached during the downturn of the mid-1980s.

The main cause of the rise from 2.3 per cent in November is the virtual evaporation of private sector job offers, in both manufacturing and services, as companies freeze recruitment to cut costs.

The ratio of job offers to job applicants stayed at 0.93 in December, the same rate as November, which means there are 93 job offers for every 100

This ratio's stability was

mainly due to a surge of job offers from the construction sector fuelled by expanded public works programmes. Government ministers and

business leaders used the weak unemployment data to renew their calls for an early cut in

The official unemployment rate is an underestimate of the extent of unemployment in Japan. Job losses among self-employed and mainly women part-time workers who do not register for unemployment benefit have already

risen sharply.

Japan's lifetime employment system means that thousands of workers are being kept on company payrolls even though they have no work to do. Some financial analysts estimate this so called in-company unemployment amounts to about 6 per cent of the industrial work-

The rise in unemployment is

depressing consumer confi-dence, which fell by 3.2 per cent to 38.2 per cent in the final quarter of last year according to the official index published yesterday by the

Economic Planning Agency. Consumer sentiment shout the employment outlook fell 8.6 per cent to 27 per cent in the last quarter of the year, fuelling growing pessimism among consumers about the outlook for their standard of living.

As private investment is deeply depressed a revival in personal consumption is seen as essential to reigniting economic growth. Business confidence remains depressed, but not as depressed as the end of last year, according to a sepa-rate report by the EPA. Its index of business sentiment for the first three months of this year stood at minus 24, compared with minus 32 in the final quarter of last year.

drivers in new protest

POLICE and protesting black taxi drivers clashed for a second straight day yesterday, leaving three people injured and tempers high in parts of central Johannesburg, AP reports from Johannesburg.

The drivers were angry that some people held in Monday's confrontation remained in custody, despite an agreement with city officials that called

Law and Order Minister Hernus Kriel said he would declare Johannesburg an unrest area, giving police wide powers to arrest people and

Protesting taxi drivers were complaining that traffic police harass them and that they want subsidies similar to those given the Public Utility Transport Corp. bus company. Taxi drivers are notorious for dangerous driving and are often involved in accidents.

S Africa taxi Death penalty would be reimposed for some crimes

Pretoria unveils bill of rights

in Cape Town

THE SOUTH African government yesterday published proposals for a hill of rights which would outlaw race and sex discrimination and protect private property, but which would impose the death penalty for certain serious crimes and permit deten-

tion without trial. The proposal forms an essen-tial part of Pretoria's blueprint for a constitution which prevents blacks from dominating whites. However, it will not become law without the agreement of the African National Congress and other parties to

constitutional negotiations. The draft bill of rights seems specifically designed to outlaw the gross human rights abuses committed by the ruling National party during its 44 years in power, including torture, murder, discrimination

by race and infringements of basic freedoms of speech, movement and association.

Asked whether the proposals did not represent a "deathbed conversion" to human rights protection, Justice Minister Kobie Coetzee admitted the current constitution permitted abuses against fundamental rights, and that abuse had taken place. Pretoria's proposal is likely

to provoke wide controversy, as it would reimpose the death penalty (suspended since 1990) for certain crimes, would permit 10-day detention without trial, and includes only limited provisions to protect individuals from race discrimination while providing far more protections against sex discrimi-

It makes no move to redress any of the economic wrongs of apartheid, including forced expropriation of land from blacks, but outlaws expropriation by any future government. Measures included in the bill to protect private property rights will attract widespread criticism, as they are designed to protect white

The ANC is likely to oppose the proposal on the grounds that economic rights, such as the right to employment, housing, health care and education, are not guaranteed. The ANC's own draft bill of rights includes such guarantees, but the National party argues that they cannot be enforced against a government which lacks the resources to finance huge social investment.

Government officials say the publication of their draft bill of rights demonstrates Pretoria's desire to move rapidly away from apartheid discrimination. Other recent moves have also been announced, including a decision to remove the racial bias in per capita education

Singapore investment at \$2.1bn record

Singapore says that investment in its economy reached a record high of \$\$3.48bn (\$2.13bn) last year, a 21 per cent rise on the previous year's figure, writes kieran Cooke.

The bulk of the investments were in the chemical, elec-tronic components and electronic systems industries. The US was the biggest foreign investor with S\$1.2bn or 34.5 per cent of the total, followed by Japan with \$\$843.5m and the European Community with \$3614.1m.

Foreigners still trapped

Attacks by government fighter planes on Unita positions in northern Angola yesterday stymied attempts to evacuate foreign oil workers trapped since rebels overran the key oil town of Soyo two weeks ago, AP reports from Luanda.

Unita rebels in their central Augolan stronghold of Huambo, meanwhile, said goveroment forces had withdrawn tanks and ceased aerial bombardments after a weekend of fierce fighting.

Setback for New Zealand

The New Zealand economy recorded its first economic setback for 15 months in the third quarter of last year with a fall of 0.8 per cent in gross domestic product, reports Terry Hall in Wellington.

On an annual basis. GDP was I per cent higher. The setback was mainly due to the water shortages in the South Island lakes.

Volcano deaths

At least nineteen people were killed and around 20 farmers were listed as missing after the dormant Philippines Mayon volcano, world-famed for its beautiful cone, erupted yesterday reports Reuter from Legazpi, Philippines.

It pays to export to Japan

EC Commission funding for your executives to learn the business, language and culture in Japan

To close the trade gap with Japan, EC companies need to understand much more about Japanese markets. The Executive Training Programme provides individual managers with the business experience, cultural knowledge and language skills without which they will be unable to operate and compete effectively in Japan.

Developed by the Commission of the European Communities, the Executive Training Programme makes it possible for EC companies to send executives to study and work in Japan for 18 months.

90,000 ECU subsidy provided

The principal objective of the Executive Training Programme is to promote European Community exports to Japan, and the Commission covers all costs, except for travel, with a package totalling approximately 90,000 ECU for one participant.

During the first 12 months participants undergo intensive language training, visit companies and attend seminars on Japanese business practice and culture. The final six months are spent working with Japanese companies. The Programme provides an opportunity for participants to build useful contacts and develop an understanding of the Japanese language and culture that will help your company enjoy considerable competitive advantage.

Now in its 14th successful year, the Programme is open to any EC-based company, regardless of size, that currently exports, or has firm plans to export, products or services to Japan.

As the sponsoring company, you must demonstrate a commitment to the Programme and to working with your participant to develop a business strategy that will capitalise on the valuable knowledge gained throughout the Programme.

Companies who meet the above requirements and want to sponsor an employee, and individuals who are eligible for sponsorship, are invited to apply for more information to John Patrick, Ref: ETP/FT, PA Consulting Group, 123 Buckingham Palace Road, London SW1W 9SR. Tel: 071-730 9000. Fax: 071-333 5050.

IBERIAL

EC ministers | US adopts tough line on public contracts fail to agree import curbs

EC FOREIGN and trade ministers failed yesterday to agree a compromise on lifting or harmonising national import restrictions, adding to confusion about the treatment of non-EC goods in the single

European market.

Britain, Germany and the
Netherlands may be breaking EC law by unilaterally trying to find ways round the problem, according to Community officials. A spokesman for Sir Leon Brittan, EC trade commissioner, warned yesterday that unilateral action to extend or abolish quotas risked undermining a unified [EC] trade policy".

The question of what to do

about outstanding national quotas is linked to controver-sial European Commission proposals to streamline the procedure for imposing anti-dumping duties on non-EC imports. Liberal northern member states like Britain, Germany and the Netherlands object to the Brussels plan; they believe it would give the Commission greater power to impose duties.

Yesterday, they attacked Sir Leon's compromise, which would have allowed a simple majority of member states to reject proposed duties. Sir Leon rejected claims that the Commission was trying to grab more power for itself, and said

Brussels was trying to speed imposing duties and trade safe-

sure, they will get support."

Failure to agree how to use 1. Goods covered include tex-tiles and footwear from "state trading countries" like China and North Korea.

In the worst case, that could try to stop cheap imports com-ing across internal borders.

In principle, member states wanting to take temporary measures to fill the legal void have to apply to the Commis-sion for permission to extend or abolish quotas. Germany, which has gone for full liberal isation, and Britain and the Netherlands, which want to extend their licensing regimes have not yet asked for permis-

sion, according to EC officials. Foreign and trade ministers may get another chance to discuss the issue next month. Meanwhile, it will be debated

IBM fights for copyright

By Michiyo Nakamoto

IBM, the US computer group, has joined other US high-technology companies waging an intellectual property war with Japan by filing suit against Kyocera, the bioceramics and electronics company, for alleged copyright infringement.

IBM claims Kyocera infringed its copyright covering its basic input/output system (PC BIOS) and is demandguard weapons.

Mr Tim Sainsbury, UK trade minister, said after the meeting: "If the Commission lays before the council a strong and well-argued case for an antidumping or safeguard mea-

such weapons means a legal void still exists on the question of national quotas, still in place in many EC countries despite the lifting of internal EC border controls on January

mean an import ban or reimposition of internal controls to

ing Y18.7bn (£103.3m) damages. Kyocera responded by stating that the BIOS it uses in its machines is a programme that the company developed independently of IBM's programme.

IBM's move comes after nearly three years' negotiations between the two compa-nies. IBM said it was bringing the court action in Tokyo partly to counter possible criticism in Japan of a biased judgment if it should win its case

YEARS AFTER "level playing field" became a cliche in Washington trade circles, the US now has an administration create one.
In the second potentially

explosive trade issue tackled by the Clinton administration in as many weeks, hard on the heels of dumping duties provisionally levied on steel exports, the fledgling Clinton administration took only 11 days in office to announce sanctions against "certain discriminatory procurement prac-tices maintained by the Euro-

pean Community".

"We do not want to close our procurement market, but must nomic interests to foreign pol-insist that our major trading icy or defence concerns are

partners show an equivalent commitment to open and nondiscriminatory procurement policies," Mr Mickey Kantor, new US trade representative,

During the election campaign, President Clinton, who has been forced to backtrack on a number of his promises, said he would open markets and enforce US trade

He seems intent on keeping to these commitments. Mr Kantor, the president's campaign chairman, shares them. Fresh in his mind is the pain and anger of US voters facing and joblessness.

"The days when we could

"As President Clinton has noted time and again, our national security is directly related to our economic viability here at home. We will not be guided by the assumption that other nations share our commitment to free trade and

open markets when the real-world evidence is otherwise." The government procurement dispute with the EC dates back to 1990 when the Community first announced its Utilities Directive, planned to come into force in

EC procuring utilities could exclude bids with less than 50 per cent EC content; acceptable hids with a majority of EC content must receive a 3

Under US trade law, the administration must thoroughly review global procurement practices every year. In February 1992, the administra-tion determined that the EC discriminated against the US in its Utilities Directive.

President Bush said he would institute sanctions against the RC to take effect by January 1998, subject to EC The Clinton administration

was not forced to act immedi-

ately. US law gives the president the authority to modify or suspend sanctions if it is in the national interest. Mrs Carla Hills, the former US Trade Representative, usually took full advantage of the law's flexibility in the hope of

Kantor apparently decided more talking would not pro-

A US trade official said that in exchange for a liberalisative, the US had offered to bring a number of US states into the Gatt government pro-curement code, and to deal with any "legitimate market access problems" EC compa-

nies might have with private stility hidding.

They wanted to have some procedural guarantees applied to private telecommunications companies," he said. "We might feel more sympathetic if they had come up with examples of discrimination." US officials recognise that

the Directive has many "aspects" which improve US

Mr Kantor has ordered a study of "the desirability and feasibility of withdrawing from the Gatt Government

and services.

unacceptable that restrictions remain. Clinton officials, who

overwhelmingly approved the action, believe the US was already late in moving and

was even ill-prepared to do so. The US trade representative

had no sanctions list prepared nor even an accurate estimate

of the costs of the retaliation.

The retaliation will only hit

products not covered by Gatt's procurement code: telecommu-

cations, airports, waterways

This would allow the US to broaden its sanctions against the EC with the cost as high as

Indignant EC springs to defence of its directive

Officials see utilities ruling as an important market-opening initiative, writes Andrew Hill

ONTRARY to US claims that the European Community is bent on using the obscure new "utilities directive" to block US companies' access to government contracts. EC officials see it as an important marketopening initiative and one of the most important parts of the

single market programme. This perhaps explains the outburst on Monday of Sir Leon Brittan, the EC's most senior trade official, attacking as "unilateral bullying" Washington's threat to freeze out EC companies when awarding US federal contracts. Mr Niels Helveg Petersen, Denmark's foreign minister and president of the EC Council of ministers described the action as sending the "wrong signal for the world

The Clinton administration said on Monday that from March 22 it would block EC companies from bidding for millions of dollars' worth of American government contracts and, potentially more damaging, threatened to withdraw from the General Agreement on Tariffs and Trade's multinational government procurement code.

The initial action is to be

the US says is EC discrimination against US sales of telecommunications and powerernment utilities following the introduction of the utilities directive on January 1 1993.

The idea of "government procurement contracts" may be hazy to many, but they are nevertheless immensely impor-tant. Overall, Commission officials estimate that they represent some 15 per cent of EC gross domestic product, of which 7 to 10 per cent – con-tracts worth Ecu240bn-Ecu340bn (£194.88bn-£276.08bn) could be opened to competi-

tion by the new directive. The present row centres on the specific area of contracts for equipment supplied to telecommunications and electrical

The directive allows EC governments to reject tenders for supply contracts where the non-EC content of the products supplied exceeds 50 per cent of total value. It says that in borderline cases preference should be given to tenders where over half the products are made in the EC, even if the price is up to 3 per cent higher than that of competing tenders.

The US believes this so-called "reciprocity" clause is

discriminatory. The EC in turn has complaints about allegedly protectionist US procurement legislation, including the Buy American Act, which the EC says imposes far stricter price eference clauses on products of US origin.

In the utilities sector, US and EC central government spending is roughly equal. US cen-tral authorities spend annually Ecu48bn on supplies, Ecu25bn

on services and Ecu7bn on works; the EC spends respec-tively Ecu40bn, Ecu30bn and Ecu25bn. About half this could be contract expenditure. In the trickier area of state expenditure the US figure is Ecul94bn and the EC's Ecul45bn. Contracts in the telecommunications and electrical equipment sectors are said to be worth about Ecu50bn annually in the US and roughly the same amount in the EC. What galls Sir Leon Brittan and his officials is that they believe the EC directive will

allow US suppliers to compete directly on the BC market and gain a chunk of that Ecu50hn total. That is a view shared by the French government, which tried unsuccessfully to postpone the implementation of the atilities directive before Christmas. The attempt was made on the grounds that it would put EC suppliers at a disadvantage compared with their US coun-

terparts. Brussels officials claim that the public procurement directives are already having an effect on the sheltered market. In spite of the fact that not all EC countries have put the

utilities legislation into their national law, about 250 equip-ment contracts were advertised overall value of the advertised contracts, but it still equals the

for tender in the EC's Official Journal in January. "We are getting advertisements from every member state in the community, major and minor utilities," one official said yes-

About 40 of those notices stated a contract value making a total of some Ecu500m. That is probably far short of the annual value of trade in the whole EC public procurement introduced

In EC-US negotiations at the beginning of January the community offered to drop temporarily the offending 3 per cent clause on telecoms and electricals equipment, in exchange for suspension of the Buy American Act at five federalcontrolled power utilities, representing some 25 per cent of the market.

EC negotiators also pressed for a wider deal covering procurement supplies, works and services. "The idea was to meet the American problem on elec-tricals and telecoms, at least partially, and to give a kick-start to [multilateral Gatt] negotiations on public procure-

ment," one EC official said. That deal was rejected, and even though the US presidency has changed since the January negotiations, Commission negotiators say it is unlikely to be given a new lease of life by the Clinton administration.

Sir Leon has nevertheless urged the US to show restraint. and hopes to discuss the issue with Mr Mickey Kantor in Washington during his first formal meeting with his US

TANDEM CONNECTO END CENEDAL EVDDECO

Timing is money. That's why businesses in 176 countries rely on Federal Express more than a million times a day. And why Federal Express relies on Tandem computers for constant availability of critical online information to help

track packages and speed shipments through customs around the world. In fact, Tandem online technology enables Business Logistics Services, a rapidly expanding division of Federal Express, to replace the capital-intensive

distribution networks of its customers with innovative custom solutions that increase their speed-to-market and reduce their overhead. To find out how we do it, call 0800-111000. And discover what Tandem can do for your company.

Shouldn't you be computing like this:

Clinton promises welfare task-force

By George Graham in Washington

PRESIDENT Bill Clinton yesterday promised to name a task-force within the next 10 days to reform the US social safety net of welfare pro-

grammes.

He told the National Governors' Association that he was committed to "ending welfare as we know it" with measures to finance expanded job training for the unemployed, matched by a requirement that people must do some kind of work for their welfare cheque.

The president said he would focus on better implementation of the Family Support Act, a 1988 welfare reform based on the work of an NGA task-force which he, as governor of Arkansas, co-chaired.

Arkansas, co-chaired.
"The bill that is on the books will work, given the right economy and the right support systems," Mr Cinton said.
Advocates of welfare reform

Advocates of welfare reform had been discouraged about the new administration's intentions, fearing that the centrist Democratic emphasis on requiring welfare recipients to work or enroll for training might fall prey to left-wing advocacy groups concentrating on greater funding of existing programmes.

These suspicions were enhanced when Ms Donna Shaiala, new secretary of health and human services, last month devoted only one sentence to welfare reform in a five-page statement of goals.

With the onset of the recession, state revenues have been constrained while the number of welfare recipients has grown by 30 per cent. As a result, few states have been able to implement in full the act's requirement that welfare recipients take part in some form of education or training.

Mr Clinton promised yesterday his reforms would be based on the principle that "welfare should be a second chance, not a way of life". There must be "a certain time beyond which people don't draw a cheque for doing nothing," he said. But at the same time people must be helped out of the welfare trap by providing them with continued health coverage, child care, and expanded earned income tax credits when they

took jobs.

Many states have already embarked on far-reaching welfare reform programmes, such as Michigan's 21-point plan to strengthen families or New Jersey's family development programme. Mr Clinton said he would let states experiment with such programmes, even when he disagreed with them.

Army bases may house homeless

The Clinton administration is planning to use decommissioned military bases and other federal facilities to house the homeless, Housing Secretary Henry Cisneros said yesterday, AP reports from Washington. "It's critical...we make that conversion to those most needy in our society." he said

Peabody Coal strike gets underway over demand for union job security guarantee

US pit strike may spread to other coal producers

In New York

MORE THAN 7,000 miners working for Peabody Coal, the largest coal producer in the US and a subsidiary of UK-based conglomerate Hanson, went on strike yesterday in a dispute over job security and union representation that could soon spread to other big US coal producers.

The United Mine Workers union said it was ordering its members at Peabody, who make up the bulk of the company's workforce, not to report for work after negotiations

over a new national wage agreement broke down. The old agreement, negotiated in 1988, expired just before midnight on Monday.

The dispute is over a refusal by the employers' body, the Bituminous Coal Operators Association, to guarantee in the new wage agreement that its members will employ union workers at their new mines. Without such a guarantee, the union will not negotiate a new national contract, which covers 42,000 of the country's 103,000 mine workers.

Mr Thomas Hoffman, a BCOA spokesman, said yester-

day: "Employees should have the right to to decide themselves whether they want to be represented by a union or not." The UMW is seeking a guarantee for its members because

The UMW is seeking a guarantee for its members because in recent years employers have been increasingly using non-union labour at their new mines, a practice which has steadily reduced the UMW's representation among mine workers. In the 1970s, the UMW represented more than 50 per cent of all mine workers. Today, the union represents only 35 per cent.

There was no indication from the union yesterday

whether it would extend the action to other producers. However, Mr Richard Trumka, president of the UMW, said on Monday: "If, when and how this strike expands depends entirely on whether the BCOA companies are prepared to bar-

gain."

If the UMW does extend the strike, it could seriously affect production at other big producers. Companies with operations in the Mid-West, where the UMW is heavily represented among miners, would be particularly vulnerable.

An extended nationwide strike, however, would not

immediately affect coal-users or consumers. Mr Ron McMahan of Resource Data International, a Colorado-based consultancy, estimates that the country's leading electric utilities have stockpiles of coal that mould lest about 50 days.

would last about 60 days.

Peabody, however, is likely to be hit immediately by the strike. The company employs UMW workers at all but one of its 71 mining operations, and the strike will affect about 58 per cent of the company's annual coal output of almost 90m tons. The rest of Peabody's production, all of it concentrated in the western US.

would not be affected because these operations have a separate contract with unions.

Peabody's parent. Hanson. would also suffer from a prolonged strike. In 1991 it made a profit of \$263.5m on sales of about \$1.7bn, making it the second largest contributor. after tohacco, to Hanson's total earnings.

earnings.
Industry analysts were not surprised that UMW chose Peabody, saying that the company was probably singled out because it is foreign-owned. The union is likely to have judged that industrial action would have had much greater

impact it it struck first at a non-US-owned company. This latest miners' strike -the first since the violenceplagued stoppage against the Pittston Coal in 1989 - comes

at a time when the coal industry is producing more coal each year with fewer miners.

Just after the second world war, the US coal industry employed 320,000 miners who produced about 480m tons of coal a year. By 1979 employment had fallen to 220,000 but production had jumped 781m tons, and by last year, 103,000 miners were producing more

than thn tons of coal.

REACHING OUT: There are now more ways than just the established media for Clinton to reach the public

Less a honeymoon, more a new affair

Jurek Martin on the altered relationship between media and president

T IS still not quite clear who first claimed in print or on the air that President Bill Clinton's national honeymoon was over and his presidency damaged beyond repair. It probably happened before he even took office. It certainly has been the substance of many column inches and words since.

Yet, suddenly, in the past 72 hours, the great American media have begun to have second thoughts.

Not to the point of redeifying Mr Clinton, let alone his wife, but of wondering, even in a week when Dallas crushed Buffalo in the football Super Bowl, whether every political issue has to have an irrevocable winner and loser.

In a remarkable exercise in media self-criticism, Jonathan Alter, the Newsweek magazine columnist, offered an exquisite and entirely accurate summary of the overall thrust of the reporting of what, in his view, is now a "manic depressive" journalistic culture.

"He was a hero on election

day, a goat during his early disorganised transition, a hero at the Little Rock economic conference, a goat during the week before taking office, a hero at the inauguration, a goat during the fights over Zoe Baird and gays in the military. In each case there may have been sound

ments but little acknowledgment of their evanescence."

R.W. Apple, the veteran Washington bureau chief of the New York Times, a man not disposed to instant judgments unless on food and wine, suspects that it is more an awakened public than the media which is ringing the changes.

"A host of factors, including

"A host of factors, including weakened political parties, wider coverage of governmental activities on cable television, the proliferation of pressure groups, the advent of radio and television call-in shows and a popular mood of scepticism and discontent reflected in the candidacy of Ross Perot, have repeatedly combined to prove the capital's

conventional wisdom unwise."

Some are totally disdainful both of their own profession and the tendency towards participatory democracy. George Will, the conservative pundit who would have been at home in Plato's Republic, allows his lips to curi on television when he talks of the US as "a plebiscatory" in which there will soon be no point in sending members to Congress.

It is undeniable that Mr Clin-

It is undeniable that Mr Clinton and the media are experiencing a rocky early relationship. Generalised factors include a media perception that he was given too easy a ride in the election (the president would disagree), that he is de facto green because he is

actually younger than many of the media doyens, and the suspicion — not without foundation — that he does not like the press (few politicians do these

Relations with the White House press corps are particularly fractious. This is normal, because the job of White House correspondent, with long hours, minimal freedom of movement and dependence on photo opportunities and whatever information is doled out, is nothing like as glamorous as it sounds.

The main consolation is guaranteed air time and the front page, with inevitable emphasis on well turned soundbites and snappy judgments.

eorge Stephanopoulos, the principal spokesman, has not always been sensitive to this bear garden in the first two weeks. Operating erratically on Clinton Standard Time, restricting access to some offices and occasionally being a little too smart for his own good, he has invited criticism not just of himself but of his president.

But Mr Apple's broader point about new pressure points may be more important in the longer run. Last year's election campaign demonstrated that the established media had lost

its monopoly of the dissemina-

tion of political information

and analysis, as candidates by the dozen took to the talk and call-in shows (many featuring, it might be said, establishment journalists like Mr Will).

The first sign that Ms Baird's employment of illegal immigrants might jeopardise her nomination to be attorney general surfaced on the talk shows around the country.

In Washington, where the Clinton transition was partly operating, it appeared a minor matter and the Senate judiciary committee gave her an initial warm welcome. When mounting public criticism reached even the capital's radio stations, she was gone. But the new genre has a short attention span and Ms

ical footnote.

The latest focus has been on homosexuals in the military, and this time the evidence was of orchestration by well-organised pressure groups, mostly on the religious right. Some popular talk show hosts, like Rush Limbaugh, a feroclous conservative, needed no stok-

Baird now seems but an histor-

There is nothing new in this – ever since the Pony Express, congressmen and presidents have been intermittently deluged with mail from distant quarters. But there may be a new unwillingness on the part of elected representatives, Mr Clinton included, to disregard the voices of the people in the

Perotian age.

Not that all are uninformed. The audiences that CNN and C-Span, the cable channels, command may look small in the ratings but they seem to pull weight. C-Span is turning out to be something of a national phenomenon. Still mostly set up to air, without adornment, debates in Congress, it has expanded into viewer call-ins and the sort of serious discussion programmes and seminars on government affairs that was thought would only appeal to political groupies.

here are more of these aficionados than might be expected. Your correspondent's one appearance on C-Span, not exactly a knockabout pre-recorded discussion on foreign affairs, resulted in more calls from around the country than anything written for the FT in the past 26 years.

It would probably, therefore, be as misleading to rush into premature judgment on the new media as the media is to rush into premature judgment on the new president.

As Republican Senator Robert Dole said this week: "It's a long road and he's only had a bumpy beginning." Or, as Jonathan Alter observed: "What goes down must come up. And down and up and down and up

Woolsey spies new targets for the CIA

By Jurek Martin In Washington

THE CIA faces greater challenges in the future than it did during the cold war, according to Mr James Woolsey, President Bill Clinton's choice to run the US intelligence agency.

In Senate confirmation hearings yesterday, Mr Woolsey said he would try to find ways of cutting his agency's budget - still a classified figure but thought to be about \$28.5bn a year - but not to the point of weakening US intelligence gathering capabilities.

In his prepared statement he said, "yes, we have slain a large dragon" in the former Soviet Union. "But we now live in a jungle filled with a bewildering variety of poisonous snakes, and in many ways the dragon was easier to keep track of."

He thought the CIA's own structure, which he said was prone to "excessive compartmentalisation", did not always help in dissemination of necessary intelligence.

Several senators, all predisposed to confirming him in office, agreed with this analysis. They drew particular attention to the question of the CIA's involvement in economic and commercial intelligence.

On Monday, Mr George Stephanopoulos, chief White House spokesman, said Mr Clinton wanted the agency "to focus more on economic interests and economic intelligence, which is where the real competition is now".

Senator John Warner, the Virginia Republican, conceded "the growing number of views" advocating that the US follow the European lead in this

But, he added, "these proposals raise serious doubt about the proper role of the US intelligence community, as well as questions concerning the companies which would receive such information, and their status as US or foreign-owned companies".

But Senator Max Baucus, the

But Senator Max Baucus, the Montana Democrat, while agreeing that the question was "troublesome," urged Mr Woolsey to "grapple with it" and come up with some "definite policy".

While diplomatically neutral in his response to these comments, Mr Woolsey is known to be interested in the area of evonomic intelligence.

Bush anti-union orders overturned

By Jurek Martin

PRESIDENT Bill Clinton has rescinded two Bush administration directives which the trade union movement considered unfair.

The first prohibited companies which entered into project agreements with unions from competing for federal contracts. It was issued by President George Bush just before last November's election in return for the backing of the trade association representing non-union building companies.

non-union building companies.
The second, issued earlier last year, required the posting

jects advising workers of their rights not to pay union dues according to the terms of a 1988 Supreme Court ruling.

Mr Clinton's actions are reminiscent of those taken on the first Friday of his presidency when he lifted several Bush and Reagan orders limiting access to abortion.

Mr Clinton said he had acted "to restore a needed balance in America's workplace" and to reduce "unnecessary federal government intrusion". He said that project agreements with unions allowed more reliable cost estimates and promoted safety in the workplace.

Rulers of Haiti reject UN plans for democracy

By Canute James in Kingston

THE AUTHORITIES in Haiti have balked at an agreement reached just over a fortnight ago for the restoration of democracy in the Caribbean republic

The country's military rul-

ers and the government they have set up have indicated strong reservations over implementation of the United Nations brokered plan.

Mr Marc Bazin, de facto prime minister, has rejected

prime minister, has rejected proposals for international observers to speak to Haitlans without prior government approval.

This followed a statement by Gen Raoul Cedras, the head of the military and the effective leader of the country, that he had not agreed to any plan for the restoration of democracy and for the return to the country of Mr Jean-Bertrand Aristide, Haiti's president, overthrown by the army and sent into exile 16 months ago.

The statements by Mr Bazin and Gen Cedras have put into doubt the usefulness of an

accord reportedly reached last month with Mr Dante Caputo,

a UN special envoy, in which

the military appeared to have

yielded to international pres-

sure by saying it was willing to discuss the restoration of democracy for the country's 7m people.

Mr Caputo has since returned to Haiti in what appears to be an effort to discuss the objections of the authorities and prevent the scuttling of the UN plan.

Mr Bazin said that while he was still in agreement with the UN plan to send the observers to Haiti, and was

prepared to negotiate restora-

tion of democracy, his de facto government would not permit the observers to interview Haitians.

Diplomats in Port-au-Prince, Haiti's capital, say the latest statements, particularly those of Gen Cedras, have reinforced widely held beliefs that the military will not lightly step

military will not lightly step down and allow Mr Aristide's return.

They also say the authorities fear that uncensored contact between individual Haitlans and the UN observers would damage the authorities, who have been accused of the mur-

der, beating and imprisonment of its critics. Army leaders maintain privately that Mr Aristide would not be allowed back into Haiti "under any conditions".

Mexico's air traffic control deal flies into flak

EXICO'S crowded air corridors are one manifestation of the country's economic recovery. But air traffic is growing far faster than the economy, and that is putting Mexico's air traffic control system under immense strain.

Some 700 flights a day used Mexico

Some 700 flights a day used Mexico City airport last year, with commercial traffic in and out of the capital 32 per cent up on 1991. The air traffic control system was designed in the late 1970s to handle less than half that.

in the main air traffic control centres are not integrated, so as a result operators have to talk to each other through a hotline about flights passing from one zone to another.

Mexico's air traffic control agency last year began briefing air traffic technology companies on plans for a radical upgrading of the system.

The computers used by the system

including – most importantly – the integration of the system's computers. However, the awarding of the prestigious contract to the two European companies which installed the current system has brought strong protests to the Mexican government from competing US and Canadian companies. IBM, Westinghouse and Raytheon's Canadian subsidiary have formally complained about alleged irregularities in the tender process which resulted in the award of the \$21.1m contract to Thomson of France for the data processing system and

provide the radars.

The tender, announced in August, was cancelled at the last moment on November 19 because, according to the official explanation, none of the seven contenders compiled with the technical specifications. Seven bids to

Alenia, a subsidiary of IRI of Italy, to

The award of the contract for the country's new system has called up a storm, write Damian Fraser and Stephen Fidler

supply data processing equipment and radars were made: IBM, which bid only to provide data processing equipment, Calmaquip offering Westinghouse technology, Raytheon Canada, Thomson, Plessey (Siemens), Toshiba of Japan and Alenia.

Mr Roberto Kobeh, head of Seneam,

the state company in charge of air traffic control, said experts from his agency, the Mexican Institute of Communication, an independent govern-ment body, and the Canadian firm Martin Marietta signed a document outlining where the companies had not complied with the tender requirements. He showed such a document to an FT reporter but would not let him read it in full, nor identify where these companies were not complying. However, an agent acting for IBM claims he was told before the cancel-lation that the tender would be called off unless he paid money. According to the agent, Mr Kaveh Moussavi, an Oxford-educated entrepreneur with homes in the US and UK, three men - apparently Mexican officials - arranged to meet him in his hotel, the Nikko in Mexico City. They initially asked for \$1m and then for lower amounts, according to Mr Moussavl. eventually suggesting a donation to the Mexican government's anti-pov-

erty programme, Solidarity.

Mr Moussavi says he declined to entertain the proposals of the men whom he described as well-informed about the tender. He told them that if they were officials seeking a bribe or were going to pay over the money to officials, it was illegal under US law

for a US company to make such a payment. There is no independent corroboration of the meeting.

IBM, Calmaquip and Raytheon vehemently deny that their bids did not comply with the tender require-

IBM, Calmaquip and Raytheon vehemently deny that their bids did not comply with the tender requirements. Mr Armando Paz, chief financial officer of the Miami-based Calmaquip, said: "Westinghouse and IBM use the newest, most advanced technology in the world... If someone

'There are many things here that smell like smoking guns,' said one foreign diplomat

says you do not comply that is unacceptable and you fight to the end. It is a slight to our reputation."

IBM in its protest says: "Contrary to the evaluation reported in the referenced letter, IBM believes it is fully compliant with the specification." Raytheon is of the same opinion.

An IBM spokesman also said the protest argued that the government, in awarding the tender, had failed to take account of the cost of the system over its lifetime – including maintenance and spares – which Seneam had originally said would significantly influence its decision. According to the US company, the second tender was awarded only on the hasis

of the system's acquisition cost. In the first tender offer, the protesting companies and diplomats who have seen the relevant documents say Thomson offered to supply the computers for the air traffic control system at \$33m - making it by far the most expensive system on offer. IBM says it offered \$21.5m in the first offer, with Raytheon offering still less.

with Raytheon offering still less.
Mr Kobeh of Seneam says \$33m figure is too high, and that Thomson offered to supply the computers at \$25m. Thomson refused to comment on this or any other matters relating

The government called a second round of bids in December with reduced specifications. There was consternation among competitors when the winning \$13.2m bid by Thomson for the computer system was made public. "I can't see how any company can reduce its bid by that amount of money," says Mr Paz.

The other contenders reduced bids by a maximum of 9 per cent, against the reduction of 47 or 60 per cent by Thomson in the computer bids. Together with Alenia's winning \$7.9m radar bid, the combined bid was just \$600,000 below the next-lowest combined bid of \$21.7m by Raytheon. Calmaquip says it believes Thom-

Calmaquip says it believes Thomson did not comply with specifications in the second bid, since the Thomson system is not fully operational in another country – one of the conditions of the tender. Mr Kobeh sald Thomson's basic technology is used in many parts of the world, but claimed all of the systems offered were tai-

lor-made to suit Mexico's needs. Thomson's refusal to comment has made it difficult to know whether some of these claims reflect the frustration of US companies of not being able to offer such attractive terms as a state-owned European group, such as Thomson. Aggressive pricing in such tenders is not unknown and may simply reflect the importance of the business for the European company. If as Mr Kobeh claims, there were no irregularities in the bidding process, the unwillingess of the Mexican

If as Mr Kobeh claims, there were no irregularities in the bidding process, the unwillingess of the Mexican authorities to release promptly all the relevant documents has left the US and Canadian companies feeling cheated. At the least, the bitter complaints and report of requests for money in a hotel room feed a common – if still to be substantiated – view that favouritism and corruption clouds awards of many government contracts in Mexico.

government contracts in Mexico.

Nafta will over time open up most of Mexico's public sector procurement to US and Canadian companies. But critics of Nafta have long argued that as long as corruption plays an important part of business, companies that play by the rules will not benefit fully

from such market opening.

While the business climate has improved immeasurably in Mexico in recent years, corruption remains a way of life for many well-placed lower and middle-level officials, and is rife in the police force, and parts of the judiciary. If a company loses a contract for not influencing the right people, it will find it difficult to use Mexico's legal system to recover damages. And if corruption comes to light, it is often when the official concerned is out of political favour. Those blessed with a powerful patron usually remain well-protected.

Exporters 'face risks in Europe'

By David Dodwell, World Trade Editor

UK exporters to other parts of Europe "are facing very seri-ously increased risks", with overdue accounts up by more than one third in 1992 as recession and bankruptcies lead to defaults in countries once regarded as virtually risk-free. according to NCM Credit Insurance, Britain's leading private sector export credit insurer.

The environment is very dangerous," said Mr Colin Fox-all, NCM's chief executive: "It is important that people should realise that doing business in Europe involves increasing

The warnings come just two weeks after Mr Michael Heseltine, minister for trade and industry, and Mr Richard Needham, his deputy, launched a broad-ranging new initiative to boost exports across the EC called "Business in Europe." This is part of a wider UK government strategy to revive the economy through export growth rather than domestic

"Ministers are trying to encourage exports in Europe, but are not alerting them to the dangers," said Ms Conni Randall, NCM's director for business strategy.

The value of overdue accounts in the EC in 1992 amounted to £72m, up from under-£53m in 1991. The company orders.

staged an ostentatious display

of public support for Mr Nor-

man Lamont in an attempt to shore up the chancellor of the

exchequer's authority in the run-up to the March 16 budget.

But his defence of the chan-

cellor failed to rally the pound which slipped to new lows on

the foreign exchange markets. Downing Street refused to be

drawn on the widespread speculation at Westminster that Mr

Lamont will be moved from the

Treasury in a summer cabinet

By Philip Stephens and James Blitz

describes an even more stark deterioration over the five years from 1987 to 1992, where real losses reported by UK companies exporting to the EC have more than trebled.

Avoiding actual numbers for reasons of business confidentiality, NCM says losses reported on exports to Portugal have soared 27-fold between 1987 and 1992. Losses reported for Spain have risen by 805 per cent, with Belgium up 530 per cent, and even Germany up 300

"The opportunities that devaluation in the UK are going to present are not going to be easily absorbed because of the state of these economies. which are slowing down or presenting considerable difficulties in terms of defaults," Ms Randall said

Mr Foxall insisted that while NCM's data was not comprehensive, it was unquestionably representative. NCM provided export credit insurance for exports worth £14hn in 1992, involving 6,000 companies trading with 222 countries, accounting for 80 per cent of the policies written for UK exporters. Trade Indomnity, the UK's second most important export credit insurer, reported that a survey of 600 companies showed the trading outlook for UK companies remained "ominous", with under-capacity, and cancelled

referendum on the line

By David Owen

BRITISH VOTKES are to have their say on the Maastricht Treaty after all. At least, those prepared to pay the price of a plut of beer for the privilege. Baroness Thatcher, the for-mer UK prime minister, was on hand at the Palace of Westminster yesterday to help launch Dial For Democracy - a telephone referendum

on the treaty.

The idea is to give eligible voters the chance to express a view by dialling one of two numbers. Backers of the exercise hope both to provide a credible indication of how the British electorate would vote and to increase pressure on the government for an official

In serious if belligerent form, Lady Thatcher said: "We alone of the people in Europe have not been invaded or occu-pied for 1,000 years". Proceeds will be used to min-

imise instances of improper, under age or multiple voting. Lines will remain open for at least a month. Lord Pearson of Rannoch, who will sit on the scrutiny committee, has to date underwritten the exercise to the tune of £10,000-£15,000. Subsequent investigation revealed that calls last just over 2% minutes, billed at 48p a minute outside cheap rate

Yesterday's event culminated with Lady Thatcher casting what was hilled as the first vote of the poll using a pristine white telephone on the desk in front of her. Or did she? On later inspection, the telephone appeared to be dead.

Maastricht Business called in to help cut bureaucracy

Seven task forces formed in fresh attack on UK red tape as prime minister renews piedge to cut costs, report Alison Smith and Charles Batchelor EVEN task forces of busibegin task forces of out-nessmen and women are to be called in to review more than 7,000 government regulations affecting the pri-vate sector, as ministers begin a new offensive against new regulations will have spe-

UK to get all Philips cathode work

Philips, the large Dutch electronics group, said that it had decided to concentrate all production of cathodes for television tubes at its Blackburn, Lancashire, plant. The company currently pro-

duces some 60 per cent of its global output of cathodes in Blackburn with the remainder being manufactured at Sittard. in Holland. A Philips spokesman said

the decision had been taken as part of a drive to cut production costs. He said the production facilities in Blackburn could be developed to produce cathodes more efficiently. The move is evidence of the

"clear and tough" measures the company promised last November to improve performance in consumer electronics Some 200 people are employed in Blackburn in

cathode production. The spo-keman would not say whether the decision would lead to either further investment or more jobs at the Blackburn plant. He also said he did not know the salary differential between workers in Sittard and in Blackburn but that salary costs had not been part of the decision. 1350 people work at Sittard: 168 workers were involved in cathode production and forced redu could not be ruled out, a spokeman said.

Galileo may shed 200 jobs

About 200 jobs in computer operations are expected to be lost at Galileo's Swindon headquarters as a result of the merger between the UK-based airline reservation system and

the US Covia system. The merged company's data processing operations will be carried out at a combined centre in Denver, Colorado, and Galileo's Swindon operations will be transferred there over the next nine to 12 months.

Arms-for-Iraq inquiry delayed

The volume of material gathered by the judicial inquiry into the arms-for-Iraq scandal is so great that it is likely to delay its conclusion at least until the end of the year. Lord Justice Scott, who is heading the inquiry, is believed to have hoped to con-clude his findings by early summer. This is now seen as the earliest date by which wit-nesses - including former and current ministers - will begin to be called.

The Scott inquiry has been gathering a large number of documents, many previously classified, from governme departments detailing the involvement of those departits in Britain's trade with Iraq in the 1980s.

Car parks espionage 'was prolonged to increase earnings'

By Catherine Milton and John Mason

A SECURITY company hired by National Car Parks to spy on Europarks, its main business rival, prolonged its indus-trial espionage to earn more money from NCP, an Old Bailey jury heard yesterday.

Prelimary investigations into Europarks by KAS, the security company set up by Sir David Strling, founder of the SAS, indicated the company

was winning car park con-tracts fairly by undercutting NCP, the court heard. Europarks was not winning business by obtaining confidential information about NCP as its rival had initially sus-

A former consultant with KAS, identified only as "Mr C", agreed the contract had been revived as an "earner" on the initiative of Mr Kenneth Edwards, a KAS finance director and others. "Mr C", a for-mer SAS soldier, said he had then briefed former Army captain Ms Jane Turpin on secu-rity procedures before she was planted as a mole in Euro-

parks' organisation. Mr Simon Hewitt, then a manager with KAS, and Mr Edwards had separately told him of their intention to use Ms Turpin to "get the informa-tion or to see if there was any

"Mr C" agreed that the man-agement of KAS, which he had once regarded as the "Rolls-Royce" of security companies, was more than "a bit of a shambles". Mr Hewitt and Mr Gordon Layton, the chief executive of

NCP, both deny conspiring to defrand Europarks by dishon-estly acquiring information relating to its business affairs between January 1987 and Jan-

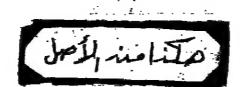

uary 1969. Earlier, the court heard another former KAS employee describe how he wrote a feastbility report outlining a possible covert operation to gain information about Europarks and its personnel as well as another project to identify security deficiencies within NCP. Mr David Paterson also described his attempts to secure a job with Europarks using a false curriculum vitoe which left out his work as a policeman and intelligence operative in Rhodesia He admitted deceiving Europarks in his application for work but said he had regarded the NCP project as the legiti-

mate activity of a security

company such as KAS.

Do women or men make better bosses? Diane Summers reports on new research into management styles

Another battle of the sexes

omen will always look for consensus, while men try to divide and A woman will say: "These are the ways we can solve the problem -- how many peo-ple can we get to agree with it?" A man says: "This is the way we are going to do it, and if you don't like

it, you can resign".

That, at least, is one senior personnel manager's view of how male and female management styles con-trast sharply in the workplace, from an interview in a report to be published next week*.

The study, conducted by headhunters Spencer Stuart, asks why so few women occupy top manage: ment positions, examining en route perceptions of leadership qualities. It concludes that the stereotype of male and female ways of managing - typified by the personnel man-ager quoted - flatters because it

ascribes to women an exceptional degree of generosity and humility. This is damaging because it conceals differences among women and forms what is called The New Mythology. Old, politically incorrect assumptions are replaced with others just as inaccurate and unrelia-

ble, argues Spencer Stuart. It is common now to hear companies being urged to take on what are typified as superior "female" management skills. The New Mythology sees the female management style as the most appropriate

₹ he late 1980s surge in Tokyo stock prices and corporate opportunity for Japanese women

Mariko Mitsui was leader of the largest opposition party, and strong career-minded women were fashionable advertising props. There was even debate about the introduction of a new fast-track for women in big companies.

female fortunes, however, have taken a tumble with the economic downturn - a change best illustrated by the fate of Mitsui, now an ex-member of the Social Democratic Party. A couple of years ago she represented a new era, but is now a symbol of the enduring discrimination against women.

and effective in the modern corpora-tion - less hierarchical than the male, more intuitive and open to change, more participative and, above all, more likely to encourage employees at every level to flourish.

Where exactly do these new sterectypes come from, given that almost anybody who has experi-enced a range of female managers at work will easily be able to pic-ture at least one who will pull rank and bark orders along with the worst of her male colleagues?

everly Alimo-Metcalfe, senior Blecturer in organisational psychology at the University of Leeds, is one strong advocate of what are seen as essentially female management skills. She acknowledges the dangers of making new stereotypes but believes that "the most successful styles of leadership are more closely associated with women than men".

She points to research by Judy Rosener, carried out at the University of California and published in the Harvard Business Review. This suggested women were more likely to employ what is called in the jargon a "transformational" style of leadership; the men were more likely to be "transactional" leaders.

The difference between the two styles, as reported by Rosener, is supposedly this: "transactional" leaders see job performance as a series of transactions with subordi-

nates; they exchange rewards for services rendered or punishment for inadequate performance. "Transformational" leaders get subordinates to transform their own self-interest into the interest of the group. They are more likely to use charisma, interpersonal skills and personal contacts to get what they want; transactionals are more likely to

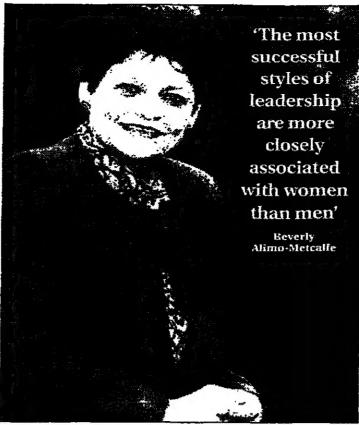

use their status in the organisation.

Alimo-Metcalfe also points to US case studies of organisations that had been in trouble but were then revitalised, where a common ingredient was the presence of a transfor-mational leader. Her worry is that companies are failing to recruit and promote transformational leaders. sessment centres run tests with a built-in bias in favour of the transactional style and therefore discriminate against women, she says. One flaw in Rosener's research, according to Cynthia Fuchs

Epstein, New York City University professor, is that men and women were not observed at work, but were asked, instead, to describe their own management styles. Fuchs Epstein quotes the example

from her own research on women attorneys of the "lawyer who described her style as 'caring' but who was characterised as a barracuda by a male associate". George Bain, principal of the Lon-

don Business School, has himself been a participant in a controlled experiment aimed at identifying dif-

ferences between male and female management styles. Commissioned by the now-defunct Business maga zine, the battery of tests conducted on a (self-selected) group of male and female managers led to the conclusion that "men and women executives have more talents in common than most people imagine," but also threw up significant differences: women paid more attention to detail and men were more competitive; perhaps more surprisingly, given The New Mythology, women were found to be less democratic.

manages and another man manages than there are between men and women as groups," he says. Even overwhelming empirical evidence would leave him suspicious. "I would want to know if any differences in the way women manage were as a result of innate qualities or had developed because of the roles reserved for them," says Bain.

managers. There are greater differ-

ences between the way one man

ment, a leading retailer famous for its women managers. If a client comes and the secretary is unavailable, a women rather than a man is required to make and serve tea.

Recruit also found that only 23.3 per cent of companies interviewed offered management opportunities for women. Corporate managers blame female employees' failure to justify the costs of training.

The low figure indicates the barrier may have more to do with unchanging attitudes towards professional women. Mitsui says of Japanese men: "They're just not brought up to think that women can be partners or rivals."

Headhunters lead business down road to academe

Andrew Adonis on the newest recruits to British universities

new breed is stalking the top branches of British higher education: the headhunted vice-chancellor. Professor Gerald Bernbaum. registrar of Leicester University. appointed today to succeed Baroness Pauline Perry as vice-chancellor of the new South Bank University, is among the

It was Saxton Bampfylde, the executive recruitment agency, that attracted him south, and made him only the second head of a "new" university (former polytechnic) to hail from one of the "old" variety.

"I knew the job was up, but definitely wouldn't have applied without Saxton Bampfylde," said Bernbaum, 56, who has spent the last six years masterminding Leicester's rapid expansion in student numbers.

It was not fear of stepping into Baroness Perry's capacious shoes: still less ignorance of the polytechnic sector. "I simply would not have thought it was the job for me; and without Saxton, there would have been no guarantee of speed and

secrecy."

Bernbaum sets particular store by the latter. "I had to have confidentiality until a very late stage to protect my position at Leicester, you simply don't get that by replying to a newspaper ad." All his discussions were with Saxton until a late stage; it took only a few weeks from then to the appointment.

As with most recruitment agencies, Saxton Bampfylde's bread and butter still comes from the City. But it sees education and the public sector as a growing business. The new head of the Office for Standards in Education, Professor Stewart Sutherland. is its most prominent catch. It has also been in on the selection of two heads of Oxford colleges, and it is pitching for other posts at vice-chancellor level. Saxton's services do not come cheap - around a third of the

the new universities have shown vice-chancellors, despite the depressed state of academic pay generally. Nearly-three-figure salaries are now not uncommon. A more serious obstacle appears to be the cultural divide. Though

headhunters have sometimes made a difference to the individual appointed, none of the universities or Oxbridge colleges employing them has yet gone for a type of person they would not have chosen on their own. "It would have been too much of a leap in the dark to do otherwise and difficult to sell to colleagues," says an academic close to one such appointment.

All, however, is not bleak for the bored banker. Saxton Bampfylde has just been retained to find a new director general for the Royal Horticultural Society. £60,000 a year; car and benefits; interest in flowers desirable.

But Bain is sceptical. "I don't think there are systematic differ-Inequality rules in Japan

Although as a member of the Tokyo Metropolitan Assembly, Mitsui set up the city's sexual harassment complaints office and stopped the metropolitan government from financially supporting beauty contests, she was criticised by male party members for her feminist views, and has even been a target for sexual harassment by a fellow council member.

"I thought the Social Democratic Party would have a liberal atmosphere, but it was just another male hierarchy," said Mitsui after resigning last month.

Most Japanese companies claim that women employees, on the same career track as men, receive equal opportunities. But one reason to doubt their commitment is recent evidence that they are becoming less willing to hire female graduates. Another is the small impact of the "sogoshoku" – a career track launched by imagesame promotion chances as men.

conscious companies in 1986 which was supposed to give women the In practice, however, in addition

to the rigid corporate hierarchy,

female employees find that they are

bound by the unspoken cuitural roles required of Japanese women.

A study of office practices in 1,700 companies by Recruit Research indicated that 87.6 per cent had female employees serving tea to colleagues, 70.5 per cent made female employees wipe the office desks, while only 33.4 per cent allowed women into policymaking meetings and discussions. "Of course the basic ideal is for

men and women to be equal, but social roles are different, and this affects daily office work as well," says a manager at Seibu Depart-

The LR.O. reserves the right to deny the Offering Memorandum to persons who do not fulfill the above requirements.

All the data contained in the Offering Memorandum are indicative and aimed only at provising information. They are conditional on confinencial on but indicated an examination by interested parties while checking the company and cannot establish any limbility on the part of the LR.O. as to their accuracy

Identiality Agreement - Draft Agreement - Checking the Company. Confidentiality Agreement - Braft Agreement - Checking the Company.

On receiving the Offering Memorandum, the recipient will be obliged to sign a Confidentiality Agreement with respect to the data is contains. The LR.C. reserves the right to hand over, also, to each recipient of the Memorandum, a Draft Agreement for the sale of the shares and set the time and procedure for negotiating its terms with each potential buyer before the submission of binding offers, Each potential buyer receiving the Offering Memorandum within the above time limits will be entitled to check the company's data. The time, which will not exceed 2 drys, the dates and the remaining checking procedure will be specified by the LR.C. on the basis of the date of submission of the binding offers, the number of interested parties and the priority in acceiving the Offering Memorandum. Potential buyers who will sak for and obtain the Offering Memorandum beyond the time limit and on their own responsibility, will be treated and facilitated in the time left without any discrimination towards them, resulting solely from their own fault in receiving the Memorandum at a lase date, being possibly construct as unerced treatment.

Submission of Binding Offices - Unscaling,
Binding offices must be submitted at the latest by 1300 last on Thursday, 25th February 1993 at the offices of the LR.O. at the address mentioned above, in actum for accept. Offices which have not been handed in personally but next in any other manner (by post, etc) will be

The offices will be unscaled on Thursday, 25th February 1993 at 1500 hm at the offices of the LR.O. The unscaling may be attended by anyone who has legally submitted a binding office or by his legally authorised representative as described above. The offices will be unscaled, checked with regard to formality (letter of guarantees, composition, etc.) will be entered and will be attached to a special report on the massaling which will be signed by those present. A copy of this report will be given to each person who has legally submitted an office. Copies of the offices will not be released until the end of the section for the highest bid.

avenues.— Acquirection.

Offices set topic by the LR.O. and are evaluated at its discretion. The Board of Directors of the LR.O. will make the final decision as to the acceptance (adjudication) of an office, or its rejection, within two months of its submission, i.e. up to 26th April 1993, Recalls, modifications, improvements etc of offices up to the final decision of the LR.O. to adjudicate or the reject, and counter-offers are not acceptable and will not

CONTENT OF THE OFFER
Offers must be submitted within a scaled envelope entitled "BINDING OFFER FOR THE PURCHASE OF THE SHARES OF AZINCO S.A.". They must be written and signed and must not have crassress deletions or insertions will not be considered. Offers submitted in any other manner (e.g. by telegram, trice, fin, etc.) unsigned, or bearing crasures, deletions or insertions will not be considered. The offers must refer to the total of the shares for sale (52,617) and if this is not specifically mentioned or wrongly indicated it will be taken as referring to the near to me total of the shares for sale (52,617) and if this is not specifically mentioned or wrongly indicated it will be taken as referring to the total of the shares for sale (52,617) and if this is not specifically mentioned or wrongly indicated it will be taken as referring to the total (52,617). They will contain a price expressed in drackmast. They will specify the manner of payment and, if payment is to be made of the whole appoint or in lentalments, will specify the exact dates of payment, without interest or with interest (and in this case at what rate), of each instalment and the guarantee provided for payment of these instalments. It should be noted in this respect that in evaluating such offers, their convention to current value will be calculated at 22%. Any terms contained in the offers shall be absolutely clear and specific on pain of giving right to the LR.O. at its discretion, to go as far as rejecting the offers.

The offer must include data on the identity and activity of the hidder, while a description of a business plan and the hindingness thereof, will

The distration of the offers must be at least two months (i.e. up to 26,4.93).

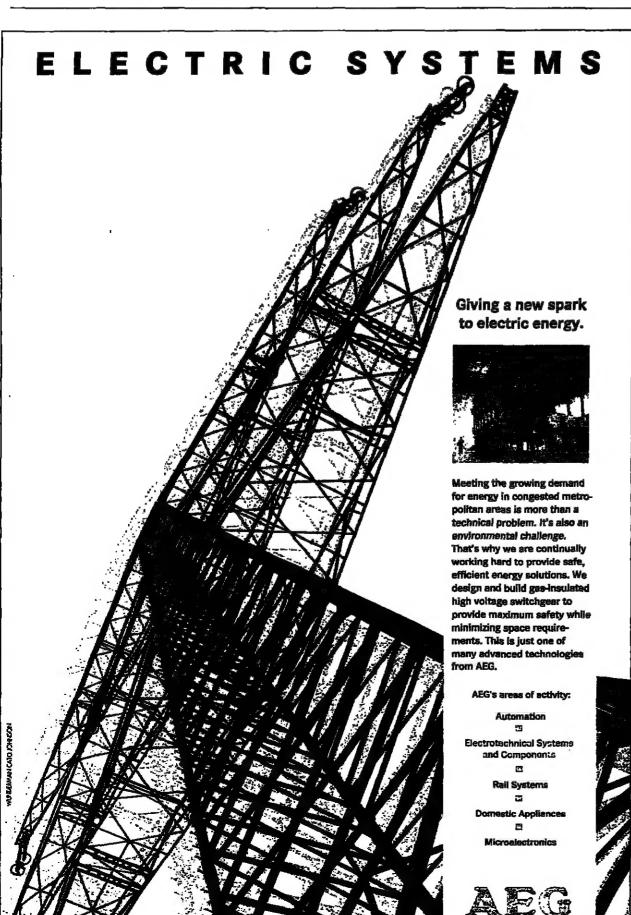

The offer must be accompanied by a letter of guarantee from a bank legally operating in Greece for Drs. 40,000,000. The I.R.O., on delivery of the Offering Memorandum will provide a draft of this letter of guarantee which must be adhered to. Offers unaccompanied by a letter of guarantee, or accompanied by a letter of guarantee which, in the I.R.O.'s opinion as unsatisfactory, will not be considered.

D. OTHER TERMS. L. The present in not a proposal for drawing up an agreement but an invitation to submit an offer. The LR.O. retains the right to caucal or posspone the auction at its discretion, to supplement or clarify or modify the terms of the present announcement and in general act within the framework of article 199 of the Civil Cude and Law 200k91, bound only by the decisions interministerial Committee for Denationalisation.

All the expenses concerning or related to the transfer of the shares and the participation in general and execution of the present procedure shall be home by the buyer and each of the participants accordingly. The participation of each of the potential buyers in the present auction presupposes the full and unequivocal acceptance of the

The Banker, Subscriptions Department, Central House. 27 Park Street, Croydon CRO 1YD, UK

etiver, a coarse tropical grass, is the most practical solution to the global prob-lem of soil erosion, which destroys millions of hectares of farmland every year, the US National Research Council said last week.

That conclusion vindicates a cam paign by a small group of agricul-turalists in the World Bank's Asia division, who have been extolling the virtues of vetiver for more than 10 years, in face of widespread sci-

Vetiver, a native of India, is best known for the fragrance extracted from its roots for use in scaps and perfumes. But, according to the NRC, a hedge of vetiver planted across a hillside makes a superb "botanical dam" that can hold soil in place and withstand the run-off from torrential downpours over a period of decades. Its roots go more than two metres into the ground and the tough hlade-like leaves grow two metres high.

One advantage of vetiver is that the grass exists in sterile forms which stay in place for decades without spreading. In contrast, some other plants used to curb erosion have rampaged out of control. Although vetiver's native habitat is hot and humid, the plant is astonishingly adaptable, says the NRC. It has performed well in poor soils in dry countries and has even withstood frost in the southern US and Chine. But the NRC calls for more research to breed varieties

"I was sceptical at first," says Norman Borlaug - winner of a Nobel Price for his contribution to the "green revolution" - who chaired the NBC investigation of vetiver. "But I've seen vetiver at work. And I know that in these times of great ecological concern about what is happening to our soil because of erosion, vetiver could indeed play a very useful role in many places."

The NRC calls for vetiver to be put into widespread use without delay. Field trials should test a variety of new applications, including protecting roads and railways from flooding and landslides. The grass is already being planted in the Philippines to help re-stabilise roads destroyed by the 1990 earth-

own at the low-technology end of manufactur-ing, even the humblest products are caught up in the greening of industry.

Pressure to clean up the air is forcing a striking change in tradi-tional methods where solvents are used; that includes such mundane activities as the manufacture of bottle tops and shoe soles. This is the esult of an international attempt, ed by the United Nations, to reduce volatile organic compounds in the

air over Europe.

VOCs are the vapours given off
by a range of chemicals used in industry, such as solvents, and contained in consumer products, such as house paint and petrol.

The compounds collect in the atmosphere and react with sunlight to form photochemical smog and low-level ozone. These smogs irri-tate the breathing system and can be particularly harmful to the health of young children, the elderly, those with hreathing complaints and people who exercise outdoors. Some VOCs are implicated in global warming. Western European countries have

signed a UN treaty to reduce VOC emissions to two thirds of 1968 levels by 1999. Each government is responsible for devising plans to meet the target Also, the RC is working on legislation to force cer-tain sectors like the petrochemical and oil industries to make hig cuts in VOC emissions before the end of the decade. UK law already controls emissions from industrial printers and other users of ink.

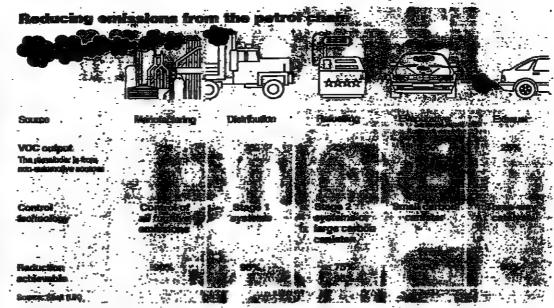

Besides these official pressures there are growing demands from retailers and business buyers for products that do not pollute. But some industries complain that the cost of compliance is too high, while others argue over who should take responsibility for emissions.

However, the same pressures are a spur to innovation, creating lucrative opportunities for those who can develop traditional products, such as glues, paints and inks, that do not emit VOCs.

"Probably the whole drive behind all of the research in the market for car paint is geared towards reducing VOCs," says Bob McGuines European marketing director for automotive paints at ICL

The European market for equip ment that controls VOCs is set to double to \$652m (\$430m) a year by and Sullivan - and this figure is purely for devices that can be boilted on to existing processes; it does not include alternatives such as solvent-free inks and paints.

It is these substitutes that are going to help hard-pressed smaller like the shoe maker and Clive Cookson bottle top manufacturer, which do not have the capital to invest in

VOCs are the latest airborne villains and their control means costs but also opportunities, says Peter Knight

Smothering the vapours

equipment that catches VOCs

before they escape to the air.

There is a hig opportunity for makers of water-based lake because they take the trouble out of controlling VOCs," says Jan Vernon of con-sultants KPMG. "They solve many health and environmental problems and remove the need for costly monitoring and control systems. For many companies, these inks

Vapour recovery devices would capture about three quarters of the VOCs emitted when motorists fill up

will be the only affordable option." The European oil industry is particularly hard hit by BC demands to reduce vapours that evaporate during the making, storage and distri-bution of fuels. "The first stage of controls will require industry to invest \$2bn by early next century," says Kiaus Kohlhase, BP's head of If the proposed second stage is now under discussion - is carried out, the industry will have to spend-

a further \$1hn installing vapour recovery units at service stations.

These devices catch emitted vapours when motorists fill their tanks. But because the petrol pump attachments are expensive and not sarily the most efficient solution, the oil industry wants car makers to fit carbon canisters to petrol tanks.

recovery devices on the forecourt would capture about three quarters of the VOCs emitted when motor-ists fill up, while cantities would collect more than 96 per cent. The carbon is regenerated when capngine and burnt

The car industry does not want to fit these consisters because of the cost. And the EC does not favour the solution become it would take too long - about 10 years before all cars were fitted.

The oil industry argues that its operations contribute only small amounts to industry's overall VOC lems with finds arise when vehicles are used, through unburnt fuel in exhaust fumes and evaporation from petrol tanks and fuel lines.

But the oil industry is looking seriously at ways to prevent vapours from escaping during distribution. RP researchers have produced one of the more innovative solutions by adapting the idea of the wine box.

A collapsible plastic bag is placed

inside storage tanks and road tank-ers. The fael is sealed in the bag and is never exposed to the air atany stage during distribution. Trials have been promising, but the tech-milogy is expensive and BP has not decided yet how it will be used. Although technologies designed to prevent evaporation help save a potentially valuable product, the benefits for oil companies are few and the costs high. It is clear that all companies will have to find affordable solutions to the problem of VOCs because the pressures from both regulators and the market look set to increase. "No one will be able to escape the pressures to control VOC emissions," says Vernon.

Filthy fuels foot the bill

By Bronwen Maddox

Leen hoth contested in the debate on the fiture of the UK coal industry. But putting numbers on the environmental damage done by each fuel type to clarify that debate is nothically difficult. In the US many states have been forced to do just that by two decades of ambitious environmental legislation: frequently they force utilities to include environmental costs in their applications for new energy contracts. A consultancy report* for the European Commission analysing the US experience concludes that environmental costs add between 50 per cent and 100 per cent to the con-ventional "economic" costs of gen-erating electricity.

The report, prepared by the Association for the Conservation of Energy, says that US 32 states "have taken some action to account for environmental exter-nalities" - the costs normally "external" to the electricity market's prices. But the methods used to put money values on environ-mental damage vary widely — as do the values themselves. Most methods avoid "damage

esament" - putting a figure directly on environmental and health damage from pollution. That approach runs into difficulty over the treatment of different probabilities of damage - how, for example, to deal with the uncertainty over whether carbon dioxide emissions are causing global warming or not.

Instead, most measure "control costs" - the extra costs imposed by legislation — and assume that the money value of environmental damage is greater, or the law would not have been passed. This makes the figures easy to find, but the report comments that it assumes unrealistically that legislators accurately estimated environmental damage.

One study by the Tellus Insti-tute, a US think-tank quoted by the EC report, says US power plants face costs between 47 per cent and 103 per cent higher than older plants because of new legislation. The conventionally-measured cost of generating power with "new coal" - stations equipped with filters for nitrogen and sulphur oxides - is about

The "greenness," of one kind of fuel over another has been holy contested in the adds 4 cants. or 47 ner cant The conventional cost of gener

ating with existing coal, about 8.9 c/KWh, rises with environmental costs to 14 cents, 104 per cent higher. Oil emerges as the "cheap-est" on this basis, with conventional costs of 6.9 c/KWh and total costs of 11.7 c/KWh.

That estimate emphasises the difficulty of international compari-son: a similar "provisional" study of UK environmental costs pub-lished by the Department of Trade and Industry in December had oil as the "dirtiest".

The report found too that there was wide variation at state and even district level. California, which has some of the most strin-gent environmental legislation in the US, has "different externality values across the state" because air pollution rules are set at regional level.

Environmental costs of building

"new coal" plants in California were around 6.7 c/KWh, the report says, more than ten times those given by the Bonneville Power Administration, the federal agency in charge of power for five rilwestern states.

This is because BPA calculations are based on the alternative damage cost" approach and exclude estimates of the damage caused to the almosphere by carbon dioxide emissions. The BPA felt it would be "premature" to judge whether global warming

In a different attempt to address that uncertainty, New York state directed that planning applica-tions should not set costs of controlling carbon dioxide emissions at more than 20 per cent of a lowcost technology such as tree plant-ing. As a result, it has some of the lowest figures for "new coal" externalities: only 1.4 c/KWh.

Despite the shortcomings of these estimates, the report con-cludes that the attempts reduce the risk that future electricity customers will be hit suddenly by the

costs of cleaning up.

PEOPLE

Broughton becomes BAT's heir apparent

history, BAT Industries, the tobacco and financial services group, is to split the roles of chalman and chief executive.

Martin Broughton; 45, the
non-smoking head of the financial services division, has been

appointed group chief executive and deputy chairman. He will be accountable to Sir Patrick Sheehy, chairman, for the management of the group's operations and the development of business and Bruncial

strategy. Sir Patrick, 62, who has held both posts since 1982, says: "Dividing the roles of chairman and chief executive is very much a new and untried development. The board will review its appropriateness in two or three years' time when I intend to retire."

Broughton, who takes up his new post on April 1, was the City's tip to succeed Sir Patrick and the appointment was welcomed yesterday. Said one: "It is an evolutionary move, maintaining the commitment to the core businesses." Broughton confirms that there would be no change of direc-tion. "Both tobacco and finan-

cial services are now growth businesses. There are lots of opportunities to be seized." Broughton joined BAT in 1971, shortly after qualifying as a chartered accountant, and spent the next three years working in four continents as a travelling auditor for its tobacco operations.

He held a variety of financial positions before moving to Soura Cruz, the Brazilian tobacco subsidiary, in 1980,

1984. A year later he transferred to the group's insurance business as first finance direc-1988 to join BAT Industries main hoard as finance director before the impurance hundress

icy committee, the board's key executive body, in January 1990, assumed responsibility for group personnel six months later, and before the end of the year was appointed senior

Eight months ago, he was appointed group managing director, financial services, and chairman of Eagle Star. Broughton has been a mem-

ber of the CBI's economic affairs committee, and of the urgent issues task force of the Accounting Standards Board,

He will head an executive management team whose other managing director of the tobacco operations, and David Allvey, group finance director.

Ian Thornley who retired at the end of January. Mather has been with Shell for 24 years, working for the company in Brunel, Gabon and South Africa. His provious position was general manager of human resources and public affairs for Shell UK's down-

sibility for personnel and administration. He succeeds

As one of his make Mather lans to build on Shell's solid foundation on equal opportu-nities; he is also the only male commissioner on the Equal Opportunities Commission. "It's important to find and develop top talent, particu-larly making sure we get our share of women," he says. "We have an envisible framework of policies in place and are working hard at changing attitudes across the organisation, but it will take a number of years to

confess to having initially felt sceptical about *The Ark* (BBC 2, Tuesday), Molly Dineen's four-part documentary of which the final episode will be screened next week. Even as a neighbour, the Zoo's fate had left me fairly cold beyond wondering in an idle way how much longer I will be able to watch gratis, from the canal path, the crazy gallops of the Arabian oryxes,

It seemed that the elephant-traps were baited for any film-maker embarking on a documentary about the Zoo which has been staring down the barrel of a gun for two decades. Its imminent closure has generated a huge amount of press coverage right up to the eleventh hour, which is where the Zoo cur-rently is. What could a necessarily out-of-date film about the zoo's travail possibly achieve?

I have been confounded: The Ark has turned out to be a splendid example of documentary making at its most subtle and rigorously controlled. The dramatic pace is fierce, starting with the opening minutes showing the miserable anxiety of keepers, one third of whom faced the sack, to next week's final programme which will cover the inconclusive putsch of spring 1992. Not one trap has Ms Dineen fallen into. Few things lend themselves more to kitsch than shots of apparently mournful orang-utangs gazing round well-loved premises soon to be vacated for ever . . . And yet, the animals are kept on a tight leash and never allowed to steal the show, either from the human denizens of Regent's Park or from each

Last night's episode focussed on the arrival of two new Glant Pandas. After a brief shot of the male panda tumbling winsomely about, we were back with the meat of the matter, what the zoo-people thought. To the marketing people, the giant pandas are a mini-boom to be milked for soft-drink promotions and for the momentary upturn in gate-money. To the young keeper in charge of invertebrates, a mission to breed the last members of a tiny species of snail is no less valid than the sentimentalised conjunctions of

As London Zoo's Director David lones negotiates between the German and Chinese authorities as to what should be done with any progeny of the happy couple, the Young Turks give their views. They see the brouhaha over pandas is merely another example of the world-wide hype and hypocrisy about saving species. "The panda is a political football"; breeding pandas, we were told, is not in fact difficult if only governments would agree to pool

their pandas. The Ark is, of course, a metaphor for Britain in the last 20 years, with the pandas rather neatly playing the role of the marriage of Charles and Di. Meanwhile, rot eats deep

The Theatre Royal in Stratford East

must be the friendliest theatre in

London. Many of its performances

go straight back to the comedy

shows like Take It From Here that

used to give such universal pleasure

on the old BBC Radio: full of silly

jokes, some of which are very

Worlds Apart, the new work by

the theatre's resident writer Paul

Sirett, is far too good-natured to be

much of a satire and too loosely

structured to be much of a play, but

it would be difficult not to enjoy it.

As the genesis of a television series

it would probably run for years, for

there is no limit to what the immi-

gration officers at London's Heath-

lleathrow is where the piece is

set, or more precisely the SEA,

which stands for the secondary

examination area. British immigra-

tion officials are the "last blue line after us, Armageddon!" They are

there to stop foreigners getting in,

particularly if they are anything

other than white and most of all if

they use the dreaded words "politi-

cal asylum". Any bureaucratic

excuse will do to send them back.

row airport might get up to.

Keeper Brian Harman and elephants in "The Ark'

Television/Patricia Morison

Monkey business at the zoo

into the bowels of the Mappin Terraces and the aquarium. At the end of last night's programme, a group of academic Fellows of the Zoological Society (which legally owns the animals) has formed a secret com-pact with the more intellectual keepers. Their aim is to throw out the management team and detail its painfully-implemented survival package for the Ark.

The irony of course is that these very keepers were the ones we saw in the first programme successfully reapplying for their jobs and for promotion because they were pre-sentable, ambitious types, the kind of people who ought to relish being 'empowered" by running their own budgets. Next week's final episode sees the trap being spring and the sympathetic Director failing to ride the tiger. For all that, of course the Ark has continued to drift but after Dineen's excellent series, who could remain wholly indifferent to its

Horizon; No Ordinary Genius (BBC 1, Monday) was a straight-forward exercise in hagiography, yet none the worse for that. Scientists know about the physicist Richard Feynman, who died in Los Angeles in 1988. They know about him partly for his achievements over an extraordinary breadth of fields, but partly too because of his whacky cter. For many non-scientists.

The piece is quite clever about this. The word "colour" is never

mentioned by the immigration authorities: the law is against dis-

crimination of this kind. Still, the

old prejudice lingers on. Those held

up for examination in the SEA

include a black American air force

man coming for a weekend from

Wiesbaden, a successful East Afri-can Asian who has long been a Brit-

ish citizen and was once voted

young businessman of the year, a

pregnant woman from Zaire coming

to see her husband, a not very

white looking Spanish dancer arriv-

ing for an international competi-

tion, and a Tibetan artist trying to

get away from Chinese persecution

by having stowed away on a freight

plane from Angola.
Only the Tibetan is a genuine

candidate for asylum. The authori-

ties respond by saying that he can

stay if, in effect, he agrees to spy on

other Asian immigrants.

however, the name Feynman meant little beyond, perhaps, recalling that he was a Nobel prize-winner. At first it seemed a little over the

top to devote two programmes to Feynman, but not by the time the time it reached the point where he was taking on NASA as the outsider, the loose cannon, on the Challenger Inquiry. At this time, Feynman was already seriously ill with the cancer which eventually killed him at the age of 69. We could have heard a little more about the zaniness of this free spirit, his infinite thirst for horse-play which is part of

the scientific legend. However, the programme's real strength was the reminiscences of Feynman's scientist colleagues, quietly spoken men through whose words we got not only a vivid impression of the tireless genius of the man they admired, but also of the compulsion, even the sheer aesthetic pleasure, which drives the best scientists in their quest for understanding of the universe.

"Enough was enough. Armed force was out. Marxist agitation was in." Timewatch, BBC 2's fortnightly history programme, last week dealt with the origins of the Provisional IRA. It aimed to be dramatic. Staccato commentary, to convey the drama. Not many dates. The result was banal. Like a tabloid newspa-

that the main conflicts take place

more between the detainees them-

selves than with the authorities.

The East African Asian, who has

become more English than the

English, takes a particular dislike to

the black American. The latter

tion is not only gay; he is Welsh.

Britain, regardless of colour.

Theatre/Malcolm Rutherford

Worlds Apart

Pity really. The Sparks That Lit the Bonfire ought to have been a cracker, with notable interviews with leading Irish politicians in power at the end of the 'sixties, members of the Republic's armed forces who brought the guns and money into Ulster, and the men who watched the IRA split. As it was, the commentary was unbearably vague and silly, and matters were not helped by interventions from a terrible folk-singer. "History took a fatal turn." Quite so, but let us hope the same is not now henceforth true of the Timewatch series.

Lack of editorial rigour seriously undermined BBC 2's lavish and long series, The Trouble with Medicine (Thursdays). Each programme strays hither and you in its travels around the developed world. What should be a polemical inquiry into whether high-technology medicine regularly loses its way. This week The Magic Bullet was as prone to side-tracking as the rest. Fairly irrelevant to the grand theme were the Spanish herbalists frustrated by the law in their efforts to peddle concoctions of leaves. Ludicrously so was the encounter session, or some such gathering, of middleclass American women who we saw weeping (literally) over the sins of the big, nasty drug industry. What a very damp squib to job at the

Madhay Sharma, passes the cricket test. On Monday he commiserated with the English over the dreadful collapse before the Indians in Calcutta: then he took a swipe at the

Pakistanis.

The Spanish dancer has had planted on her some photographs to be delivered to a tabloid newspaper. Only the East African Asian recognises who is being exposed and wonders what the Conservative Party is coming to. Like his detention at the airport, he says it would never have buppened under Mar-

garet Thatcher. Some of the jokes are low. One of the women in the immigration service left the police force because of sexual harassment. "God, they must have been desperate," says one of the men. It is old radio comedy brought up-to-date and made multiethnic, though still broadly unilingual. Jeff Teare directs and while Strett could take his talents to television there is huge pleasure in seeing Worlds Apart on stage with a live script and a lively audience.

Opera/David Murray

'Gomorra' in Vienna

r. Vienna as Gomorrah, in H.K. Gruber's new "musical show" at the Volksoper. Not that the local elbow-digs in Richard Bletschacher's libretto matter much; for this Gomorra ("h"-less in German) might be any tidy, prosperous, enlightened Western capital, and the fire and flood which destroy it are no divine punishment, Old Testament style, but natural civic developments - set by Gruber to infernally buoyant music.

The fable is too transparent to need commentary. Gomorra, a liberal city-state with all modern comforts, is being visited by a representative of Higher Authority. As his tour of inspection begins, a Pre-senter proudly catalogues the innumerable fine things that Gomorrans own and cherish, and above all their great volunteer Fire Brigade, entrusted with preserving order and calm. (Distant cries from dissident Pyromaniacs are heard but ignored.) The climax of the visit is to be a grand ball, for which the local paper, "Public Opinion", wants an appealing Princess to choose the lottery-winner.

A freelance reporter and a photographer, Augustin and Flitzer, are sent to find one in the overloaded asylum for Endangered Existences (the homeless, the work-shy, dreamers, artists and musicians), a luxurious health-farm. They find Gwendolyn, a Gastarbeiterin from the North. She and Augustin fall into an irrelevant mutual rapture. In due course, transformed into a fashion victim by the newspaper, Gwen-dolyn takes the stand at the ball; but first Valentina, Augustin's recent paramour and daughter of the Chief Editor, makes a bitter, rebellious scene - and then the Pyromaniacs strike with fire at every corner of the city.

in Act 2, the warring popular forces take the foreground while the individual characters recede. The

Pyromaniacs, who profess no creed but a vague sentiment for getting back to the land (wildly unrealistic, in the circumstances), exult in the city-wide holocaust; the Fire Brigade retreats underground to open the sluice-gates of the sewers, thus extinguishing the blaze but unfortunately drowning almost everybody in the flood. The Higher Authority man makes a suave departure by spaceship, without uttering a word of judgment, and Augustin and Gwendolyn - raptly impervious to everything - float away in a rubber dinghy to nowhere in particular. Gruber's music underlines no

This 'dispassionate music of merciless elegance' is aimed deliberately at young, pop-orientated ears

moral, though his huge, swinging

"underwater can-can" finale for the waterlogged citizens betrays a grimly apocalyptic gloat. Gomorra, his longest work so far, pursues his disarmingly original, post-modern-ist vein less than an equally impassioned one: "dispassionate music of merciless elegance", aimed deliberately at young, pop-oriented ears.

The love duets - and Augustin's subversive paean to cigarette smoking, punctuated by satisfied smoke-rings – rejoice in lazy, sexy synco-pations. The bass-lines rock overbearingly (Gruber made a notable career as a double bass); odd taped sounds are enlisted, and live swanee-whistles, and at the end massed harmonicas in serene chords. Before that there are music-boxes in chorus, and a long unison-strings plea, expressly "reminiscent of Mahler or Berg" (as it certainly is, but also of Schoenberg's Moses in his last despairing cry: "O word that I

lack!") broken by hostile bangs on empty petrol cans.

Upon its neo-Broadway, neo-Weill grounds, Gruber's score developed astringently and gorgeously. Among the Volksoper principals, Ildiko Raimondi's Gwendolyn and Hans Helm's Fire Chief deliver their roles with nicely expert wryness. Josef Luftensteiner's Augustin, properly droopy-eyed, sounds like an operetta-artiste where a plaintive pop-voice would suit better. The enthusiastic Valentina, Flitzer and pyromaniac Hilarius of Karln Goltz, Josef Fortner and Adolf Dallapozza are too much out of raw stock. Clasped (even rehearsed) within an overall frame, they do their nut but

fail to wring our withers. Some blame must be attached to the British producer Mike Fields. Up to a point, his vaudeville moppings and mowings for the mul-tiple chorus were silly/funny enough; but Act 2, where the music expands to full-throated communal scale, looked far too bitty - it did not begin to match the elegance nor the exuberant menace of the score. Nor did the Volksoper chorus rise to the scathing precision of their music; they were indifferently co-or-dinated and scatterbrained.

Perhaps their focus was blunted by politeness. The Volksoper's Sunday matinees are evidently populated by aged regulars, many of whom soon hobbled out in dudgeon, or at least stuck fingers in offended ears, as the (admittedly very loud) native ritual proceeded. The "Greisenlied" chorus of twitching wrinklies - "We know all that, including so-called 'love'!" dampened reception. All the same, Gomorra invites and deserves a production that will give full, various values to its crowd-content, which is popular as could be.

Dance/Clement Crisp

CandoCo and NDT3

ideas about the limitations we impose upon performance -through age or disability - were challenged in a double bill marking the opening of the Spring Loaded free dance festival on Monday at the Queen Elizabeth Hall. CandoCo is a group of dancers, three of whose members are confined to wheelchairs, though not confined as per-formers. Nederlands Dans Theatre 3 is a quartet of professional dancers be supposed to be waning, if not waned. Its purpose is to show that there is performing life after 40, though in view of the repertory on view retirement might be considered a blessed relief.

NDT3's personnel for this visit were Martine van Hamel, Sabine Kupferberg, Niklas Ek, Gérard Lemaître. The two offerings were vexatious, and served with malign skill to make the dancers look foolish. Jiri Kylian's No Sleep till Dawn of Day featured the two women, a line of 18 wooden chairs, a luliaby from the Solomon Islands (a miserable four-note phrase) and witless fragments of activity that conveyed nothing so much as the fact that the performers could do much better if given the opportunity. Mats Ek's Journey (with two scores by Steve Reich; three painted, dull and ambulant flats), found Lemaitre as a railway porter, the others as travellers. Niklas Ek was more boyishly vivacious than his years should permit; Miss van Hamel wore an unforgiveable red jersey tube. The move-ment was minimal, tiresome, and, as far as I could discern, pointless. A programme note by Mr Kylian offered pietisms about the value of

CandoCo in action

mature dancers.It is a platitude that experience brings technical wisdom, stage mastery and that these are of incalculable value. Curious, then, that this repertory should so diminish the presence and skills of its performers. I thought it especially sad that Martine van Hamel, a distinguished and fascinating ballerina, should be seen in this galère. She and her companions deserve better. Many dancers have performed magnificently into their 50s without NDT3's special pleading. CandoCo avoids NDT3's mistakes.

It neither patronises its artists, nor makes them objects of a Poppy Day appeal for sympathy. We feel for the disabled members of the troupe. We recall Celeste Dandeker, a touch-

ingly elegant dancer with the London Contemporary company, who broke her neck during a performance of Stages 20 years ago. Confined to a wheel-chair since, she has found a way to continue as an interpretative artist: Darshan Singh Bhuller's haunting film, The Fall, revealed her as a still potent figure.

With the dancer and choreographer Adam Benjamin as director, CandoCo proposes a dance text - a corporate effort - which confronts ideas of mobility, of how we expect people to move and how they may learn to move. Wheel-chairs can be abandoned; the severely disabled can create vivid emotional and dynamic situations away from their chairs as well as in them. The able-bodied and the physically limited jointly prove that limits are there to be overcome. It is on these terms inspiring, brave.

As choreography the piece - Phying in the Face of ... - is uneven. Imagery feeds from the special circumstances of its casting, often powerfully: a dust for two men, one without legs, is astonishing both in its dynamic outlines and in its psychological resonances. Recause of the huge sincerity of the movement, we believe and accept its structural premises. I found, though, a lack of aesthetic purpose which a single choreographic decision should impose. If I have a hope for CandoCo it is that a major creator be invited to work with the group: its idealism and artistic bravery merit the very best collaborators.

The Spring Loaded festival continues with 30 companies in various theatres until April 10

INTERNATIONAL

BARCELONA

Gran Teatre del Liceu Tonight, Sat, next Tues. Paolo Olmi conducts Michael Hampe's Pesaro production of La gazza ladra, with a cast headed by Leontina Vaduva and Alberto Renaldi, Tomorrow' Gwyneth Jones song recital. Fri: Josep Pons conducts orchestral concert. Feb 15-27: Ballet de l'Opera de Paris (412 3532) Mercat de les Flors Tomorrow.

Fri. Sat. Sun: Angels Margarit in a solo dance work entitled Corol-La (318 8599) Palau de la Musica Fri and Sat evening. Sun morning: Franz-Paul Decker conducts Barcelena City Orchestra in works by Roger, Saint-Saens and Richard Strauss (268 1000)

■ COLOGNE

Philharmonia Tonight: Peter Schreier sings Die schone Mullerin Tomorrow Moscow Chamber Chorus Sun morning, Mon and Tues evening: Günter

Wand conducts Gürzenich Orchestra in symphonies by Schumann and Brahms. Sun evening: Alexander Lazarev conducts Duisburg Symphony Orchestra in works by Glazunov and Mahler, with violin soloist Frank Peter Zimmermann, Next Wed: American String Quartet. Feb 14: Joan Baez. Feb 17: Anne Sophie Mutter (2801) Opernhaus Tonight and Fri: Zar und Zimmermann. Feb 13, 17, 28: Lohengrin with Gary Lakes. Eva Johansson and Sergei Leiferkus (221 8400)

DRESDEN

Semperoper Tonight and Sun: La Cenerentola with Kathleen Kuhlmann. Tomorrow and Sun: Bartered Bride. Fri and Tues: Elektra. Mon: Liana Issakadze violin recital. The annual concerts on Feb 13 and 14 commemorating the wartime bombing of Dresden will be conducted this year by Colin Davis (484 2731) Kulturpalast Sat and Sun: Vassili Sinaiski conducts Dresden Philharmonic Orchestra in works by Grieg, Prokofiev and Bruckner, with cello soloist Mischa Maisky (486 6306)

■ FRANKFURT

HUSIC Alte Oper Tonight: Myra Melford Trio (jazz) Tomorrow: Anne Sofie von Otter song recital. Fri and Tues' Milva. Sat: Alfred Brendel plays Beethoven sonatas. Sun: Jonathan Nott conducts works by Berlioz, Bizet and Faure. Mon: Daniel Nazareth conducts MDR

Symphony Orchestra in works by Beethoven and Mahler, with piano soloist Nelson Goerner (1340 400)

Opernhaus Fri, Sun and next Wed: Jan Fabre's ballet The Sound of One Hand Clapping Sat: Carmen. Feb 13: revival of Britten's A Midsummer Night's Dream (236061) THEATRE

Schauspielhaus Tomorrow: quest

performance by Bernhard Minetti of his one-man show inspired by Grimms' Fairy Tales. Sun: late evening performance of John Hopkins' 1979 play Losing Time. Next Wed: first night of Anselm Weber's new production of Sophocles' Antigone (2123 7444) English Theater Kaiserstrasse Sandy Wilson's musical comedy The Boy Friend, daily except Mon till March 6 (2423 1620)

■ HAMBURG

Staatsoper Tonight and Sat: Neumeler production of Nutcracker. Fri: Edita Gruberova song recital. Sun: Eliahu Inbai conducts first night of John Dew's new production of Aida, with Maria Guleghina, Livia Budai, Michael Sylvester and Franz Grundheber (also Feb 11, 14, 17, 20, 25, 28). Tues: Ariadne auf Naxos, Next Wed: Turandot (351721)

LEIPZIG

Gewandhaus Tomorrow and Fri: Kurt Masur conducts Leipzig Gewandhaus Orchestra in works by Richard Strauss, Elgar, Thiele and Beethoven, with cello soioist

Robert Cohen. Sat afternoon (in Thomaskirche): Bach cantatas. Sat evening: Liane Issakadze violin recital. Sun: Edith Mathis sings opera arias with MDR Symphony Orchestra. Feb 11, 12: Nelson Freire (7132 280)

■ LYON

Michael Stern conducts Orchestre National de Lyon in works by Barber, Prokofley and Schumann tomorrow and Sat at Auditorium Maurice Ravel (also Fri at Annecy), with violin soloist Boris Belkin (7860 3713). Feb 10-14: William Christie conducts Les Indes Galantes (7828 0960)

■ MADRID

Teatro Lirico La Zarzuela Jenufa: David Parry conducts Mario Gas's production, sung in Czech with Spanish surtitles. Opens on Mon, further performances Feb 11, 15, 19, 23. Cast includes Natalia Romanova, Leonie Rysanek and Jan Blinkhof (429

Auditorio Nacional de Musica Tomorrow: I Solisti Aquilani play works by Vivaldi, Bach, Prokofiev and others. Fri, Sat, Sun: Antoni Ros Marba conducts Spanish National Orchestra in a Haydn programme, with cello soloist Antonio Meneses (337 0100)

■ MUNICH

Gastelg Tonight, tomorrow, Sat: Sergiu Celibidache conducts Munich Philharmonic Orchestra in a Wagner programme. Next Tues: Daniel Nazareth conducts MDR Symphony Orchestra In works by Beethoven and Mahler, with piano soloist Nelson Goerner (4809 8614) Cuvillies-Theater Tomorrow. Sat. Mon, Tues: Peter Schneider conducts Dieter Dorn's new production of Cosi fan tutte, with a cast including Amanda Roocroft and Manfred Hemm (221316) Prinzregententheater Sun morning, Mon and Tues: Pinchas Steinberg conducts Bavarian State Orchestra and Chorus in Elgar's Cello Concerto (Boris Pergamenshikov) and Holst's Planets Suite (221316) Gärtnerplatztheater Tomorrow, Sat, next Wed: Don Glovanni. Fri and Mon: Ariadne auf Naxos. Sun: ballet mixed bill. Tues: Eine Nacht in Venedig (201 6767)

■ NEW YORK THEATRE

 Anna Christie: Eugene O'Neill's soul-baring drama about failed life and love on the high seas, starring Liam Neeson as the drunken, lyrical suitor to Natasha Richardson's fallen Anna, with Rip Torn as her sad, sodden father. David Leveaux directs. Till Feb 28 (Roundabout Theatre, 1530 Broadway at 45th St, 869 8400)

 Someone Who'll Watch Over Me: American premiere of Frank McGuinness's drama about three men from the West who learn to overcome their differences while being held in a single cell in Beirut, Robin Lefevre directs a cast led by Alex McCowen (Booth Theatre, 222 West 45th St, 239 6200)

 Oleanna: David Mamet takes on political correctness, sexual harassment and a number of other isms in this brief, powerful drama that stirs up ideologues (Orpheum Theatre, 126 Second Ave between Seventh and Eighth

Streets, 307 4100) Remembrance: Graham Reid's melancholy love story involving a Catholic and Protestant in contemporary Belfast (John Houseman Theatre, 450 West 42nd St. 967 9077) The Last Yankee: Arthur Miller's comic drama about two couples who meet in a mental hospital and try to make their marriages work. Till Feb 28 (City Center Stage II, 131 West 55th St between Sixth and Seventh Avenues, 581 1212)

ROME

Teatro Olimpico Tomorrow: Emerson Quartet plays works by Mozart, Berg and Webern. Next Thurs: Russian pianist Anatol Ugorski (323 4890) Teatro dell'Opera Fri: La bohème. Mon: Alfredo Kraus song recital. Tues: first night of Bizet's Pearl Fishers, conducted by Michel Plasson, in repertory tili Feb 26 (481 7003)

■STRASBOURG

Théâtre Municipal Tonight: first night of Bertrand Sauvat's new production of L'elisir d'amore, with Constance Hauman as Adina and Alessandro Safina as Nemorino. Repeated on Frl, Sun afternoon, next Tues and Fri (8875 4823)

From where he stood, leaning against the cornice of the bay window, the prime minister some of the banners as the parade passed

up Whitehall: "Stop fascism now"; "Hands off Listonia"; Today Listonia, tomorrow

Wearily he turned to face the room where his colleagues were awaiting a decision they knew only he could take. Foreign policy was, after all, Doug-It was the reputation he had built up as foreign secretary. steering British interests through the rocks and whirlpools of the "new disorder", that had made him the obvious choice to lead the national government formed after the UK economy collapsed in 1994.

It quickly became clear that Hurd was the only Tory prime minister Labour would serve under, and no one objected to his keeping the foreign office as well. His success in dissuading the Clinton administration from blundering into Bosnia in Its first year was generally admired, not least in the British and US armed forces, who believed he had saved them from a Vietnam-like quagmire.

And now. Pouglas knew as he looked round the anxious faces at the cabinet table, they were relying on him to do it again. The Listonian crisis was getting out of hand. Those TV pictures of villages laid waste by Cossack "irregulars", who everyone knew were operating from bases in Russian territory, had brought in massive postbags for every MP.

Why was that, Douglas wondered, refilling his cup of Earl Grey tea to give himself a moment's more thinking time. After all, destroyed villages in eastern Europe were a pretty familiar sight. Even back in 1993 he had told the Royal Institute of International Affairs that "there is nothing new in mass rape, in the shooting of civilians, in war crimes, ethnic cleansing, in the burn-ing of towns and villages". At that time such things still had a certain power to shock when they happened in Europe and were shown on TV, but surely we were past that by now.

Perhaps it was the swastikas daubed on the walls, or the fact that the male inhabitants of all ages had been mutilated?

A line in the marsh

A cautionary tale of Europe's future

Or was it the way the tabloid press - so much of it now German-owned or influenced was playing up the story? Probably a bit of both, but in his view it was the truculent tone of the new Russian regime that had done most to unsettle public opinion. Not only had it stopped pretending it was not involved in the events in Caucasia and the Baltic; it had warned ominously that similar events would happen in Ukraine if authorities there did not show more "respect" for the Russian population.

By 1994 Douglas Hurd, the prime minister, could no longer ignore the truculent tone of the new Russian regime

Slowly Douglas realised that someone in the room was speaking. It was Ashdown, the secretary of state for defence a man whose presence in the cabinet Hurd regarded as the downside of coalition govern-ment. Putting him at defence had been a clever move, of course. It meant he could rush around visiting the troops, but was obliged to face the fact that there were simply not enough of them to right all the world's wrongs.

All the same, Ashdown had been getting troublesome of late. He had a knack of making speeches which, without actually contradicting government policy, seemed to fan rather than soothe the mood of militant indignation that was sweeping the country. Even Lady Thatcher was said to except him, privately, from her constant excoriation of "this

spineless government". And what was he saying now? Something about having warned all along that the rot would spread if it wasn't stopped in Yugoslavia.

Douglas adjourned the meeting for an hour and put through a call to Washington. Not to the president: he had learnt quite early on that he could not be sure of getting him on the line. It was more effective, in any case, to work through Warren Christopher, a man who shared, to a large extent, his own cautious and sceptical world view. Yes, Warren confirmed, pres-

sure was building up there too - on the Hill, especially - for some kind of intervention. Something was needed to head it off. A joint statement, perhaps, by the P3 - the three western permanent members of the Security Council - to draw a line in the marshes".

Fax machines whined in Downing Street, in Foggy Bot-tom and in the Elysée Palace. President Chirac amended successive drafts to make it clear (i) that Nato was not involved (ii) that no military action was contemplated, and (iii) that if military action was taken France would be present "au premier rang". But by midnight Douglas was able to reconvene the cabinet and present them with an agreed text, the careful phrasing of which gave him once again that comforting glow of pride in British draftsmanship. It deplored atrocities "by all sides", and warned that "the international community would react with the utmost energy to any extension of the fighting, particularly across

When he had floished rending, colleagues pressed forward to shake Douglas's hand. Now at last they had something concrete to offer at their weekend surgeries. He waved away their congratulations, with the merest hint of impatience, but allowed himself to accept a double whisky from Snodgrass, the Downing Street butler.

Just as he raised the glass to his lips, the mahogany telephone on the slightly worn green leather deak began to ring. It was Charles Buffett-Brown, his private secretary in the Foreign Office. "Sorry to bother you so late, prime minister, but I thought you'd want to know. Russian troops have crossed the Polish frontier." The column is a response to a short story by Douglas Hurd in

Auditors called to account

days, senior Department of Trade and Industry officials are to issue their verdict on the future of audit regulation in the UK. For the accountancy profession, their conclusions are unlikely to be

comforting. The first year of the new selfregulatory regime for auditors ended last October. The goverument is now considering the outcome in advance of a fuller review of the system at the end of this year.

What emerges is a picture of failure by many parts of the profession to meet the standards it has set for itself. Equally important, far wider concerns over the scope and provision of audits and the mechanisms for their regulation have been put under the spotlight.

Auditing - the annual independent scrutiny of a compa-ny's accounts - was first enshrined in UK law in the middle of the last century in response to a series of financial scandals. It became mandatory at the turn of the century for all incorporated companies those which limit liability to assets of the business.

But the question of who audits the auditors was not addressed until far more recently. It was only in 1989 that a new UK companies act - generated by requirements in the EC's eighth company law directive - introduced the requirement for regulation of the profession.

A regulatory regime was set up by October 1991, to be overseen by the DTI but run by the occountancy profession's own bodies. All firms and individual practitioners who wished to audit companies had to register with one of five bodies: the three chartered accountancy institutes covering the UK, the chartered association of certified accountants, or the association of authorised public accountants - a small group outside these bodies.

The reports submitted to the DTI by the five bodies have raised concerns over the quality of auditing. They examine a significant number of complaints mainly by companies or investors over issues such as the level of fees, lack of response to correspondence and inadequate audit work. Inspectors from the five pro-

fessional groups identified highly problems in a high proportion

of both random visits and those triggered by complaints. From 158 random visits to auditors by the three chartered bodies, just 11 firms passed all of a series of questions on audit independence, control, training and methods. As one senior regulator says: "I'm not happy. It's no use sweeping it under the carpet. Serious action has to be taken

Those views are echoed by Mr Harry Youngs, head of practice regulation at the Charfered Association of Certified Accountants, "The results don't come as any great surprise," he says. "One of the biggest problems for a significant minority of small practitioners is competence. The standards in the large firms have not always been reflected at the smaller end."

Two recent surveys of audit practitioners have shown that many have been forced to make fundamental changes to their systems and procedures to meet the requirements of the regulatory regime.

Publicly, the regulators are playing down the findings of the reports. They say that random monitoring only got fully under way in the second halfyear of the new regime, from last spring. Once firms under-stood that mechanisms had been introduced to monitor standards, many quickly improved their performance.

Mr Colin Brown, head of the chartered accountants' audit regulation policy co-ordinating committee, says: "It is too early to make any final judgments. There are elements that need to be remedied and they are being remedied." Other regulators stress that

many auditors judged unsatis-factory had not delivered poorquality audits. UK audit regulation: Oct 91-Sept 92

Rather, they did not have adequate documentary records to back up their conclusions. However, the reports of the five bodies provide little evidence to support this view. What they do

Seg-

sity. One difficulty is assessing quality when many of the most important auditing issues are based on subjective judgment and rarely committed to paper. Ensuring consistency of standards

A possible solution may be peer review by partners in a

comparably sized firm.

Another concern highlighted by the reports is the highly complex structure of regulation. The three chartened bodtes have a single joint monitoring unit which inspects firms and then refers any problems to their three separate registration and disciplinary committees. The certifieds have their own monitoring unit, which also carries out supervision for the authorised accountants.

The existence of separate bodies is a legacy of flercely independent professions with their own qualifications and practices. But it creates difficulties in ensuring that audit regulation is consistently

applied.

The targets set by the two units are also different. The certifieds have pledged to inspect each audit firm or practitioner every five years. The chartereds have only made this commitment for the auditors of listed companies. Their current plans - ratified by the DTI allow them to inspect just 150 of the remaining firms each year, which means that they will take 60 years to cover all practitioners.

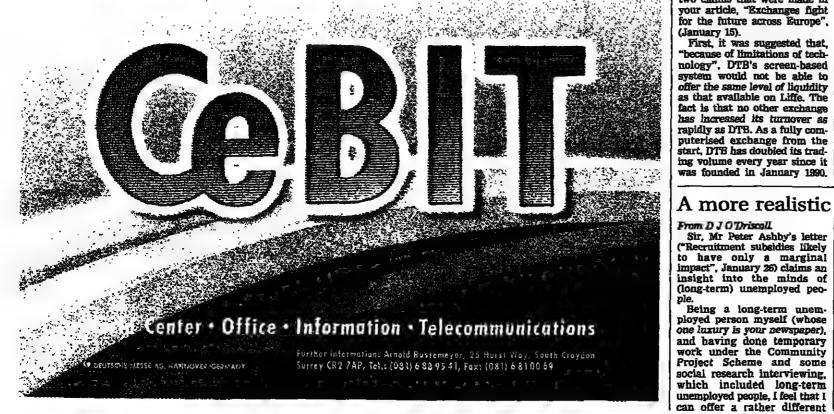

There is a final, wider issue: whether the profession can police itself effectively. While many auditors have been criticised in the three reports, the number against whom action has been taken is smaller (see charti, and none of the disciplinary proceedings is open to public scrutiny.

All the bodies are caught between two roles which may be incompatible - as regulators upholding the public interest and as trade associations representing their members' interests. On one hand, they face rising regulatory costs totalling more than £4m last year - wluch are passed on to their members in annual registration fees and compliance costs. On the other, any threat of withdrawing audit authorisation could jeopardise their members' livelihoods. Both may increasingly threaten to compromise their ability to act independently.

Add to that, growing public scepticism towards auditing in the light of recent corporate frauds and collapses, and the demand for accountants to be independently regulated so they can be seen to be independent may yet prove irresistible.

At first you'll be amazed by the innovations, and then you won't know how you ever managed without them... You'll be amazed at first. But how could it be otherwise

when 6,000 exhibitors from over 45 countries present their latest products? Practical demonstrations will give you an insight into innovative technology at work. You'll be able to find out about the latest trends in IT and communications technology, not to mention 'software development. All at one venue. And only there. In Hannover from 24th — 31st March 1993 At CeBIT.

Railway privatisation in Britain | No place for and Germany similarly flawed

From Dr Jary

Schimmelpfumig. Sir, In his letter (January 29) Mr Godward correctly points to the simplicity of the German rail privatisation proposal which, by reducing the uncertainty among both train mak-ers and would-be private train operators, is less damaging than the British one. Nonetheless, both plans are basically flawed in the very same way. By requiring the rail-track authorities to earn a commercial return on their assets, or at least to break even, both higher fares and line closures will become unavoidable, in contrast to the assurances given by the transport secre-tary, Mr John MacGregor. This not only puts the rail travelling public, already suf-fering from chronic under-

From Mr Rolph Riston.

Sir, I would like to set the record straight with regard to

two claims that were made in

First, it was suggested that,

system would not be able to

has increased its turnover as

(January 15).

investment in the rail system, at a further disadvantage. It makes rail freight uncompetitive ("SNCF hints it may sue over UK rail plans" January 29) and results in an overall loss of benefit. This is because natural monopolies, as is well known from basic economic theory, have to be subsidised, that is, sell their services at below average costs, in order to allocate them with economic efficiency.

Of course, there are some gains to be expected from rall privatisation. As a number of both theoretical and empirical studies show, private enter-prises are on average more cost-efficient than their public counterparts. The main reasons are that in the public sector there is more bureaucratic waste and managers lack

Within its first year of opera-

incentives to employ costreducing measures. However, it is far from clear whether the benefits to be gained from increased cost efficiency can outweigh the loss of efficiency in allocating services. There is nothing wrong with running a railway along commercial lines once the overall goals have been formulated. But the goals themselves should not be allowed to be confused with those arising from commercial viability. As the Beeching experience from the 1960s has shown, the damage inflicted by a misguided railway policy might become irreparable. Jörg Schimmelpfennig, Department of Economics, Universität Osnabrück, PO Box 4469, D-4500 Osnabrück,

From Mr John van Maurik. Sir, I was relieved, yet concerned to read Patricia Morrison's critique of the Channel 4 Cutting Edge programme on John Ridgeway ("Macho

January 27. Relieved, because although it was compelling television I also found the Ridgeway techniques unacceptable and it was good to feel the wind of common sense blowing through her article.

Concerned, because as a management trainer and someone who runs leadership and team building courses, using both indoor and outdoor development, I am worried that the rest of us should be tarred with the "exercise in sadism" brush. Sensitively handled, outdoor training can be an important aid to team development and individuals' growth as leaders.

It makes sense, however, that the exercises should be mentally challenging rather than physically demanding and that the trainer should never deliberately mislead course

The good trainer should facilitate other peoples' learning. This means assisting their development, listening to them and encouraging discussion. rather than playing the role of Captain Bligh. John van Maurik, leadership

director, programnies. Sundridge Park Executive Development, Plaistow Lane.

Bromley, Kent BR1 3TP

A more realistic view of attitudes among long-term unemployed

From D J O'Driscoll Sir, Mr Peter Ashby's letter ("Recruitment subsidies likely to have only a marginal impact, January 26) claims an insight into the minds of

(long-term) unemployed people.

Being a long-term unem-ployed person myself (whose one luxury is your newspaper), and having done temporary work under the Community Project Scheme and some social research interviewing, which included long-term view of the attitudes of unem-ployed people. First, it is hard to believe

that temporary work schemes can offer any hope to unemployed people for the obvious reason that the job would offer no security and the participant would enter the scheme with the knowledge that they will be back at square one at the end of their contract. One can say that such a scheme could re-instil the discipline of work that is destroyed by unemployment, and can give something can offer a rather different to the person to write in their social circles, but I think that

there what is the point of rais-

ing people's hopes?

Mr Ashby voices the same old prejudice about the unemployed that the media and politicisms. ticians have been peddling throughout the 1980s: we are a bunch of scroungers who should be forced to work for our pathetic "income from society". Well, no new ideas there. He then goes on to claim that this has some support among long-term unemployed people. Of course Mr Ashby and I may move in different

and, dare I say, more realistic, | CV. But if there are no jobs out | the majority of long-term

unemployed people would agree that what they need is work. And not for the notion of having pride in having a job. but simply to have a part-decent standard of living. Perhaps Mr Ashby could

take this into consideration when he next descends from his castle in the sky, and come up with some real recommendations for solving the plight of so many people. D J O'Driscoll, 19 Hopwood Bank, Horsforth.

loss for last year. The banks are thus trying to minimise the effect of a provision in their code of practice for personal customers which says that customers must give their consent for banks to publish details of their accounts to third parties even when those third parties are subsidiaries of the bank. In effect, Barclays is forcing new customers to give such consent.

The office of the data protection registrar, who is responsible for ensuring that companies adhere to the Data Protection Act, is naturally concerned about this. It thinks that Barclays and other banks which might follow are evading their own code of practice it also believes they may be of practice is honoured in the breaching the act by not obtaining spirit and the letter.

Parcelling up the post office

THE IDEA of privatising the UK count towards the government's post Office seems to be taking on budget deficit. a dangerous life of its own. It began innocently enough, with the government's proposal last year to sell off the parcels division. Since this business operates in a highly competitive market without monopoly protection, that seemed sensible. The snag is that parcels lose money, as do the post offices themselves. The only profitable and attractive bit of the operation is the Royal Mail, which enjoys a monopoly on letters below a certain price. The notion has thus gradually taken hold of selling the shole enterprise in a lump, raising some £2bn in the proces

This risks repeating a classic error of the 1980s. The issue of monopoly power should be resolved before privatisation is begun, not tacked on as a afterthought. To privatise the Royal Mail as it stands and then send in a regulator is to beg a whole range of questions about its structure, powers and social obligations. Nor is there an urgent need for change; the Royal Mail provides a world-class service, broadly satis-fies the public and is, by public sector standards, well managed.

One argument for privatisation has a certain force. The Royal Mail operates in a broader communications market, competing against telecome, faxes and information technology generally. This is a highly capital intensive, competitive world, in which the old-fashioned letter post risks becoming obsolete. If the Royal Mail cannot invest to compete, it will lose the volume which enables it to hold down its prices and thus enter a spiral of decline. And in the public sector it is not

But in fact, the Post Office scarcely needs to borrow, since it generates vast sums of cash through its operations. The snag is that the money is confiscated by the Treasury: £750m in the past decade, with another £181m to come in the next fiscal year alone. If the government is being too greedy, perhaps the Post Office needs protection. If so, to install a regulator to mediate between it and the Treasury would be a more sensible first step than privatising it out of hand and sending a regulator in afterwards.

Similar logic applies in the case of the post office counters. These are highly sensitive politically, since half of them are loss-making and all of them perform a social function. But the losses are at least partly the result of arbitrary restriction by government. Legally, the post offices can only handle transactions for govern-ment departments and the formerly public utilities. They can do business for British Telecom or Thames Water, but not for Marks and Spencer or Barclays Bank. An economically important resource is thus denied the opportunity to run on commercial lines. Change might well occur most effectively under privatisation but should not

be impossible without it. This is not to deny the proposition that a commercial undertaking should justify its place within the public sector, rather than the other way round. The question is rather what role the Post Office should be expected to play as a private entity and how it could then be exposed to competition. Private sector monopolies are to

Britain cleans up

THE DISPUTE about the transfer of work from Hoover's vacuum cleaner plant in France to its plant in Scotland has been long on political rhetoric and short on facts. Contrary to political rhetoric in Brussels and Paris, the transfer has little to do with "social dumping" or Britain's opt-out from the

Maastricht social chapter. Social dumping is the theory that in barrier-free economic zones capital will flow to areas where labour is cheapest and least protected, triggering downward pressure on standards in other regions. There is no evidence for the second part of the theory and little for the first, regrettably for the low wage economies of southern Europe where investors have learned to balance cheap labour against low productivity.

By recruiting the EC's social dimension to the cause of economic nationalism French politicians also risk discrediting a feature of European integration that they have done so much to promote. A balance has to be struck. It is legitimate to enforce minimum standards of civilised behaviour on employers by banning child labour or insisting on basic safety standards. It is also essential to ensure state aid does not give companies an unfair advantage. But it is absurd to regard every aspect of competitive advan-

tage across the EC as dumping. The Hoover episode has struck an understandable anti-British nerve but the row says something

about the increasing fragmentation of the EC as well as the state of French politics. It is easy to see why the "sweatshop" of Europe is in the dock following its social chapter opt-out and sterling's devaluation since September.

in reality, Hoover's restructure ing decision was made in Scotland's favour because the company had spare capacity there and because, it says, non-wage labour costs are only about 10 per cent of wage costs in Scotland compared with 45 per cent in France. Despite the crowing of some British politiclans neither the social chapter opt-out nor devaluation has much to do with that. The social chapter does not cover wage or non-wage labour costs and Hoover says it did not make a long-term investment decision based on short-term devaluation.

The labour market culture of the Thatcher era may have enhanced the UK's attractiveness but it has for decades claimed the largest share of external investment in the EC. Easier hire and fire can also work against British jobs when it is much cheaper to close plants in the UK than in Spain, France or Germany. By EC standards Britain is a low labour cost economy, partly because citi-zens pay for healthcare through general taxation. In those parts of industry where productivity is not correspondingly low the UK is an attractive investment site. British workers should thank Mr Delors

Bankers'

and handling data fairly. CUSTOMERS OF Britain's high British banks are currently facstreet banks have the right to ing a wave of criticism over everyrestrict how widely details of their accounts are circulated within thing from their small business lending policies to charges for their bank. Barclays Bank has overdrafts. In reply, they rightly devised a way around this for new point out that they are business customers by requiring those who not public utilities, and they must buy products such as its credit make a profit. This means raising cards to allow any of the bank's charges, since much of their lendsubsidiaries to use information ing in the late 1980s turned out to about them on its database.

be loss-making. This tactic, and other efforts by This argument does not apply to banks to get customers to give the methods being used to obtain permission for the use of financial permission from customers to use data, is intended to help banks sell data. The banks only agreed their more financial products to their code of practice last March. But its existing customers. Barclays has a provision on confidentiality would strong motive to raise its income be weakened if all banks emulated from products such as personal Barclays. This is hardly the signal loans and credit cards because it to send to those who call for statumay next month declare a pre-tax

tory regulation. The banks are themselves concerned about data security, and have started an industry-wide review after the shock of seeing details of Mr Norman Lamont's credit card bill in The Sun newspaper last December. Their worry is that employees may take infor mation from their databases, and disclose it to outsiders.

The banks say they recognise the need to improve data security, but their customers' faith in these efforts is hardly enhanced by their response so far to the data protection office's anxieties. It is in the banks' own interest to ensure that the right of confidentiality afforded under the banking code

he war of attrition in the European truck industry claimed its biggest cast alty yesterday as Daf the Anglo-Dutch commercial vehicle maker, was forced to file for protection against its

creditors in the Netherlands. The vice is tightening inexogably. The number of truck makers in Burope had already dropped from 25 in 1975 to 10 by the end of 1991, and the group is still shrinking.
Financially Daf has been the

weakest of the leading European truck makers, but it has tried hard to compete in the industry's premier league. Its financial collapse will send shock-waves through a sector that is already being battered

by deepening recession.

Daf is the biggest truck maker in the UK - since its takeover of Ley-land vehicles in 1987 - and it is the UK truck market leader with a share of 25 per cent. It is number six among the hig seven European truck makers with a share of close to 8 per cent of the west European

Its single biggest shareholder is still British Aerospace with a stake of 10.9 per cent resulting from BAe's takeover of Rover, formerly British Leyland, in 1988. The BAe holding has fallen sharply from an original 40 per cent, however, and BAe failed to subscribe to the last share issue in late 1991, further diluting its then stake of 16 per cent.

But as Daf's problems have mounted it has been the Dutch institutions that have increasingly answered the distress calls. More than 40 per cent of the equity is now in the hands of the biggest Dutch bank ABN/AMRO (8.2 per cent), VADO, the founding Van Doorne family (10.3 per cent), the Dutch insurance groups ING (10.6 per cent) and AEGON (6.4 per cent) and DSM, the former Dutch state owned chemicals group (5.9 per

How the administrators and receivers in the Netherlands and the UK will seek to pick up the pieces remains unclear. Daf insisted yesterday that its attempt to engineer a financial rescue had only foundered on the opposition of a minority of its banks, mainly in the UK, to its proposals for securing emergency short-term funding.

With Dutch financial institutions facing the biggest financial exposure, and the Dutch and Belgian governments having shown themselves willing earlier in the company's decline to support restructur-ing packages, the Dutch administrator might still be able to work out a new rescue.

For the moment, however, Daf has given up control of its own destiny. Having run up cumulative losses of about F1800m (£300m) in the past three years it was forced to file for protection from its creditors Daf is the biggest victim of the sharp contraction in the European truck industry, writes Kevin Done

at the district court of s'Hertogen-

Its operations were immediately plunged into uncertainty and upheaval. Employees turned up at the companies plants in the UK, the Netherlands and Belgium for work as usual, but within hours production was being affected.

As news of the financial collapse spread, some suppliers immediately began to stop deliveries of compo-nents. With just-in-time delivery of parts to plants spread from Leyland in Lancashire to Eindhoven in the Netherlands, the impact of such actions on the assembly process can be almost immediate. "Where possible we are produc-

ing, but in some areas supplies of components have stopped. What happens tomorrow, I don't know," said one Daf executive in the UK As Daf's fortunes have waned, it has proved unable to find a rescuer within the industry, despite desperate overtures in recent months to

Mercedes-Benz, the automotive sub-sidiary of Daimler-Benz of Germany and the world's biggest truck maker. It has also searched in vain in recent months for a Japanese The absence of a partner is not surprising. Dar's competitors have enough troubles of their own.

Volvo, Renault and Iveco (the com-

mercial vehicles subsidiary of Flat)

are all losing money on their truck

and bus operations. In the US the heavy truck industry has been deep in loss for five of the past 11 years. In Japan the truck market has been falling for more than two years. Nissan Diesel fell into loss in the six months to the end of September, while Hino, the leading Japanese heavy truck maker, suffered a 59 per cent fall in pre-tax profits in the same period. The fortunes of the truck makers

fluctuate widely as the industry suf-

fers from exaggerated trading

cycles. In west Europe the last year

of strong growth was 1989, the year that Daf went public. European truck sales have been falling for the past three years, and there is little prospect of relief during 1993 with demand forecast to fall particularly sharply in Germany and Italy.

trading cycle claims new victims, and Daf has long looked most

Its financial demise has abruptly ended its brave dream of becoming one of the leading players in the European truck industry able to challenge the likes of Mercedes-Benz, Iveco, and the Franco-Swedish alliance of Renault and Volvo. Its strategy for climbing into the Each lurch downwards in the top flight started with the takeover

in 1987 of the then British Leyland truck and van operations. The move transformed it from being essentially a heavy truck and bus maker into a commercial vehicle producer with a full product range from vans to light, medium and heavy trucks

and buses. Buoyed by record sales and profits in 1989 it then tried to add to Leyland by taking over the Steyr truck business in Austria, and then Enasa, the Spanish state-owned truck maker of Pegaso vehicles. Each time it was thwarted by bigger rivals, first by MAN, the German truck maker, in the case of Steyr and then by Iveco at Enasa. Even as these dreams of grandeur

were fading, Daf began to be overtaken by the impact of the UK recession — one of the principal reasons for its downfall.

The UK became its biggest single market after the merger with Ley-land and by 1991 the UK still accounted for 29.4 per cent of group sales. In 1991 it ousted Iveco from the leadership of the UK truck market and it consolidated its pole posi-

ut market leadership has been small consola-tion, when overall UK truck sales have fallen to their lowest level since the early 1950s. In the past three years, the number of trucks sold in the UK market has declined by more than 50 per cent, from 59,234 in 1989 to only 31,398 in 1992. Daf has tried hard to reduce its dependence on the UK by expanding its dealer network and sales overseas - in particular in Ger-many and in France. But other markets have weakened too.

Excluding the German market, which was stimulated for two years by the impact of reunification, the impact of recession has been savage. According to Mr Peter Schmidt, an analyst at the UK-based Automotive Industry Data, the west European truck market (above 3.5 tonnes gross vehicle weight), excluding Germany, has plunged from 255,000 in 1989 to 160,000 in 1992, the lowest level for at least two decades. Including Germany truck sales in west Europe have fallen from 321,000 in 1989 to an estimated 281,000 last year.

Now the prop of Germany is also falling away. Mercedes-Benz, the industry leader, has been forced to cancel a big investment in a new truck plant in east Germany, and has disclosed that since July it has suffered a "dramatic" fall of 30-50 per cent in new commercial vehicle orders booked in Germany.

Daf has had its own particular problems, however. It has been badly exposed by having the breadth of product range of the big-gest manufacturers without their production and sales volumes. As a result, it has been unable to achieve economies of scale.

But if Dars problems have been exaggerated by its relatively small size, its rivals are unlikely to feel reassured. The problems of the European truck industry are likely to get worse before they get better. Some of Daf's larger competitors may also find themselves forced onto the hard shoulder before the end of the decade.

The mother of all parliaments

Andrew Adonis analyses proposals to reform the way laws are made in the UK

tion out of the government's hands.

It would, for instance, "welcome

The best cure for admiring the House of Lords, said Walter Bagehot, is to go and look at it. If you have never looked, and harbour admiration for either Lords or Commons save vourself a trip to Westminster and read the Hansard Society's

report on the legislative process*. The report, published yesterday, is a withering critique of the way law is made in Britain, produced by a commission of senior legislators. lawyers and lobbyists chaired by Lord Rippon, the former Tory cabinet minister. It is a tale of obfuscation, lack of consultation, grossly inefficient use of parliamentary time, yet inadequate scruting of either the principles or details of

As the case studies in the report testify, the heart of the problem is the government's largely unfettered control over the legislative process. At one extreme, it cites the 1990 Dangerous Dogs Act. A panic measure, now widely regarded as unworkable, to ban pit bull terriers and Japanese tosas passed through

all its stages in the Commons in a improved consultation, and propos-single sitting, less than a week after ing to take the framing of legisla-

In contrast, the 1990 Broadcasting Bill, which reformed the regulatory regime for the independent broadcasting sector, was subject to lengthy consultation before reaching Parliament, and debated for 17 days once there. Yet so faulty was the bill as introduced, and so little had ministers done to take on board prior criticism, it practically had to be rewritten on the floor of both Houses. The government was obliged to table 800 amendments in the Lords alone, many of them at a few days' notice.

"Public anxiety about the current system is great and demand for range is strong," says the report. Its main recommendations for change fall into three categories: more intelligible drafting; more meaningful consultation; and more rigorous parliamentary scrutiny. However desirable, major statutes will never make good bedtime read-

more frequent appointment of independent inquiries, including royal commissions". But what is an "independent" inquiry? One staffed by "experts" (who are generally far MPs would, at least,

have had to address the chronic practical difficulties thrown up by the poll tax

from independent)? Or one including political opponents of the gov-ernment, in which case its report like that of so many royal commissions in the past - will inevitably be the lowest common denominator of its diverse composition? No royal commission in the early 1980s would have got the privatisation ing. On the second theme, the com-mission wavers between wanting reform the welfare state. ball rolling; nor is one likely to

It is in the third area, parliamen- of the legislative process this centary scrutiny, that the commission makes particularly valuable recommendations. Two radical proposals are set out:

 Before being debated, controversial bills should be referred to select committees with the power to take evidence from academics, professional bodies and interest groups. Ministers and whips should not be

members. Select committees should conduct inquiries into important bills before they are subject to line-byline scrutiny by the Commons.

If implemented, these proposals would provide far greater opportunities for those affected by bills to make their voice heard, without compromising the government's necessary right of initiative. And by reducing the direct control of ministers over at least part of the parliamentary process, they would make it more difficult for ill-considered bills to reach the statute book.

Would the Hansard proposals have made any difference to the poll tax, perhaps the worst product

* Making the Law, Hansard Society, St Philips Building North, Sheffield Street, London WC2A 2EX. £16.

tury? Possibly not, given the size of Lady Thatcher's majority in 1987, and her determination not to change a dot or comma. But under Hansard's plans, MPs would. at least, have had to address the chronic practical difficulties thrown up by the tax. They would also have come face to face with the near universal condemnation of it.

It will take a battle royal between the government and Parliament that is, its own backbenchers and the opposition - to get the Hansard reforms through. But it has hap-pened before. In 1979, immediately after the demise of a Labour government with no overall majority, MPs voted to set up the departmental select committees, which have proved influential of late. They should seize the chance offered by Mr Major's slender majority to establish select committees for legislation too.

BAT takes another puff

a lt would be hard to describe Martin Broughton, the new chief executive of BAT Industries, Britain's fourth biggest company, as a breath of fresh air.

True, he is jolly young - 45 and, like the bosses of most of his competitors, he is no longer a chain-smoker. But he is still at heart a tobacco man, having joined the British-American Tobacco Company over 20 years ago. BAT's performance over the past

decade has certainly improved. If it hadn't, it would almost certainly have been taken over by now. However, its preference for recruiting its head boncho from within underlines its conservatism. Lou Gerstner, the 50-year-old

boss of RJR Nabisco since 1989. is an ex-management consultant who made his name at American Express; Michael Miles, 53, head of Philip Morris, is a marketing man who joined PM after it took over his employer Kraft in 1989. Both these conglomerates have benefited from a breath of fresh air at the top. Perhaps BAT should try it some time?

Firebrand

■ Tut, tut. Sir John Quinton, the recently departed boss of Barclays, can't have been serious when he

hinted at a possible solution to Britain's property slump during his speech at the annual dinner of the Overseas Bankers Club. Noting that the City had always bounced back from previous crises ranging from the Great Plague to the Great Fire, he mused whether a repeat of the latter calamity might not help reduce the City's vast store of unlet properties now disfiguring many bank loan portfolios. TREASURY ■ Japanese carmaker Mitsubishi

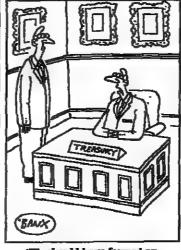

Foul

seems to have scored an own goal by hiring German soccer star Franz Reckenhauer away from Mercedes Benz to be its chief pr "personality" in Europe. There were loud grumblings

among Dutch fans attending this week's opening of Mitsubishi's glitzy new European headquarters in Amsterdam. As Mitsubishi is also making its European manufacturing debut through a joint venture with Nedcar, the Dutch government-backed carmaker, wouldn't it have been better to have given the job to the Netherlands' legendary Johan Cruyff, instead of hiring an expensive German transfer?

Lateral thinking

■ Once upon a time, western governments used to lecture post-communist peers in eastern

'We should have formed an economic policy while we still had an economy

Europe on the need to adopt economic shock cures and open up their markets. Now it seems the boot is on the other foot.

Take Karel Dyba, the Czech republic's economy minister, who offered Washington deadpan advice on balancing its budget provided the US would agree to open its cheese market. Or his boss, Prime Minister Vaclay Klaus who, when asked what should be done to open the EC market to Czech products. sighed: "We spent years studying western economic textbooks. Now it seems we have to sell free market ideas back to the western world."

Anatoly Sobchak, the mayor of St Petersburg, sounded even sniffler. He boasted that his city was about the only place in the former Soviet Union that was not crawling with Harvard-trained advisers - and that did not have a budget deficit.

President Leonid Kravchuk of Ukraine, meanwhile, has developed an intriguing line in sales patter. When asked what his country had to offer investors, he recited the usual laundry list of cheap labour and ample natural resources, then added cheerily: "We have the best missiles in the world.... they can be used for launching satellites."

Hot stuff

There are some privileges in running a television channel. Alan Yentob, boss of BBC2, was one of the first night audience at Covent Garden last week which cheered to the echo of the first British professional production of Verdi's "lost" opera, Stiffelio.

Yentob was so enraptured by

the performance of José Carreras in the title role that he is clearing his planned schedule this Saturday and transmitting nearly three hours of Stiffelio live instead. Wisely, Covent Garden Pioneer, the company set up last summer to video productions at the Opera House, and Yentob's bosts at the première, had been planning to film the opera this week, with a planned BBC transmission around

Christmas time. This unprecedented speed is wonderful pr for the Opera House which has been criticised in the past for elitism. Not many more than 10,000 people will see Carreras live in his five performances as Stiffelio: now millions can join in Covent Garden's hottest production for years.

Error rate

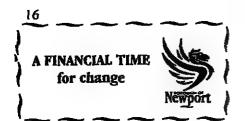

■ The Treasury has been accused of a few errors of judgment in recent days. Yesterday brought

At 11.39am, the Treasury used its special page on the Stock Exchange's Topic Information service to issue the January official reserves figures. Because of a technical hitch, a sentence from a very old Treasury announcement accidentally crept onto the Topic screen - Minimum Lending Rate will be revised to 7 per cent

tomorrow. The announcement was spotted by the Extel news service, and displayed for 5 minutes before the Bank of England requested the Treasury to remove the offending Dage

Multinationals complain to government over handling of \$21m contract

Fury at Mexico air traffic award

By Damian Fraser in Mexico City and Stephen Fidler

THREE multinationals have formally complained to the Mexican government about alleged irregularities in the award of a \$21m contract for renewing Mexico's air traffic control sys-

IBM, Westinghouse and Raytheon's Canadian subsidiary allege that an initial tender to replace the system was unjustifiably cancelled. They also claim they lost a second tender to a rival bid which had been reduced by an inexplicably large margin and did not comply with the tender requirements.

An agent acting for IBM also alleges that he was asked, apparently by unidentified Mexican officials, for a \$1m bribe to secure the contract for the US computer

The air traffic control contract was awarded in December to the two European companies responsible for Mexico's current air traffic control system. Thomson of France will provide the new data processing system and Alenia of Italy the radars.

The complaints come at a sensitive time for Mexico as the North American Free Trade Agreement awaits ratification from the US Congress and the legislatures in Mexico and Canada. The agreement, which is expected to have an awkward passage in Washington, is meant to open up most procurement for the Mexican public sector to US and Canadian companies.

The complaints are being investigated by the office of Mexico's General Comptroller of the Federation, which monitors how Mexican government money is spent. They have been deliv-ered by the US and Canadian emhassies in Mexico and, according to those involved, are unusu-

ally flerce. The comptroller's office declined to comment on the allegations until it had had time to review the documents relating to the two tenders.

The initial tender for the contract to replace the 14-year-old system was announced in August but cancelled abraptly on November 19. The reason given for the cancellation was that none of the seven bldding compa-nies complied with the tender

This has infuriated the US and Canadian companies, which to be claim world leaders in the technology, and deny that they failed

to comply in any material way with the almost 200 require-

The three companies have also drawn attention to a sharp drop of between 47 and 60 per cent between the first and the second tender in Thomson's bid for

the data processing system.
Thomson's combined bid with Alenia was just \$600,000 below the next-lowest bid of \$21.7m by Raytheon. A Thomson spokesman declined all comment on the

The IBM agent, Mr Kaveh Monssavi, said the first tender was cancelled 10 days after he refused to hand over money when asked for a bribe in a Mexico City hotel, but there is no independent corroboration of his

Daf's collapse threatens jobs

Continued from Page 1

£25m each from NatWest and Lloyds, plus £10m from Barclays. Last week, the syndicate, including the UK banks, agreed to proride a sbort-term bridging loan to Daf of Fl 50m, so long as the Dutch and Flemish governments also contributed F150m each.

The UK banks said they could not at that stage give a commit-ment to supporting Daf's medium-term rescue plan, until it had been scrutinised by a firm of outside reporting accountants.

The two governments felt enough scrutiny of the medium-term plan had already been car-ried out. Last month, Daf received reports on its viability by AD Little and Coopers &

Two days ago the governments told the banks they were not pre-pared to wait for the result of another accountant's investigation. They wanted a firm commit-ment immediately to the bridging

hopping mad at the British banks which have effectively pulled the plug on Daf. Smaller lenders have an irritating habit of getting in the way of rescue proposals that appear socially and politically sensible, but then those without an axe to grind can see the

Doubtless the Dutch government and the Flemish regional authorities are

financial traps more easily. The Dutch banks are so deeply involved they would prefer not to leave room for second thoughts about the medium term rescue plan. On any objective measure, Dar's position was precarious enough to warrant doubts.

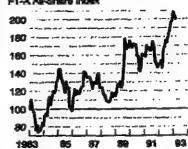

An operating loss last year of FI 200m with provisions for restructuring on top would have cut deeply into capital and reserves which stood at P1810m at the end of 1991. Lenders clearly faced a transformation of debt into equity. The activities of the group's financing subsidiary made it all the more legitimate to worry that the same might have happened to any new loans extended. Daf Finance was responsible for a large part of the FI 3.5bn of short term debt on the group's last balance sheet. But the nality of its loan book must have deteriorated with the recession in the UK and the downturn in continental Europe. That problem only made rescuing the industrial activities more

Nor was Daf a natural survivor in the commercial vehicle market. It is too small and too dependent on the UK. The logical answer might have been an alliance, but a partner's first job would have been to pay to take out capacity. The rest of the European industry must be sighing with relief now that this cost looks like falling squarely on the shoulders of Daf's own enders and shareholders.

Convertible bonds

Three convertible bond issues in four months hardly constitute a flood, but after a couple of barren years. City advisers might be forgiven for licking their lips. Yesterdays 191m issue is cheap funding for Northern Foods. A straight bond issue would cost the company more in interest payments, yet on even modest assumptions of dividend growth, equity investors would do better buying the shares.

The success of the issue - the 3 per cent fall in the share price yesterday is par for the course - underlines that the market is willing to pay a pre-mium for a secure yield. The dwindling return from cash has squeezed

investors looking for income. Recession has made high yield in equities synonymous with corporate distress. Income fund managers could hardly justify holding Northern Foods' shares on a yield less than the market average. The convertible offers a way in.

But convertibles are condemned to a limited role in corporate fund-raising. To protect pre-emption rights, UK institutions effectively limit convertible issues to 5 per cent of share capital Northern Foods has refinanced a handy slice of bank debt - and strengthened its hand in negotiations over the rest. Plenty of companies want to reduce short term debt, but, if big money is needed, it will still have to come from rights issues.

UK food sector

With the PSBR pressing down on him. Mr Norman Lamont may eventually have no choice but to raise some extra cash. Tax hawks suggest extending VAT to books, newspapers and domestic fuel, but the really big target would be food. The Treasury estimates it could garner a further £7bn by making full-rate VAT applicable to food. Taxing bread and butter would certainly provoke a furious public reaction. It would also raise questions about food industry earnings. The worrying memory is of April 1991, when a large chunk of the 214 percentage point increase in VAT came out of the margins of retailers and their suppliers. Recessionary conditions pre-vented the increase from being passed

on to consumers. In the case of food, the direct conseences might not be as bad as at first imagined. Many discretionary ltems,

such as soft drinks and snacks, already attract VAT. Higher taxes would not depress consumption of essential foods, though there might be trading down to cheaper items. Prized brands would become less valuable for a while. With food more expensive consumers might spend less on other

items, like restaurant meals, with a knock-on effect in other sectors. Large food retailers might suffer the least damage because of the power they wield over their suppliers, but margins should recover quickly. Food has declined as a proportion of dispos able income over many years. The additional burden of VAT, were it introduced, would only represent a blip in this long-run trend.

BAT Industries

Like some diva forever postponing the final curtain call, Sir Patrick Sheehy appears reluctant to leave the stage at BAT. Although the company has split the two top jobs for the first time in 90 years, Sir Patrick is to remain in the chair. The figure who has dominated BAT for the past decade will soldier on for up to three more years. By then he will be 65. BAT's normal retirement age is 60.

It is easy to imagine how Sir Pat rick's continuing presence might make life tricky for the new chief executive, Mr Martin Broughton, However BAT's shareholders are unlikely to feel too aggrieved if the share price continues its recent strong run. For the moment at least, Mr Broughton will doubtless stress the theme of continuity. BAT's tobacco business has found new customers in the developing world while the financial services arm appears to have endured the worst. The stiffer long-term challenge will be to address BAT's structural ACT problem. That may require a significant strategic move in the UK and a new song from Mr Broughton.

Rank Organisation

If the new accounting standards were aiready in force the Rank Organisation would have reported net earnings for last year of 6.8p instead of 37.8p. If respectable companies face such earnings volatility, it will be easy to overlook real transgressions in the transition. Rank has been refreshingly candid, but it has also used the opportunity to take a discreet £57m provision for diminution of assets which would not otherwise have shown up in the profit and loss account.

Lower financing lifts Nabisco net income to \$776m

By Nikki Talt in New York

RJR NARISCO, the tobacco and food conglomerate which was the target of a \$25bn leveraged buy-out in 1989, yesterday reported a small decline in oper-ating profits during 1992. However, the after-tax figure, ahead of extraordinary items, increased sharply, thanks to lower financ-

ing charges.
The refinancing of RJR's debt burden - encompassing more than \$3bn of borrowings in 1982 - helped reduce cash interest expense to \$995m from \$1.326hn and non-cash interest expense to \$434m from \$787m. This left net income before extraordinary items at \$776m compared with

After a \$477m charge related to the repurchase and retirement of higher-cost debt instruments, the group's net profits for the year fell to \$299m from \$368m.

At the operating level, the group made a profit of \$2.9bn, compared with \$2.95bn in 1991. The fourth-quarter figure was \$703m, against \$752m in the same

period of the previous year. Total sales for the year were \$15.7bn, up from \$14.9bn.

RJR added that domestic tobacco volume rose 3 per cent during the year, increasing mar-ket share, although there was a 2 per cent fall in the final quarter. However, the henefits of price

increases and volume imp ments were more than offset by higher marketing expenditures and the increased percentage of sales coming from lower-margin discount brands. The tobacco division made alightly lower profits, of \$2.550n for the year against \$2.73bn last time, while the food division's contribution increased to \$947m from \$920m.

Tobacco sales were \$6.16bu, up from \$5.86bn on the domestic side, and \$2.86bn compared with \$2.68bn on the international front. Food sales rose to \$6.71bn îrom \$8.45bn.

Within the food division, the international operations fared well, but restrained consumer spending in the domestic market led to only slow growth in sales

Bronfman sháres hit by fears of restructuring

By Bernard Simon in Toronto

STRAINS IN the property and francial service arms of the boxtness empire controlled by Toronto's Bronfman family have heightened fears of a wider restructuring of the vast Canadian industrial and financial

Shares of several Bronfmancontrolled companies continued to slide yesterday amid concern that the group will either be forced to sell assets or raise port the baemorrhaging property and financial service busin

Brascan, one of the group's main holding companies, slipped 62 cents in early trading to C\$8.75. Hees International, the merchant banking arm, lost 62 cents to C\$5.13. Brascan and Hees shares stood at C\$13.75 and C\$8 respectively at the beginning of the year. Share prices of almost all companies in the Brontman orbit are at their lowest point in

The Bronfman group makes up about 6 per cent of the total market value of the Toronto stock exchange. Companies controlled by the family and their senior managers include Noranda, the diversified resources producer; John Labett, the brewing group;

and Trizec, North America's biggest publicly-traded property

The Toronto Bronfmans are cousins of the family which con-trols Sesgrain, the drinks com-pany, but the business interests

The most immediate proble are at Royal Trust Canada's sec-ond-biggest trust and loen com-pany, and at Bramaica, a debt-laden property developer. RT is seeking an equity injection from an outside financial institution. tion from its creditors last year. One Toronto securities analys

said yesterday that the Bronfmans and their managers "have a choice: they either let the real estate side go, or they fund it". Some analysis however, consider the recent sell-off has been overdone. Mr Terry Fisher, analyst at Midland Walwyn in Toronto, noted that of all the Bronfmans' publicly-listed com-panies, only Bramalea is known to have missed a preferred share dividend, or skipped an interest

or loan principal payment.

Mr Fisher said the group could withstand even the demise of Royal Trust. "The biggest prob-lem the group has is that it's so complex people don't understand. it," he said.

IBM aims to lead \$9bn workstation market this year

INTERNATIONAL Business Machines has set its sights on becoming the world leader in the 19bn computer workstation market by 1994, executives of the troubled US computer company said yesterday.

They were introducing aggressively priced new workstation models, among which was a \$4,000 desktop workstation priced to undercut competing colour graphics workstations from Sun Microsystems and Hewlett-Pack-

IBM also unveiled powerful parallel-processing systems that achieve supercomputer-level per-formance using up to 64 of the microprocessor chips used in IBM's wormstations.

The new products signal an effort by IBM to capitalise on reduced instruction set commuting (Risc) technology, which was invented in its research laborato-ries but which competitors, such as Sun and Hewlett-Packard,

have been quicker to exploit.

There should be no doubt that we intend to be very competitive and very aggressive in this mar-ket," said Mr Bill Filip, IBM vice-president and president of its Advanced Workstations and "By providing everything from

low-cost desktops, to high-perfor-

mance supercomputers, to speci-alised products for both technical

and commercial applications, we

in the open systems arena." How-ever, IBM, which first entered the market for Risc workstations that run popular UNIX software three years ago, is trailing Sun, which holds an estimated 32 percent of the world market, and Hewlett-Packard with 20 per cent. According to Dataquest, the US

market research group, IBM was third in the workstation market with an 18 per cent share in 1992. Mr Filip said IBM workstation revenues rose between 30 and 35 per cent last year and that sales growth in the first quarter was itpacing last year's.

IBM's workstation business was clearly profitable in the fourth quarter of 1982", he said.
"We expect this to be a profitable growth business in 1993."

With the launch of a parallel processing supercomputer, IBM has entered a crowded field of companies using dozens, and sometimes hundreds, of standard microprocessors to achieve performances equivalent to those of mainframe and supercomputers.

The new Scalabel Powerparallel system is aimed initially at technical and scientific custom-

ers for applications such as seis-mic exploration, fluid dynamics and computational chemistry. It combines the power of eight to 64 RISC microprocessors to achieve supercomputer power at a fraction of the cost of conventional supercomputers. Prices start at \$300,000 for an eight processor

William Dawkins meets the chairman of French electronics group Make-or-break mission for TCE

r Alain Prestat, the young French civil service supremo who was launched into the top job at Europe's second-largest conalmost exactly a year ago is on a make-or-break mission.

As chairman of Thomson Consumer Electronics (TCE), the 41year-old Mr Prestat faces odds that would frighten many. A year ago, the group was losing so much money, market share and morale that its immediate owner, Thomson, the state-owned flagship of the French electronics industry, wanted to relinquish TCE. Today, TCE has been given a new chance and Mr Prestat believes the group is in the early

stages of a turnround.
"Our situation is a bit like that of Renualt in the mid 1980s. Some people thought Remault was in a hopeless situation then - and their problems at the time are of the same order as ours are today, They managed a turnround and we can too. We have already hit bottom and now we must rebound," said Mr Prestat.

Operating losses are set to rise from FFr238m (\$43m) in 1991 to an estimated FFr300m last year, but Mr Prestat predicts that TCE will make an operating profit in 1993. Net losses are set to fail from FFr2.47bn to FFr1.7bn in 1992, on turnover stable at around FFr31bn last year, having declined to this level steadily from Ffragin in 1989.

"In relative terms, that is not nearly as bad as the rest of the electronics industry. I see it as regaining stability," he argues. As a symbol of its new amhitions, TCE last week hired the designer Mr Philippe Starck in the latest streamlining of the group's ign manage

Mr Prestat, who has spent his life moving between the higher echelons of state industrial policymaking and the electronics industry, was dispatched from the prime minister's private office into the hot seat at TCE during its worst crisis in recent

Only three weeks earlier, many senior executives were horrified to bear that the then prime minister, Mrs Edith Cresson, was planning to place TCE under the industrial arm of the atomic energy authority. Others thought, in the end wrongly, that the state had decided to ball out the heavily indebted group.

The government presented the

plan, since reduced and reshaped nearly beyond recognition, as a bid to create a world-beating energy-to-electronics conglomer ate on the lines of Siemens, the German conglomerate. Privately, executives knew the governments of the hand a hidden reason.

Heron cuts fees to restructuring advisers

By Maggie Urry in London

HERON, the property and trading company negotiating a gl.4bm (\$2.1bn) debt restructuring seal with its heaks and bond holders, has acted to finit the cost spiral" involved.

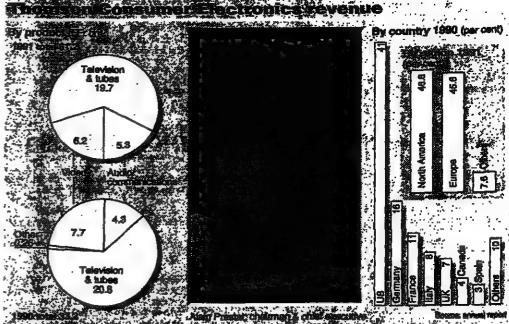

Heron's decision has implica-tions for other companies in sim-ilar talks also facing huge fees ogal advice. Since talks started in March last year fees have totalled 240m. Heron, Mr Gerald Ronson's pri-

vate company, said it would no

longer pay fees not essential to the relinancing. Heron also said it planned to present final proposals to credi-tors by the end of this month. The group said it could not com-ment on sumous that a revaluation of its properties, being pre-pared as part of the cumentation for the deal, showed a further fall of £100m since March last year. But its

first public mention of an end-first public mention of an end-rebruary deadline appeared designed to quash speculation that the talks were being held up by creditors' concern about property values. In order to preserve cash resources, Heron said, it would "no longer he responsible for

feet of advisers other than those which in [Heron's] view are essential to the restructuring process. It had had to devote disproportionate resources" to werliying data already prepared under due diligence procedures. Heron stressed that its fleron Corporation subsidiary is the UK, which includes the housebuilding and automotive divisions as well as property compa-nies in the UK, France and Switzerland, kad large cash

Mr Alain Gomes, who as chair-man of the Thomson group is Mr Prestat's boss, was said to want to hand TCE to another part of the state sector so he could focus better on the group's profitable defence electronics arm, Thom-800-CSF.

With net losses of FFra.5bn over the four years to the end of 1991 and debts of FFr10hn at the end of 1991 - now FFr14bn -TCE looked like a dangerous liability in Mr Gomes's strategy of trying to turn Thomson-CSF into a leading-edge defence electronics

To his credit, Mr Gomes imme-

the time. They were wrong. "Now they realise I am serious and that I am here to do nothing but run the business for the medium to long term," he says. His first action, less than two

months after arriving, was to change the heads of the US and **European** marketing divisions and the head of the European television section. "They were run like baronies, or civil service departments, not like real sales teams," says Mr Prestat. On both sides of the Atlantic, TCE had been lesing market share in televisions, which accounts for 54 per cent of it sales.

'I am not going to my shareholders with a begging bowl. I expect them to put in more money only if operating profits show the right trend'

Alain Prestat, chairman of Thomson Consumer Electronics

blueprint was politically unfeasible, and returned to his old support for TCE. Mr Prestat was instructed to beat out a recovery strategy on the assumption that TCE had a long-term future in Thomson, but that a bail-out was not, as it had been in the past,

guaranteed Initially, he was greeted with suspicion by TCR executives who saw him as a mere political appointee, to impose the erratic government industrial policy of

diately executed a U-turn when it The 20 per cent US television RCA in 1987 had fallen severa points and the penetration achieved by TCE's clutch of fine European brands was acceptably low. Now TCE's US market share has climbed back to the old level and it has added a percentage point to its European penetration by keeping volumes stable in a

falling market.
Mr Presiat, is however, disappointed with sales of TCE's new enhanced definition television act, intended as its foothold in the future market for full high definition television (HDTV) and TCR's main hope for thwarting Japanese competition in Europe. The risks of the HDTV market were highlighted over the weekend when Philips, the Dutch electronics group, suspended plans to make HDTV sets because there were no European programmes

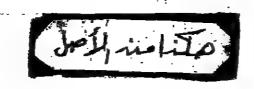

for them TCE is undismayed by this because it does not affect demand for its existing enhanced televiaion sets based on D2-Mac, a halfway standard between normal television and full HDTV. TCE is continuing its HDTV develop-ment in collaboration with Philips. It dismisses its partner's move as a production decision. The French group says it still has full faith in HD-Mac, Europe's

HDTV standard.
The other part of his strategy has been to work on TCE's fragile financial health, cutting stock levels by half to FFrl. 3bn over the past year and trimming FFr2bn from annual running costs. He can do little more, however, than chip away at the group's huge debts and admits that the prospects of making a net profit depend on whether the more equity into TCE.

"I am not going to my shareholders with a begging bowl. I expect them to put in more money only if operating profits show the right trend," he says. He is similarly non-committel on whether TCR should seek to strengthen itself through a foreign alliance, as did Renault with Volvo. "That is not on my agenda at the moment. I never negotiate in a difficult situation, so it all

depends on how we perform."

BBL French unit hit by property loan provisions

nd Alice Rawsthorn in Paris

BANQUE Bruxelles Lambert. one of Belgium's biggest banks, revealed yesterday that its French subsidiary lost FFr540m (\$100.74m) in 1992.

BBL said the loss was principally related to provisions made against French property loans. The French banking sector is under pressure because of the combined effects of the economic slowdown and the squeeze on the French property market.

As part of a restructuring, the Belgian group is planning to cut 139 jobs out of 462 at BBL France, and relocate to

rented premises in the Défense commercial area of Paris.

BBL has ploughed some FFr700m into its French subsidiary over the last year to help meet solvency ratios through a capital increase in April.

The Belgian bank said it had anticipated the losses at its French subsidiary. In November, BBL announced non-consolidated group profits for the 12 months to end-September of BFr2.8hn (\$84m), sharply lower than the equivalent period. Consolidated figures for the 15 months to the end of 1992 will announced early next

French property prices have

been falling for the past three years. Average rentals in Paris, the worst affected area, have declined by 20 per cent over that period.

The problems are most acute in the commercial sector. There is now estimated to be two years of commercial property stock on the Paris market.

BBL France, like a number of other French banks with substantial property interests including Banque Indosuez. the investment bank belonging to the Suez industrial group, and Crédit Lyonnais, the stateowned banking group, have

decision - even if they did halt supplies yesterday. While big automotive customers worldwide have been reducing the number of suppliers with which they deal, the suppliers have also been careful, where possible, to avoid being too dependent on any one client.

Ultimately, the importance of Daf and its market position - it is truck market leader in the UK with a 25 per cent share - has convinced some suppliers that the company and its truck manufacturing will not disappear. "I can't believe a package won't be put together to retain the most successful parts of the business," said one big international sup-

Companies which continued deliveries to Daf explained their action by saying either that the immediate future of manufacturing at the truck

Suppliers keep calm over Daf's demise

Andrew Baxter on the belief that the truck manufacturer might survive the grave

they were not in a position to halt supplies because of their own problems in the recession. One of Daf's most important suppliers, Thyssen Stahl, said

it was continuing to make liveries to Daf in the Netherlands. "We have no plan to stop being a supplier," said a spokesman for Germany's biggest steel producer. "I can't imagine that any steel company could do that at the

Daf, in comparison with other truckmakers, is a relatively integrated producer, with a big share of components made in-house. "Its policy tends to be 'make' rather than 'buy'," said Mr Edward Hadas of Morgan Stanley. Daf makes most of its

engines itself, although

Rockwell, the US-owned industrial group.

Cabs are supplied by Motor Panels, a long-established UK

ducer, while axles are mainly

made in-house at Glasgow -although some are made by

supplier of automotive bodies, which is part of the Mayflower Corporation, a UK holding company. Other big name sup-pliers to Leyland Daf include GKN, the big UK vehicle parts group, which supplies drivelines for trucks and some

There are also smaller component suppliers serving Daf's manufacturing plants, such as Washwood Heath in east Rirmingham.

Suppliers were yesterday deciding on the best immediate steps to take. At Motor Panels, deliveries have been suspended until the situation is clarifled, said Mr Merrick Taylor, chairman of Mayflower's Automotive Products Group.

He could not envisage a situation where Daf would just disappear. "People will be keen to pick up parts of the business. To have such a large share in a very important market is very attractive.

Cummins, which makes Dafbadged engines for the 45 Series at Darlington, said Leyland Daf was a "fairly major" customer in the automotive area. But Cummins pointed out that the impact of Dar's decision was not quite the same for a broadly-based supplier, such as Cummins, as for companies that served only the automotive industry.

New rules depress Rank figures

By Michael Skapinke and Andrew Jack in London

THE RANK Organisation, the diversified UK leisure group, said yesterday that under new accounting standards which take effect in June. its 1992 earnings per share would have been 6.8p rather than the 37.8p

The disparity results from the new standard's different treatment of extraordinary items, profits and losses on disposals of businesses, and property revaluations

Rank's announcement was shrugged off in London, Finan-

BBV drops 19.9% to Pta81.1bn

By Tom Burns in Madrid

BANCO Bilbao Vizcaya (BBV), Spain's biggest private bank, resterday reported a 19.9 per cent drop in net profits for 1993 but will increase its dividend because of an improvement in its core banking business.

BBV blamed the lowered profits of Pta81.1bn (\$71m), against Pta101.2bn in 1991, on a 42 per cent drop in extraordinary income.
The bank earned Pta70.4hn

through non-banking business in 1991, chiefly through the disposal of two subsidiaries. How-ever, this fell to Pta40.2bn last

from ZF, the big German pro-

Mr Emilio Ybarra, BBV chairman, justified a Pta6 increase in the dividend to Pt169 per share on account of "a tremendous improvement" in the bank's operating profit, which rose 11.1 per cent to profit, up 8.6 per cent to Pta74.2bn.

BBV raised its provisions for writedowns and bad debts by 47.6 per cent to Pta55.8bn. He said the bank had put behind it the problems of its foundation merger in 1988 hetween Banco Bilbao and Banco Vizcaya and said it was on line for sustained growth.

Last year, the BBV group increased its share of the banking sector's deposits and other borrowed funds by 1,25 per cent to 14,29 per cent. Bad debts grew 15.7 per cent against an average of 50 per cent in doubtful loans for the Spanish financial sector as a

Operating expenses declined

REPORTS RISE IN 1992 SALES AND INCOME

+7.2% Net income + 5% Operating income +7 % Cash Flow +7%

Against a backdrop of strained economic conditions worldwide, provisional consolidated results reported by BSN show a marked and

From a total FF3,445 million in 1991, net income (excluding non-recurring capital gains on the sale of champagne operations) rose by slightly more than 3% in 1992. This came despite devaluations of the lira, the paseta and sterling, and despite the impact of new taxes in Italy. Operating profit, before interest expense and tax, increased by around 7% as did sales.

Cash flow is set to reach some FF7.400 million, up approximately 7%. Not cash flow available after capital expenditure should exceed FF3.700 million, equal to more than 5% of sales.

The BSN Group's consolidated sales totalled FF70.8 billion in 1992, which is 7.2% higher than the FF66.1 billion figure recorded in 1991.

GLOBAL GOVERNMENT PLUS FUND LIMITED

International Depositary Receipts

issued by

Morgan Guaranty Trust Company of New York Clobal Government Plus Fund Limited has announced that in accordance with the Company's Bye-laws, its Board of Directors has resolved to suspend the operation of the Company's quarterly stock repurchase arrangements. The cumulative effect of the quarterly stock repurchases, which have continued since the Company inception, has been to significantly reduce its assets and accordingly increase its expense ratio to a level that is much higher than other global bond funds. If quarterly stock repurchases are not suspended the size of the Company would be croded to a level where it would

eventually be uneconomical for the Company to continue. At the Company's forthcoming Annual General Meeting scheduled to be held on March 12, 1993, shareholders will be asked to vote upowhether to wind up the Company. If shareholders decide not to wind up the Company at this meeting, the Board of Directors intends to continue the suspension of the quarterly stock repurchases subject to a shareholder vote on whether to wind up the Company being taken at each succeeding Annual General Meeting.

ARGENTARIA.

BANKING ON STRENGTH.

Argentaria is the brand name of Corporación Bancaria de España, one of Spain's largest and strongest banking groups.

It was formed in 1991 to bring together the main

Spanish State-owned banks and financial institutions.

The purpose?

Marty i

singgerente etc. 1

湖和12:1

1 mg - 7

To unite them into a major, commercially managed, banking and financial group, to permit them to realise their full potential and to exploit the synergies between them.

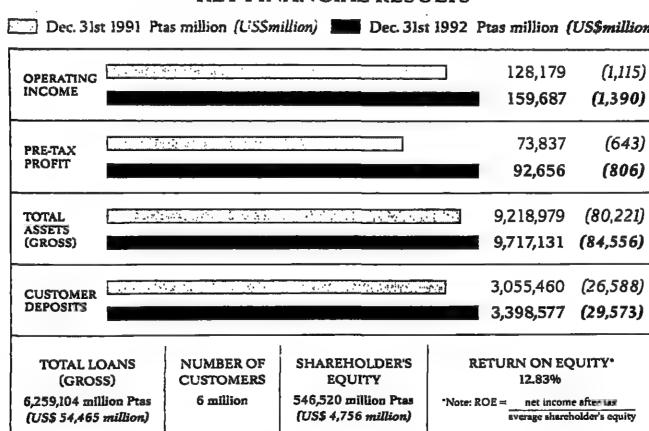

Individually, many of the companies within the Group are established leaders in their own markets, some of them having been in business over 100 years.

Together, they form a powerful banking group, well able to respond to and anticipate the changing financial markets in Spain and beyond.

With assets of 9.7 trillion pesetas, the Group represents approximately 12% of the banking system in Spain.

With 547 billion pesetas of shareholder's equity, it enjoys one of the strongest capital ratios of any Spanish bank. It serves over 6 million customers through a network of around 3,000 branches and other sales points in Spain. It acts for 96 of Spain's top 100 companies and has

KEY FINANCIAL RESULTS

(Dec. 31st 1992 conversion US\$1 = Ptas 114.92)

a corporate client base over 100,000 strong.

financial services.

It finances over 17% of all Spain's home loans, is the largest pension fund manager in the country and has

a full range of current accounts, savings and investment plans, debit and credit cards and other

Its operations are focused on Spain, but it has an international reach through branches, offices and subsidiary banks in 28 countries and over 1,100 correspondent banking relationships.

As the financial results demonstrate, the Group has made substantial progress in less than two years.

And Argentaria is ready to build on its strengths.

To reduce already favourable cost ratios

by rationalisation and redeployment within the Group; to create a single, Group-wide information technology base; to cross-sell services to its customers; to develop and introduce new services; and to strengthen margins.

With a strong commercial base, a clear direction and committed, commercially driven management, Argentaria is banking on strength.

ARGENTARIA

Corporación Bancaria de España

Tenneco returns to the black in fourth quarter

By Martin Dickson

TENNECO. the conglomerate in the throes of restructuring, yesterday reported fourth-quarter net income of \$35m, compared with a net loss of \$26m in the same period of 1991. Operating per-formance was better at all the group's six divisions, although its J. I. Case farm and construction equipment business

remained in the red.
The net income figure, which worked through at 21 cents a share, against a loss of 24 cents a year ago, included an extraordinary loss of \$13m, while the 1991 period involved a \$5m loss from discontinued operations. Net income from continuing operations was \$47m, compared with a loss of \$204m, and revenues were 8 per cent lower at \$3.3bn.

The company's improvement dates from the arrival of Mr expected another much

Michael Walsh, who took over as chief executive at the start of last year. Mr Walsh, who revealed last month that he was suffering from a brain tumour, said the 1992 turnround was "but the first phase of a long-term transformation of this company".

For the year as a whole the group produced net income of \$292m, or \$1.92 a share, including a gain from discontinued operations of \$71m and a \$12m extraordinary loss. In 1991, it lost \$732m, or \$6.09, including restructuring charges, gains on asset sales and a \$40m loss from discontinued operations. The natural gas pipeline operations reported fourthquarter operating income of \$111m, up from \$99m, excluding a gain on asset sales. The

improvement was due to

increased volumes, higher

rates on the nipeline

system and cost controls. It

improved year in 1993. Case narrowed its fourthquarter loss to \$94m, compared with a loss of \$227m in the same period of 1991, despite a 32 per cent cut in production levels. The company attributed this to the fact it had stopped being the industry's leading discounter, while also making continued cuts in operating costs and headcount.

It said it would cut produc tion 18 per cent in the first quarter, compared with the same period of 1992, to keep inventories in line with market conditions, and expected a loss for the period. However, it aimed for Case to at least break even for 1993 as a whole.

The automotive parts business tripled its operating income from \$18m to \$54m in the quarter, while shipbuilding was up from \$49m to \$61m, packaging from \$21m to \$64m and chemicals made \$23m.

All US companies have to dopt the new accounting standard, but GM's charge is expected to be by far the higgest of any corporation, because of both the company's size and the age profile of its

The company

charge of

\$20.8bn

By Martin Dickson

GM streased the charge -which works through at \$33.38 a share, and will be applied retroactively to January last year - is a non-cash item which will not affect the company's cash flow or ability to pay dividends. However, it will cause a major deut in the equity on the company's balsince sheet.

The accounting standard, FASB 106, involves changing from a system of recognising the cost of retiree health benefits when the money is paid out, to a system of recognising the expense when the obliga-tion is incurred. Companies could choose either take a charge for catching up on past obligations in one go, as GM has done, or amortise the cost

over 20 years. Mr Richard Wagoner, chief financial officer, said GM had tecided on a one-time charge. Companies also have an additional ongoing annual charge, which GM said would amount to \$1.4bn, or \$2.05 a share, in 1992.

The size of the charge was no surprise to Wall Street, since GM had signalled that it faced an obligation of roughly this size. The only question was whether it would take it in one go, or over 20 years. Mr Wagoner said GM continned to be encouraged by recent trends in its loss-making North American operations and continued to aim for

break-even there in 1993 before interest, tax and FASB • GM also elected two new non-executive board members: Dr Louis Sullivan, president of the Morehouse college school VERIS. of medicine who was health secretary under President Bush; and Mr John Bryan, chairman of foods group Sara Frankfurt airport puts

Strong growth at GTE, Sprint

By Martin Dickson

TWO leading US telecommunications companies, GTE and Sprint, yesterday reported double-digit underlying growth in fourth-quarter earnings.

Sprint, the third-largest long-distance operator, reported a 19 per cent increase in fourth-quarter net income, from \$38m, or 45 cents a share, to \$117m, or 53 cents, on revenues which rose 10 per cent to \$2.41bn.

GTE, the largest local telephone group in the US, reported net income of \$417m. or 44 cents, down from \$515m, or 57 cents, a year ago. However, the 1992 figures included one-time after-tax charges of \$100m, or 11 cents a share, including \$48m for the sale of its electrical products business

Earnings per share from continuing operations, excluding accounting changes and a one-time gain on the sale of cellular properties, rose 10 per cent.

GTE reported 1992 income from continuing operations of \$1.79bn, or \$1.95, including a \$137m after-tax charge for a change in accounting for health benefits.

In 1991 the company reported income from continuing operations of \$1.53bn, or \$1.69. Revenues totalled \$19.98bn, up

Sprint's local telephone operations reported operating income of \$160m, down from \$164m, on revenues up 7 per cent to \$766m.

The company said the figures were affected by increased costs associated with the upgrade of its customer

billing system.

For the full year, Sprint reported net income of \$457m, or \$2.07 a share, compared with \$368m, or \$1.68, in 1991. The figures were helped by a change in accounting standards which added 17 cents a share, while there was a 3 cents charge for early retirement of debt. Revenues were up 5 per cent

securities house By Richard Waters

SOCIETÉ Générale has bought out the remaining 19.7 per cent of Société Générale Strauss Turnbull, the London-based securities house which it has been trying to build into a broad-based trading, research and derivatives firm.

The purchase, understood to have cost less than £4m, (\$6.04m) was described by SGST executives as part of a long-term move by the bank progressively to take on full ownership of the firm. It did not signal any change in direction, said Mr Paul Tisch, chief

executive. The bank's stake has grown since it first took 55 per cent of Strauss's Rurobond arm in 1980. In the mid-1980s. it took the maximum permissible 29.9 per cent in the the firm's equity operation. Hambros Bank held a similar stake, but sold its interest in 1991.

Mr Derek Strauss, son of Mr Ronald Strauss, one of the founders of the original Strauss Turnbull partnership and himself holder of 5 per cent of SGST, said he would remain with the firm, along with the other directors.

Thai carrier blames higher costs for fall

By Victor Mailet in Bangkok

THAI Airways International, the partially-privatised national airline, yesterday blamed higher costs and increasing competition for a sharp fall in profits in the first quarter to December 31,

Thal announced that net profits fell to Bil20m (\$4.7m) in the quarter from Bt792.2m a year earlier.

In a statement to the Thai stock exchange, the airline said operating expenses rose 8.32 per cent over the year, while yields were lower than expected because the airline decided to maintain market share by lowering fares on some routes. That said there was strong competition in Asia from new airlines such as Eva and Aseana.

6

Thai said it would cut costs by suspending some investments which would not affect earnings, and would introduce marketing strategies such as frequent-flier programmes.

Sharp increase in earnings at Siam Commercial

SIAM Commercial Bank has followed other Thai banks in announcing sharply increased earnings for last year.

Net profits rose 56 per cent to Bt4.18bn (\$163.7m) in 1992 from Bt2.68bn a year before, while earnings per share rose to Bt109.51, from Bt82.87.

Like all Thai banks, SCB has profited from the wide gap between deposit rates and lending rates in Thailand. a phenomenon that the commercial banks have collectively been able to sustain, in apite of quiet pressure from the central bank to narrow the

SCB's interest income rose 2 per cent last year, while its interest expense fell by 13 per cent, resulting in net interes income growth of 49 per cent. However, some brokers expressed disappointment that SCB's net interest income as a proportion of average assets 3.7 per cent, lower than that of some of its competitors.

Bangkok Land in 43% advance

BANGKOK Land, the property developer which became the largest company on the Thai stock exchange at its listing a year ago, has announced a 43 per cent rise in consolidated net profits for the first nine months to Bt3.52bn (\$138m). Profits in the third quarter to December 31 rose by 31 per cent to Bt1.25bn.

Oversupply has brought prices some Bangkok residen-tial property prices down but Bangkok Land has concentrated on the relatively buoyant low-cost housing market. The company is looking to projects in mainland China for

some of its future profits.

Japan's Daihatsu in Malaysian car joint venture

By Kleran Cooks in Kuala Lumpur

MALAYSIA'S ambitious programme of industrialisation took a step forward yesterday with the signing of a joint venture deal between Malaysian and Japanese companies to build the country's second car plant

Daihatsu Motor Company of Japan will build a 660cc minicar in partnership with three Malaysian partners and Mitsui. the Japanese industrial and trading conglomerate. The initial cost of the project is put at M\$400m (US\$153m).

Malaysia already produces more than 100,000 Proton cars a year in a joint venture with Mitsubishi of Japan.

Under the terms of the jointventure agreement, Daihatsu will take a 20 per cent stake in the project, the local Daihatsu distributor 5 per cent and Mit-

sui, 7 per cent. The Malaysian partners are the state-owned Permodalan Nasional - which together with its listed subsidiary, UMW Holdings, will control 48 per cent — and Med-Bumikar Mara, a newly-formed Malaycontrolled company, which will have a 20 per cent stake

the existing Daihatsu Mira model, will be built at a plant now being constructed outside Kuala Lumpur. The first car is scheduled to roll off the assembly line in

Initial production at the plant is put at 20,000 vehicles a year, subsequently rising to 45,000 units.

As with the Proton, launched in the mid-1980s, the driving force behind the new car project is Dr Mahathir Mohamad. the Malaysian prime minister.

However, many question the need for a second national car.

The new car, to be based on particularly at a time when the Malaysian economy shows signs of slowing and sales of Protons in the highly-protected domestic market are falling. Dr Mahathir says the new car will provide a cheaper

alternative to the Proton. A standard Proton now costs about M\$33,000 on the domestic Malaysian officials say that

the new car will be given various tax incentives and protection - including exemption from duty of components imported from Japan - and will not cost more than

The future of the new car venture was in doubt for much of last year, apparently due to Daihatsu's insistence that its executives fill important management positions in the proj

At a signing ceremony yes-terday, Mr Takashi Toyozumi. Dalhatsu's president, said his company was committed to transferring technology to its Malaysian joint-venture Dartmers.

Dr Mahathir is reported to have been dissatisfied at the slow rate of technology transfer from Japan in the Proton

Spanish 10-year bond contract

By Tracy Corriger

THE London International Financial Futures and Options Exchange (Liffe) is preparing to launch a new 10-year Spanish government bond futures contract which will compete directly with a contract on Meff RF, the Spanish futures exchange based in Barcelona. Liffe's decision to launch a rival contract was sharply critcised by Mr Jose Luis Oller, Meff RF's chief executive. "We think it is the wrong policy for a market which is not very large," he said. "[Liffe is] going to segment the market and split the liquidity."

Meff's 10-year contract currently trades around 6,500 contracts a day, while its threeveer contract is hardly traded. Liffe argued that the new contract would be positive for the market. "The listing...will increase international participation in the 10-year Spanish ent debt market, widening distribution and hence potentially contributing to a reduction in the funding cost

of this debt," said Mr Nick Dur-

lacher, Liffe's chairman. Liffe already trades contracts listed on other domestic exchanges, such as German bund and Italian bond futures. The new Liffe contract, which starts trading on March 10, is designed to tap interna-tional interest in the Spanish government bond market. which is recovering after a severe din last year. Foreign holdings currently account for around 20 per cent of the mar-ket, according to Bank of Spain figures, down from around 33 per cent a year ago.

International participation is expected to recover further. Of all the high-yielding markets, Spain has most of the right credentials," according to Mr Steve Major, an economist at Crédit Lyonnais Securities. The introduction of the Liffe contract is expected to encourage spread-trading between markets, using other govern-

ment bond futures listed on Liffe. The move is also likely to promote the development of a more active repo market in Spanish government bonds, traders said.

Credit Suisse wins mandate for \$500m offering from IADB

By Tracy Corrigan and Antonia Sharpe

THE Inter-American Development Bank yesterday launched its expected \$500m issue of 10-year Eurobonds. after a fierce round of competitive bidding among banks for

INTERNATIONAL BONDS

the mandate to arrange the

Credit Sulsse First Boston was awarded the mandate to arrange the deal, which was priced to yield just 18 basis points more than the 6% per cent Treasury due 2002. Dealers were not surprised by the aggressive pricing of the offer-ing, given the level of competition among potential underwriters. The bonds looked expensive compared with 10year paper for the Asian Development Bank, trading at a liberalisation of capital move-

yield spread of 21 basis points. However, there is a lack of paper trading below par, fol-lowing the recent rally in the US Treasury market. Dealers reported some demand from Asia, but said the deal would take some time to place.

Meanwhile, Italy is reported to be considering launching a large dollar transaction, total-ling \$2bn to \$3bn, following its recent DMSbn Eurobond, However, dealers said such an issue would have to be carefully priced, as investors remain nervous about the credit.

The Portuguese escudo bond market was tapped for the first time since last April by the which launched an Esc10bn five-year bond. An official at Espirito Santo-Sociedade de Investimentos the lead manager, said the con-

vergence of interest rates

between the Euro-escudo and

the domestic escudo since the

ment in Portugal last December made the issue attractive to domestic investors. The KIB bond was priced at

100.75 to yield 12.53 per cent, which compared with a yield of 12.47 per cent in the recent auction of Portuguese government bonds of a comparable maturity. The bonds were trading at 99.90, well inside total fees of 1% per cent. Two further Canadian dollar

issues, totalling C\$470m, for a Japanese government-backed agency, and the Austrian government-guaranteed Asfinag added to the supply in an already over-crowded market. Syndicate managers said distribution was slow since there was little to choose between the issuers. More than Cilbn has been issued since Friday. Dealers said the 10-year paper from Japan Finance Cor-

poration for Municipal Enter-

prises went well, as its yield

spread of 43 basis points over

comparable Canadian govern-

1000 ment bonds was more gener-ous than other recent issues. By contrast, the syndicate on Aisfmag's 10-year offer, which

sovereign Eurobond this year to open the way for public and private entities to tap internaing to finance minister Mr yielded 40 basis points over, had still not broken by last Rudolf Hommes, Reuter night.

Northern Foods launches £91.28m debut issue

By Antonia Sharps

NORTHERN Foods, the UK dairy and convenience food company, yesterday launched the first sterling convertible bond issue for two months, taking advantage of rising UK share prices and falling interout rates.

Strong demand enabled the lood company to increase the size of the issue, which marked its debut in the international capital markets, to £91.28m

from £85m. The coupon was set at 6.75 per cent, the low end of the indicated range of 6.75-7.00 per cent, and the conversion price was set at 826p a share, representing a premium of 18.11 per cent over the ordinary share price at the time of pricing. This came in at the top of the indicated range.

Mr Martin Clark, finance director of Northern Foods, said the issue was aimed at repaying short-term debt of £120m linked to last year's £359m acquisition of Express Dairy and Eden Vale from GrandMet. "The issue also improves the company's debt [maturity] profile," he said.

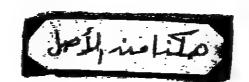

The 15-year issue, redeemable after five years, represents 5 per cent of Northern Foods' share capital. The bonds were priced at par but rose to 101% in grey market trading.

Convertibles dealers were hopeful that Northern Foods' issue heralded a pick-up in a market which has been virtually moribund for the last 12 to 14 months, during which high interest rates and low share valuations discouraged finance directors from using this sort of financing.

COMPANY NEWS: UK

Hoping to put profits on the line

Binatone's plans will bring it into competition with Amstrad. Paul Taylor reports

BINATONE Electronics, the privately-owned electronics group run by Mr Gulu Lalvani, is poised to broaden its product range and compete directly for the first time with companies like Philips and Amstrad in Europe's consumer electronics market.

Binatone, founded by Mr Lalvani and his brother in 1958, became the UK's leading importer of transistor radios in the 1960s. It has grown into an international group with head-quarters in Hong Kong and annual sales of between £60m and £80m focused on audio equipment and more recently on the UK market for con-

sumer telephone equipment, Now Mr Lalvani has posttioned his group to gain a larger share of the fast growing market in continental equipment, while expanding its product range to include satellite television, facsimile and video equipment

One immediate consequence of this growth strategy is that the friendly rivalry between Mr Lalvani and Mr Alan Sugar, Amstrad's chairman, who was given his first business break by Asian-born Mr Lalvani, has become more strained.

This was highlighted last month by the surprise announcement that Mr Robert Watkins. Amstrad's technical and manufacturing director and a key Sugar aide, was joining Binatone as group managing director.

Mr Watkins helped develop many of the products which fuelled Amstrad's success in the 1980s. At Binatone he will be responsible for UK and

Hong Kong operations. His first task has been to complete a business review and work out a strategy for taking Binatone from corded telephones and expanding into cordiess telephones and then into satellite systems.

In the first year he expects to increase sales by 50 per cent and launch Binatone into "three or four new product areas", beginning with a high-specification low-price cordless telephone due in September.

Binatone's design and marketing expertise coupled with its low cost manufacturing base in the Far East should give it a advantage over many

In the UK it has been targeting the consumer telephone business for more than two years and has an annual turnover of about £20m. Binatone has captured an

unrivalled 30 per cent market share under its Binatone and Dialatron brands. It also supplies equipment which is rebadged and sold by other companies such as BT. Most of its products are made in Hong Kong and southern China The timing of its drive into broader markets in Europe is

critical. The advent of the single market presented new business opportunities, as has the steady deregulation of markets nunications Meanwhile, many local com-petitors, including Philips and

Amstrad, have seen their consumer electronics business hit hard by competition from manufacturers in Japan and the

metrad in particular appears to be drifting following last month's abortive attempt by Mr Sugar to buy-out his fellow shareholders for 30p a share. However, during the attempt it became clear that Mr Sugar, who said he had run out of "blockbuster" product ideas for Amstrad, also saw the market for consumer telecommunicstions equipment as a potential growth area.

Amstrad already manufactures facsimile machines for

domestic and small business use and is developing a video-phone product with GEC Mar-

A determined push into the telecommunications equipment market would come through Betacom, the separately-quoted IIK-hased consumer telephone equipment company which became a Amstrad subsidiary

Mr Sugar has described Betacom, which has a modest £13.7m market capitalisation, as Amstrad's telephone arm. He has moved quickly to consolidate his grip over the lossmaking company which has been run by Mr Ken Ashcroft, Amstrad's former corporate finance director, since last July.
Mr Ashcroft has instigated a

rationalisation of Betacom's product range and refocused its business on the UK market. One consequence of Amstrad's ownership is that its 49 per cent stake in Loewe Betacom, a profitable German joint-venture, was put on the auction block. In November it was acquired by Binatone for about

The joint venture in which BMW and Mitsubishi are its partners, was founded in 1990 with the aim of supplying equipment to the newly-liberalised German telephone market. In its first full year of bust-

ess sales reached a profitable DM20m (£8.4m) and during the first 10 months of last year it increased its share of the German market to 10 per cent with a 50 per cent increase in sales.

The joint venture is an important plank in Binatone's new European strategy, Mr Laivani believes there is sub-stantial growth potential in the German market itself, and that Binatone will be able to apply the lessons it has learned from the deregulation of the UK

He also sees the renamed

Gulu Lalvani: rivalry with Alan Sugar becomes more strained

Loewe Binatone as a spring-board for telephone equipment sales across continental Europe where telecommunications liberalisation is expected to fuel a fast growing consumer equipment market.

n the UK the telephone equipment market is one of the few areas of the economy to have shown growth in both volume and value throughout the recession. Sales of telephone answering machines, for example, increased by 30 per cent last year and Binatone more than

doubled its sales. This year Binatone will concentrate on boosting cordless phone sales in the UK. How-

ever, there is little doubt that the UK market for consumer telephone equipment, worth £158m at end of 1991, is maturing and margins are growing thinner. Over the next three to five years the best growth prospects for may well lie in continental Europe.

If so Amstrad, the share price of which is languishing around 25p, and Botacom, the price of which has climbed back to 174p recently having fallen to a low of 131 ap in October, may have to reconsider their strategy yet again.

By that stage investors could have another choice. Mr Lai- & vani said he would consider bringing Binatone to the market once the recession is over.

Shareholders approve Pepe rescue measures

By Nigel Clark

ACTIONS to try to safeguard the future of Pepe Group, the jeans designer and distributor, have been approved by shareholders. As a result the USM quotation has been cancelled.

Under the open offer of 199.9m shares to raise 29.1m. applications were received in espect just over 1m shares or 0.5 per cent. The offer was underwritten by SML, a company set up by its new management and Novel, the Hong Kong textile group, which now has a controlling interest. SML has an inventive option

to buy up to 75 per cent of Pepe's equity if and when the company's market capitalisa-

still a probe

ctured Misk

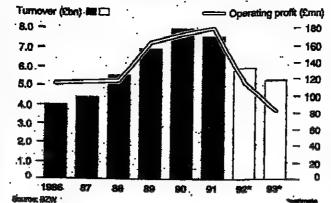

BRITAIN'S 10 biggest construction companies are expected to announce provisions of between £650m and £700m when they publish annual results later this year, according to latest City fore-

Warburg Securities and Barclays de Zoete Bevan say the scale of the provisions, following substantial write-downs last year and in 1990, could seriously undermine the ability of some companies to raise capital to finance a recovery. Total provisions from the sector may top £1bn when write-downs from small and

medium housebuilders and construction companies are The biggest provision, total-ling £250m, is expected to be made by Tarmac's construc-

tion, property and housing operations,
Wimpey, following warnings
issued by the company last

month, is expected to make provisions of £120m. Taylor Woodrow is expected by both Top eight contractors' performance

of about £65m. Costain, Amec and Trafalgar House are also forecast to

make sizeable provisions. The findings provide further bad news for banks which lent large sums in the late 1980s to finance commercial property and housing developments which in some cases have fallen below the value of the original loan.

Mr Mark Stockdale, construction analyst for Warburg, said: "The bulk of the provi-

sions this time are likely to be against commercial property developments. This compares with previous years when companies mainly were writing

down housing developments." He estimated that the top 20 builders in the four years between 1989 and 1992 between them wrote-off 2800m from the book value of housing land and

Mr Amarjit Chhina, construction analyst with Barclays de Zoste Wedd, said: "The provisions will make already dam aged balance sheets even weaker. It will make plans for any refinancing even more dif-

Construction companies, he says, will need cash to replenish housing stocks and land banks as the housing market starts to pick up.

Banks, however, may be reluctant to lend more to operations which have already seen their book value reduced by many millions of pounds as property and housing prices have fallen sharply. Shareholders, for the same

reason, may be reluctant to support a rights issue particu-larly for those construction companies which had issues in 1991, ostensibly to finance a recovery. In many cases this money has been used to offset cash losses and reduce borrow-

ings. Construction companies will also find it difficult to use their contracting operations to generate cash with UK construction output forecast to fall by a further 2 per cent this year fol-lowing falls of 6 per cent and 9 per cent in the two previous

owns 36 per cent of Charter. Mr Jeff Herbert, Charter's managing director, has dismissed analysts' suggestions that his relationship with the former Minorco management was situined and had contributed to his desire for Charter to sell its 38.4 per cent of JM . He said that the working relationship between Charter and Minorco had always been 'excellent" and that the two former joint managing directors of Minorco, Mr Tony Lea and Mr Roger Phillimore, had become his personal friends.

Johnson **Matthey** share sale details soon

By Kenneth Gooding, Mining Correspondent

DETAILS OF the sale of £250m-worth of shares in Johnson Matthey, the platinum marketing company, by the Charter Consolidated conglomerate are likely to be made known next week.

A clue to the timing came when Johannesburg Consolidated Investment, the South African mining finance house which is widely expected to play a crucial role, possibly by buying 29.9 per cent of JM postponed the announcement of its annual results. JCI said the board meeting

at which the figures were to be approved would be held towards the end of next week" because that would be more convenient.

All the companies are perceived by the investment community to be part of an extended "family" controlled by the Anglo American Corporation of South Africa. Analysts suggested that, while Angle might be willing to see Charter cut adrift, it would want to maintain an influence

ation, De Beers, between them own more than 60 per cent of Minorco, the group's Luxembourg-quoted offshore investment arm, and Minorco

Fyffes tops expectations with advance to I£28.5m

By Tim Coone in Dublin

FYFFES, the Dublin-based fruit wholesaler, reported a 5.26 per cent increase in pretax profits from I£27.1m to I£28.5m (£29.3m) for the year to October 31, on turnover down 13.8 per cent to I£524m.

The company said it believed the results represented "a significant achievement in the light of more difficult trading conditions this year", a view endorsed by analysts in Dublin who said the results were slightly ahead of expecta-

Sales volume had actually increased, the reduced turn-over reflecting low fresh produce prices in the UK market, and stiff competition in the European banana market.

Mr Carl McCann, group finance director, said that the withdrawal of sterling from the ERM last September and its

subsequent devaluation had also deflated the profit and turnover figures, "as most of our business is done in ster-

ling".
He said that the translation difference was 16 per cent, the results in 1991 being calculated at an exchange rate of 92p to the pound, while the 1992 results were calculated at 109p to the pound.

The company said it expects sales in the mainland European market to grow in 1993 as a result of its deal with Saba Trading in Sweden to supply "a substantial part of their banana requirements under the Fyffes label" and which also allows Fyffes to take a stake in Saba's Dutch and Spanish distribution subsid-

The company also drew attention to the fact that it has now obtained the right to use the Fyffes trademark worldwide "which is essential to the development of our international business in the new single market in Europe"

Mr McCann said that the new EC banana regime, which will come into force in July, "may make it more difficult to get direct volume growth, and will mean we will have to focus more on acquisition".

The company has a IC100m cash hoard, most of it currently on deposit in the Dublin market where it has been able to attract high interest rates during the currency crisis. Brokers in Dublin said this

should improve profit figures for 1993, as should the punt's devaluation this week and improved trading conditions throughout the EC.

Earnings per share were 5.9p (6.73p) and a 10 per cent increase in the final dividend to 0.8978p is recommended, making a total of 1.2527p.

YRM incurs deficit of £498,000

YRM, the architectural group, yesterday announced a pre-tax loss and a cut in the interim dividend in line with its warning in November.

For the six months to October 31 the pre-tax deficit was £498,000 on turnover of 27.89m, compared with a profit of 2584,000 on sales of £10.2m.

The interim dividend is 0.5p (1.85p) the directors, who control 47 per cent of the shares, have waived their entitlement reducing the cost to £35,000 (£318,000). Losses per share worked through at

2.78p (earnings 2.54p).
Mr Tim Poulson, chief executive, blamed fierce competition in a much reduced construction market for the setback. This had led to a sharp reduction in the level of architects fees, damaging margins.

Losses included redundancy costs of

2282,000 (£337,000); the labour force during the past three years has been halved to

Mr Poulson said the savings in overheads, together with rents from surplus office space which had been sub-let, should put the group back in profit in the

Even so, analysts expect losses for the year to be about £400,000. Mr Poulson said the group still hoped to pay a final dividend but would not make a decision until nearer the time. Last year the final was cut from 3.35p to

2.35p, reducing the total from 5p to 4p.

The group saw little prospect of an improvement in the UK during the next 12 months. It said British clients had been slow to commission work in the first half. A number of projects which were expected to start had been delayed although some were now proceeding.

Reduction in UK commissions had been offset partially by a rise in overseas work. International commissions during the first half were almost equivalent to those won during the whole of the previous 12 months.

The Paris office, opened only two years ago, had won commissions from Air France and the French government.

The Berlin office, started lest year, had secured its first substantial commission for the refurbishment of 13 hotels in eastern Germany. Net debt at the end of October was

£1.4m, equivalent to 15 per cent of shareholders funds. Gearing was expected to remain at that level at the year-end, said Mr Poulson

By John Gapper,

Medeva enters Europe with French acquisition

By Richard Gourise

MEDEVA, the pharmaceutical company, yesterday announced the acquisition of Institut de Recherche Corbiere, a French company that distributes a range of ethical products. The acquisition is Medava's

first in Europe and will provide a platform and a sales force for the launch of other products. Medeva is paying FFr93.8m (211.6m) - FFr40m immediately in cash with the balance payable after a year. IRC shareholders have the option to receive 81 per cent of this bal-

In addition Medeva is paying FFr16.3m over five years in bonuses and possible performance fees to directors and the sales force.

Mr David Less, finance director, said IRC directors would

be able to help Medeva with registration of its flu vaccine By Peggy Hollinger in France. The veccine, once registered, would be sold PRICE Waterhouse yesterday criticised the Stock Exchange's

through the existing sales force to general practitioners. This could open up a market, worth about £40m a year. which is overwhelmingly dominated by Institut Mercire. Based in Paris, IRC has 67

employees, and had sales of FFr50m in the year to end-December 1991. That year it lost FFr4.74m after bearing the cost of building the sales force.

Medeva said it expected IRC to be profitable and to enhance

earnings in 1993. Mr Ian Gowrie-Smith, chief executive, said the deal was consistent with the strategy of expanding the product range through acquisition and internationalising the group's activ-

al...comes at a low point in the USM's 12 year history." It was regrettable, the report continues, that the Exchange had rejected proposals to relevant the USM "with sufficient distinction and identity

to provide an alternative mar-Some 53 per cent of the 95 companies which responded to the survey - out of a total of 278 - were concerned about the potential closure of the

USM. About 40 per cent said they welcomed the changes. Price Waterhouse noted however, that those which welcomed the changes were largely longer-established USM companies. This suggested they had possibly outlived the USM and were

more prepared for a main market listing. Most companies were in favour of a second market -55 per cent as opposed to 45

per cent against. Price Waterhouse said that experience had shown a main market listing would not necessarily answer problems of

marketability. The report also noted the concern of smaller companies about the possible loss of Inheritance Tax benefits in any transition to the Official List. More than 70 per cent considered the loss of such tax

relief to be a significant obsta-"This situation is clearly unsatisfactory," the report

COMMODITIES AND AGRICULTURE

Coffee rally continues as pact negotiations labour on

LONDON'S ROBUSTA coffee ground yesterday, taking heart from an overnight close above 60 cents a lb in New York's March contract.

At the same time delegates to the International Coffee Organisation talks on a possible new agreement laboured on, with little sign that concrete progress will be announced when they close on

ICO delegates were dismayed by the March New York contract's 6.75 cent tumble to 56.05 cents a lb last week. But the plunge appears not to have fuelled any burning desire to reach agreement during the present round of negotiations. "I can't think of one thing that we have actually agreed in the last few days," one consumer delegate said yesterday.

In late trading New York was almost 3 cents ahead, while London's May contract closed \$36 up at \$945 a tonne, well above last week's low of

coffee market has been caused not by news from the ICO much the same pattern as the last few meetings, but by the weight of investment fund money being moved around in New York. But the fundamental supply and demand factors suggest that prices should be beginning to move ahead.

In a briefing paper headed "Who needs a coffee pact?" GNL, the London futures broker, suggests that even without the help of an agreement, coffee should bounce from its current oversold condition back to around 75 cents a lb on tight supply alone.

GNI points out that the Brazilian crop for the 1992-93 year (ending in April) of below 20m bags (60 kg each) represents a 25 per cent reduction on the three previous years. . . "and a 25 per cent fall in production from the world's largest producer is enough to scare any commodity market".

Yesterday a separate report from E.D & F. Man estimated Brazil's crop for 1993-94 at

most trade estimates, which have ranged between 22m and 23m bags. The news helped to support yesterday's price

According to GNI, the fall in Brazilian output will leave consumer stocks at the end of this season 25 per cent below the 1990-91 peak of 19.7m bags. "By the end of the 1993-94 season consumer inventories should be close to more normal levels of around 12m hags."
GNI believes that if good

progress is made at the ICO, "then it is possible that a major rally back to \$1 a lb is on the cards." However, the ICO has already fixed a further eting for the last week of March. The agreement runs out on March 31.

Yesterday producers and consumers were still locked in negotiation over "selectivity"
- which would determine whether three or four different sorts of coffee would be exported under a future ICO quota scheme. Producers favour four, while

consumers prefer three.

Cobalt price slide halted by Zaire crisis

BLOODY RIOTS and killings in Zaire, like those seen in the past few days, once would have sent the price of cobalt soaring because that country is the world's biggest producer. But traders said yesterday that, while the latest orgy of vio-lence in Zaire had made buyers nervous, cobalt metal prices had moved up only by between 50 US cents and \$1 a lb. Similar events in Zaire in September 1991 sent the free

market price of cohalt (a hard,

production was probably 4,500 tonnes while the rest came from various stockpiles.
"The power in the cobalt market has shifted from Africa

to Russia. There has been an avalanche of Russian material so that all last year's bad news about Zaire could not stop the cobalt price falling," pointed out Mr Nick French, a director of the Wogen Resources minor metals trading organisation.

mated 5,000 tonnes. Russian

The African producers' price set by Zaire and Zambia, where annual production is steady at about 4,500 tonnes, was cut last month from \$25 to \$18 a lb. The free market price of Russian cobalt is \$11 to \$12 a lb.

Mr French said: "Present events in Zaire have not change the outlook [for cobalt production there] - it remains atrocious. However, the killings have moved the story on to front pages so sentiment has been affected". Consumers were still not willing to sign long-term contracts but were no longer waiting until the very last moment to make short-term purchases, he said. Speculators had withdrawn

from the market and traders

and merchants were reluctant

hits Chicago wheat prices

Selling wave

By Laurie Morse

CHICAGO WHEAT futures tumbled in active trading as export prospects dimmed and professional traders, seeing little good news on the horizon, liquidated their wheat futures

Soft red winter wheat for March delivery was down more than 8 cents, at \$3.71 per bushel at midsession. Analysts said managed futures funds sold wheat after March futures fell below a chart support point of \$3.75.

News that Russia had recently received French credits to purchase 2.4m tonnes of European Community wheat and that the Republic of Kazakhstan has sold Russia 3.2m tonnes of wheat would limit Russia's appetite for US wheat, even if its credit problems were resolved, analysts

The Australian Wheat Board boosted its crop estimate to 15.3m tonnes, from 14.6m. but US traders said the upward revision had been expected and was not a major feature in the sell off.

Rubber talks break up without price deal

By Kieran Cooke in Kuala Lumpur

FURTHER SIGNS of discoulon have appeared within the International Natural Rubber Organisation, with the world's main producers and consumers falling to agree whether to cut the inro reference price.

The reference price, now at 207.2 Malaysian cents a kilogram, is the base on which calculations are made to determine whether the Inro buffer stock manager buys or sells

A meeting here has broken up in deadlock with neither producers or consumers prepared to compromise on a new reference price. One participant at yesterday's talks which were originally due to have concluded last Friday said that any decision had been indefinitely postponed.

Under Inco rules the reference price has to be cut by 5 per cent if the average Inro daily market indicator price over the last six months period is below the organisation's

Though natural rubber prices have flagged for much of the last few months, a recent sharp rally in prices has caused the six month average the "may buy" level. Producers, led by Malaysia, want the figure to be rounded off to 176 cents to avoid triggering a

price cut. Consumers, led by the Euro-

of increasingly bitter rows between the two sides within Inro. The most vexatious issue at present is whether or not to have a new international rub-

The present agreement expires at the end of this year and producing countries have warned that unless progress towards negotiation of a new pact can be achieved by March, Inra could collapse. Producers would then bring in their own

recent weeks by fears of supply shortages and a strengthening of demand from consumers. An early wintering season - the period of low latex production - has been reported from several producing areas in southeast Asia, a region that accounts for nearly 80 per cent of global natural rubber pro-

Mauritanian fishing flounders for lack of investment

Alastair Guild reports on the problems holding back a potentially rich source of export earnings

some of the world's richest fishing grounds. A profusion of plankton, where the Canary current from the north meets the Guinea current from the south off the northern city of Nouadhibou supports species ranging from pink spiney lobsters, octopus and squid to sardines, horse mackerel and tuna. But under-investment in vessels and insufficient data about fish stocks remaining threaten to undermine the industry. The novelty of fishing for

most Mauritanians could help

vessels lie rusting at anchor in

to explain the lack of investment. Less than 30 years ago, more than 80 per cent of the people, mostly Moors, led a nomadic, or semi-nomadic way of life, based on raising live-Meanwhile the rubber marstock. "We've traditionally ket been given new life in looked more towards the sand than the sea," says the managing director of one of the country's largest fishing companies. The country didn not have its own fishing fleet until the beginning of the 1980s. It started with 150 boats, but only 50 are now operational, and many of those only just. Many

> The banks, meanwhile, are owed an estimated 13bn ouguiya (£84m) by the fishing industry, borrowed for the purchase of new boats, an amount

which represents 40 per cent of the credit in the Mauritanian economy. The Union Bank for Development, one of the main lenders to the fishing industry, is likely to have its activities radically curtailed under the World Bank and IMF reforms.

Mauritanians, it seems, generally prefer to invest hard currency from fish sales in banks and businesses abroad, particularly in the Canary Islands and mainland Spain. Some figures suggest that the Mauritanian fishing industry channels US\$100m a year through Las Palmas alon

Most of the large industrial boats are owned jointly by Mauritania and other countries, such as Libya, Romania, Russia or Algeria. "Those countries don't have the money to invest in boats and neither, it appears, does Mauritania," comments one foreign dinlomat who has taken a close interest in the fisheries sector. The cost of bringing the Mauritanian fleet back up to strength has been estimated at UM75bn (UM is the abbreviation for the ouguiya) or nearly

future of the industry is the lack of accurate information on fish stocks. According to figures published by the government's Oceanographic and Fisheries Research Institute WORLD COMMODITIES PRICES

Just as worrying for the

(CNROP) in Nouadhibou, the numbers has been so disaslevel of fish stocks has been static in recent years. Foreign scientists, on the other hand, believe the numbers of some species to be critically low. The Mauritanians don't know how many trawlers should be allowed in their waters. whether to permit 500 or 5,000," says one marine biolo-

The Japanese recently reported to the Mauritanian government that the octopus would become threatened if pipes - used mostly by smaller, traditional boats continued to suck up immature as well as adult fish. The total octopus catch of 21,000 tonnes last year was worth \$75m in export markets, principally Japan, out of total fish exports

Mauritanian boats are themselves reporting failing catches, "A vessel of average size used to land over 10,000 boxes of octopus, cuttlefish or squid after two months of fishing," says Mr Moulaye el Hassen, founder and managing director of Somacopp, a Mauritanian company with three industrial vessels. "Now, if you're lucky you can expect about 5,000 boxes after 70 days

Lobsters were once so plentiful that they were fished with nets. The decline in lobster

Cests 1686.5-7.5 3 months 1659-9.5

trous that Portuguese boats now consider lobster fishing to

be virtually uneconomic. Log books listing catches are often not returned to the DCP. the Mauritanian fishery control authority. The main culprits seem to be Spanish and Portuguese captains. The absence of effective surveillance and punishment of vessels infringing quotas and net sizes is another concern. Of penalties totalling UM450m imposed over the last four years UM156m remains unpaid.

oreign governments and multilateral agencies have been insisting on wide-ranging reforms of the Mauritanian fishing industry in exchange for major investment. For example, Mauritania should be eligible for a grant of Ecu9.6m (27.85m) from the European Community, as com-pensation for a fall in 1990 cephalopod exports, under the Stabex provisions of Lome Convention, a trade and aid agreement with former colonies of EC members. This is likely to be used partly to improve management within the CNROP. Foreign exchange will be made available for the purchase of inputs, mostly fishing sear and spare parts, but only to those boat owners who can show they are not indebted

to the Mauritanian banks and can deposit the ougulya equiv-

Germany has invested nearly DM16m (£6.7m) since 1989 in the purchase and modernisation of the Priscilla, a 54-metre, former Scottish surveillance vessel. Rechristened N'madi, or hunter, it is crewed by Mauritanian sailors and carries German, Danish and British fishery experts. The Germans have also funded an on-board computerised information system for the N'madi.

The French government has agreed to provide a second patrol vessel and to finance two marine biologists to work in the CNROP for three years. It is also interested in contributing to the financing a shipyard and an enlargement of port facilities at Nouadhibou. From July last year, at Ger-

man and French insistence, the DCP assumed responsibility for co-ordinating maritime surveillance, managing navy, air force, customs and fishery patrols. Germany recently agreed to fund a marine biologist as an interface between the DCP and the CNROP, to improve the CNROP's grasp of fish stocks. Meanwhile, the French are requesting that the Mauritanian law requiring a minimum mesh size of 70 mm be more strictly enforced, that all boats display special numtheir name and that there should be tighter monitoring of infringements and the collection and use of fines.

Mauritania still lacks the capacity significantly to add to the value of fish caught. This final piece in the jigsaw investment in major on shore processing plant - would become more likely should there be a relaxation of the investment climate climate in Mauritania and, in particular, Central Bank regulations for the release of hard currency. At the end of last year the Brussels-based Centre for Development and Industry held the first of a planned series of seminars to promote industrial partnerships in the

fishing sector. Investment of some \$7.5m is needed to improve existing but basic on-shore fish processing plant, to bring it up to standards of hygiene now required by the EC, and to make new products such as fish blocks

Mauritania's fish exports are expected to rise sharply in the coming year with West Africa seen as the most promising market for the pelagic catch. If Mauritanians themselves develop a taste for fingers, fillets and steaks, perhaps then the Moors may turn more of their attention to the sea.

Chicago

MARKET REPORT

Sterling's weakness continued to carry the COPPER market higher at the London Metal Exchange, Prices ended higher in pound terms for the sixth successive trading day with cash metal closing at £1,537 a tonne, up £15.50 on the day and £114.50 from the level ruling lust over a week ago. But virtually all of that rise reflected the currency factor. Dealers said an early rise on short-covering and options-related buying had taken the three months delivery price up to a resistance level between \$2,400 and \$2,500 a tonne. The Subsequent fall had been

cushioned by concern over the situation in Zaire, strike action in Mexico and a threatened strike in Chile, they said. Last business had three months metal at \$2,235 a tonne, up \$5 from Monday. ZINC prices surrendered some of the recent gains that had been prompted by production cut announcements. The three months price closed \$13.25 down at \$1,116.50 a tonne. Rising LME stocks and dollar strength kept

ALUMINIUM under pressure.

Optimism on base rates turns cooler

INVESTORS IN the London stock market yesterday paid closer attention to the rejections from Mr John Major, the British prime minister, of rumours that another early cut the cards. Caution over the near-term outlook for UK base rates was enhanced by trends in sterling futures and, at first, by firmness in cash sterling; a late dip in the sterling exchange rate had little imme

liate effect on equities. However, share prices opened firmly and only the continued weakness in pharmaceutical issues restrained the FT-SE 100 Index from reaching for a new peak in early trading. The day's high on the index of 2,859.7 was soon lost as the cooling of base rate hopes left the share gains of the previous session vulnerable to profit-taking. By the close, the FT-SE 100 was at 2,834.4 for a net fall of 17.2.

Trading volume remained high, with the non-Footsie stocks continuing to attract interest; deals in the non-Footsie issues made up about 63 per cent of the day's Seaq total of 854.5m shares. Monday's customer, or retail, husiness was worth £1.27bn on a Seaq total of 798.4m shares. Heavy US selling of drug industry stocks was a significant feature. In addition to underlying uncertainties over possible changes to medical funding by the new US presi-dent, suggestions that Glavo could surface in the list of rights issue prospects known to be hovering in the wings of

the London stock market overshadowed the sector. Profit-taking in market sectors which have stood out strongly this week, notably the

materials groups, was modest. Stores issues, although also marked for profit-taking. rebounded when early falls took the sector relative below

market tolerance. Construction and contracting shares, which have consistently outperformed as the stock market has been gripped by hopes for economic recov-ery and base rate cuts,

Trading volume in Major Stocks

extended their gains yesterday. The fall in the market yesterday of less than half of Monday's gain appeared to under-line scepticism in the City of London over the apparent uncertainty in official policies over base rate policies. Having been taken completely unawares by last week's one percentage-point reduction in domestic interest rates, most analysts have now reverted to

4,100 569 1,200 465 749 173 1,400 415

the belief that a further cut in rates will have to wait six weeks, until the March Budget. The cooler tone of the stock market allowed rights issue fears to reappear. Most of the names suggested were the old favourites, but many securities houses were braced for a heavy call on funds.

However, the institutions are believed to be keener to put cash into the market by way of rights issues than by straightforward investment through

the equity market. For the medium-term outlook, investment strategists continue to balance prospects between prospective returns on government bonds

Goldman Sachs, the US investment bank, warned that while EK share prices will be buoyed this year by economic recovery, equity weightings of UK pension funds will fall gradually over the next few years. Any substantial fall in pension fund equity holdings would significantly hurt share

US threat to drug stocks

STOCKS IN the international drug industry companies, par-ticularly Glazo and Wellcome, suffered selling pressure in London ahead of a press conference to be held today in Washington. The conference will highlight a report which claims that pledges by drug companies to contain drug costs have gone unfulfilled.

It will be hosted by Senator David Pryor, an established critic of the drugs industry and a Democrat who is believed to have the ear of the president. It is expected to add further weight to President Clinton's promise to review the industry. Also, Salomon Brothers removed several US drug compantes from its buy list.

Giaxo dropped 23 to 655p on very heavy turnover of 9.8m shares. Wellcome weakened by the same amount to 8530 and SmithWitne Beechum lout 15 at 482p in the "A"s and 18 at 420p

Gas placing

The placing by a leading UK securities house of a block of 5.9m British Gas ahares at 286p brought significant pressure on the shares, which closed a net

Right

7% off at 284p. The Seaq ticker revealed that the share block had been purchased at 285p

Turnover in Gas reached 14m shares, the highest single day's business in the stock since mid-December when Ofgas chairman Mr James McKinnon called for the group to be broken up.

It was thought that the block of Gas shares had been sold into the market and the proceeds switched into other utilities, notably the regional elec-

tricity stocks (recs).

The "recs" were badly mauled after last week's report from the Trade and Industry Committee on energy policy which called for the electricity distribution review to be brought forward and for a reduction in the "recs" returns on capital.

Among the best performers in the "reca" were Seeboard, 6 higher at 452p, and Eastern, firmer at 413p.

Granada hint

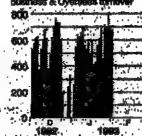

An institutional visit by Granada moved the shares smartly forward, adding to speculation that the television and leisure group is again considering an acquisition. Granada has made little secret of its desire to buy a cash-generative company and rumours have hinted at Compass, the cater-ing group, as a potential target. Compass shares have been strong performers in recent weeks, vesterday climbing 6 before falling back to 594p, up a penny on the day. Granada

rose 11 to 359p. Mr Gerry Robinson, Gran-ada's chief executive, formerly ran Compass, and confirmed his continuing interest in the catering industry by admitting Granada was looking at Gard-ner Merchant, the catering subsidiary of Forte which was eventually sold to management

in a £400m deal. The market also focused on the share price following an approuncement that Reed International is to offer its 3.66 per cent stake in BSkyB to big shareholders Granada, Chargeurs and Financial Times owner Pearson. The news means that the Reed stake and, consequently, the whole of BSkyB would receive the stock market valuation which it at present lacks. Reed shed 3 to 666n and Pearson 14 to 370p.

Stakis deal Institutional support for the Stakis recovery story was again in evidence yesterday, with a large placing of family shares being quickly taken up by large investors. The 21m shares on offer were the ones due to the Stakis family as a result of last week's three-forone rights issue. They were placed by Smith New Court in the nil-paid form at 9%p. The fully-paid closed steady at 44p and the nil-paid a halfpenny off at 10%p. As a result of the sale, the family holding will fall from around 24 per cent to 19

per cent. News of a strike at its US coal subsidiary Peabody led to

mrly nervousness over Harmon was weak in the US and 3 lower in the UK at one stage. However, Goldman Sachs argued that the strike affected less than 7 per cent of Hanson's earnings and the US investment bank advised clients to switch into the stock from international conglomer-

ate BTR. Mr Gavin Launder at Goldman Sachs said: "Hanson offers better exposure to the US recovery market than BTR, and a better yield at a substantially lower rating." Hanson shares closed only a halfpenny easier at 2570 on heavy turn-over of 11m while BTR, which was also hit by vague talk of a rights issue, fall 5 to 5530, in

trade of 4.3m. The upsurge in market activity since the turn of the year triggered further keen support for the merchant banks with significant market share. Against the overall trend SG Warburg added 15 to 615p and

Kleinwort Benson 3 to 358p. Confirmation that the recent burst of US buying of BP had boosted the US holding in the off company to 23.1 per cent led to periodic bouts of short covering in London. This, plus more defensive buying of the shares by UK institutions anxious not to be underweight in the stock, drove BP shares up 3 12m. Shell suffered from switching into HP, and closed off 4 at 569p on 4.1m traded. The recent big increase in turnover of Premier Consolidated continued with more than 15m shares changing hands and the stock edging up

¼ to 29%p. Weakness in Vodafone shares, triggered by worries about competition from Mer-cury PCN, scheduled to start up in the middle of the year, and a scare story hinting at links between cellular phones and brain cancer, was brought to an end as Vodafone stock tumped 11 to 390p.

ICI rose 4 to 1150p on currency considerations and news of a joint venture for its titedioxide unit.

However, some big dollar earners saw profit-taking fol-lowing sharp rises. Reuters fell 19 to 1404p and BAT Industries

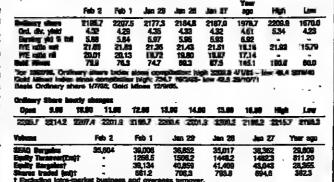

5 to 973p. Pharmaceuticals and scientific equipment group Fisons rose sharply in early trading as Credit Lyonnais Laing recommended the stock as a short- to medium-term buy. There was also a return of bid speculation. However, trimmed later. From being 10 points up, the abares closed a net 5 better at 224p.

Shares in Alexon continued to be buoyed by rumours of a predator. Most prominent among potential suitors has been Next, but company sources denied this, as did Country Casuals. Alexon said no approaches had been received. Its shares jumped 18 per cent to 88p. Next slipped 3 to 140%p, and Country Casuals

held steady at 177p.
Marks and Spencar were bought as the stores sector dipped below a significant technical resistance level. The shares added 7% to 325%p. Dixons rose 3 to 226p on the replacement of the head of its US subsidiary, Silo. Two blocks of 10m Laura Ashley shares went through the market at 78%p and 79p. The shares closed off 2 at 80p.

Another poor performance by Invergordon shares increased speculation that White & Mackay may consider a renewed bid for the whisky distiller. US-owned White still holds a 41.3 per cent stake in Invergordon and has never discounted returning to the fray. invergordon shares have now

to 257p with turnover reaching underperformed the market by FUNANCIAL TIMES EQUITY INDICES

EQUITY FUTURES AND OFFICES TRADING

THE DERIVATIVES market ran out of steam yesterday, recording a dull session fol-lowing the strong buying seen n Monday, writes Joel Kibazo. In stock index futures, the FT-SE contract for March delivery opened at 2,868 and was squeezed forward in the first half-hour of trading to 2,873. However, the early

the contract to drift lower. The downward slide briefly gathered momentum when an erroneous news agency report mezested that hase rates were to be lifted to 7 per cent today. The poor performance of short sterling and initial weakness in glits dampened the mood

The afternoon was dull, with enthusiasm dried up, leaving a poor performance on Wall

Street serving only to encourage the usual buyers to remain on the sidelines. March ended at 2,837, a fall of 33 from Monday's close and at a two-point premium to the underlying cash market, which it had sur-lier helped to pull lower. Traders said the closing turnover of 13,297 lots mainly reflected basket trading.

was equally lacklustre, with turnover reaching a meagre 24,923 contracts, against Mon-day's 51,866. The FT-SE 100 option traded 6,746 lots, while the Euro PT-SE 100 option saw siness of only 425 contracts. Among the stock options, British Steel was the busiest at 2,955, with the October 60 puts the most active. It was fol-The traded options sector lowed by Dixons at 2,343 lots.

shares eased 3 to 130p. Talk of further profit downgrades in TI Group left the shares 6 lighter

MARKET REPORTERS: Christophur Price, Joel Killszo, Peter John

20 per cent this year and at yesterday's close - off 12 at 252p - were 25 below White & Mackay's final offer price. Profit-takers were out in force in Rolls-Royce and turnover jumped to lim as the

Shares in BRA added 3 to 178p, with UBS Phillips & Drew said to have shown a keen interest. IMI hardened 2 to 264p, after ending talks to acquire a subsidiary of Gebrueder Sulser of Switzer-

Steve Thompson.

Dollar close to a crucial test

THE DOLLAR yesterday continued to rally towards this year's peak of DML65 against the D-Mark following the release of the best set of US leading indicators in 10 years, writes James Blitz

The US currency had climbed nearly a pfennig against the D-Mark at one stage, after the leading indicators rose 1.9 per cent in December against economists' predic-

tions of a 1.7 per cent gain.
The dollar's rally was also triggered by German economic indicators showing a flagging economy, and a need to stimulate economic production through lower interest rates. December industrial orders in German fell 1.8 per cent, while manufacturing output was down 2.4 per cent.

The dollar eventually closed in London at DM1.6420, up 1/4 a prennig on the day.

This week is seen as a critical test of whether the dollar can break through DM1.65 on the upside. Analysts were yesterday revising up their expectations for the January payroll figure, with at least one European bank doubling its estimate from 85,000 to 160,000.

Mr Jim O'Neill, head of research at Swiss Banking Cor-

MONEY MARKETS

THE STERLING cash and

futures markets yesterday reined in expectations of another cut in UK base rates

before the March budget after

the British government mounted a concerted campaign

to restore confidence in the

pound, writes James Blitz.
On Monday, Downing Street denied weekend reports that

the prime minister was about to drive down interest rates to

stimulate economic recovery.

6 per cent from January 26, 1953

The comments from Mr

Major's office had little impact on sterling markets on

Monday, but there was a sharp change of tone to dealing yesterday.

The March short sterling

contract dropped 24 basis

points in the early part of the

day, falling as low as 94.28, a level which prices 3-month money at budget time at 5.72 per cent. It only recovered a

small amount of lost ground in

the afternoon, finishing at

The revised view on rates

was also felt in the cash

Three-month money closed

more or less unchanged at 64

per cent. helped by a comparatively small shortage of £750m forecast by the Bank

Revised expectations

of England in the morning.

However, 6-month money rose on the bid side by about h

per cent to close at 5% per

cent. With the bid rate for 1

year money closing at 5% per cent, the money market yield

curve appeared to be levelling

A rising yield curve would indicate that dealers believe 5 per cent could be the eventual floor for base rates in this

Trading in French franc markets was extremely calm when set against the volatilitity of Monday.

The franc barely moved on

the foreign exchanges and 3-month money fell back to

around 12% per cent from 13 per cent on Monday. The

March French franc contract

rose 32 basis points, closing at 85.55, following Monday's 23

The market will scrutinise

intervention in the money

markets for any sign of policy easing, though expectations of

There is a heavy call on

funds because of the German tax season, and call money closed a little higher at 8.66 per cent. One money market

analyst was yesterday expecting the lowest accepted

repo bid for today to be in the high side, possibly in the area of 8.61 or 8.62 per cent.

point fall.

today's

this are low.

the market waiting test the currency's strength. Mr Brian Hilliard, an economist at Société Générale Strauss Turnbull, was confident that the dollar was about to surge upwards. The dollar could gain additional strength if the Bundes bank makes a conciliatory

is always big for the dollar. A lot of long-term players are in

move on short-term interest rates either today, at its weekly money market intervention, or tomorrow, at its fortnightly council meeting. Few people expect any policy

easing, because Germany's public sector wage talks will probably finish on Thursday at the earliest. These are seen by the Bundesbank as a crucial guide to the outlook on infla-

The relaxation in tensions inside the European exchange rate mechanism has taken pressure off Germany to ease for now. The French franc yes-

terday traded at around FFr3.3820 to the D-Mark. was that both Danish and Irish authorities were forced to intervene in the markets, selling the Irish punt, because the Danish currency was at its ERM floor against the Irish one. This was not yet seen as

The dollar's strength put heavy pressure on the pound at the end of European trading, pushing it as low as \$1.4400. This, in turn, pushed the Ster ling Exchange Rate Index down to a new record low of 77.1 at the end of the day. The pound closed in London at \$1.4460, down nearly a cent on the day. Sterling was calme against the D-Mark for most of the day, as dealers took the view that another base rate cut may not come before the March budget. But it still closed down % a prennig on the day at DM2.3750.

Spend 20 minutes with a professional futures trader

market strategies used by Barry J. Lied, chakman of Lind-Waldock & Company and, for two decades, one of the fatures machets' most suc oog-leem traders.

in our free "Method Trading" booklet, based on Mr. Lind's specific trading raice and guidelines, you will find ent the reason why you should never meet a margin call. You will discover why you can still profit handson each if hor are right only 40% of the time: Los will journ why jt,s imbourns time: Los eau sem heart mirrorism. to be swere of trends. And you will find out how your "individuality" can cont.

. July mondy.

Tale: no (updage)

"Method Tracing" is just one of the many trading support materials that Lind-Waldock provides to customers. We believe that you shouldn't have to give up service or professional advice in order to take advantage of commisaine savings. So we give you both. Our commission rates, \$23 or \$35 per round turn, for any contract on any exchange, are among the lowest in the industry. And our trading support package, which includes charts, books,

and market advisories is among the most estaplete. To receive your complimentary copy of "lifethed Trading," telephone or send

錯得問

ACROSS
Was successful as a defence lawyer but stepped down?

(3,3)
4 A sweet child carrying her little animal (5)
5 Late again, owing to (7)
9 The clergymen is about to be put in the picture (7)
11 Heads for foreign parts (5,5)
12 For man or beast (4)
13 Going on holiday, she left her cases behind (5)
14 In clear language get the message (8)

mistake! (5)
6 Appears at the table to have a meal (5,2)
7 You can't trust them to take the drinks salver in (9)
10 What, to be frank, the cannibal did with the vots seeker (9)
13 Always work when nothing will contain a fever that's raging (5,4)
15 Ffah that has gone berserk in

14 In clear language get the message (8)
16 Given to much work by superiors? (8)
18 Must have seen the figure entered in the return (5)
26 Frightened, it takes flight and the owners are brokenhearted (4)
21 Gather breaking in the back door was quite satisfactory (6,4)

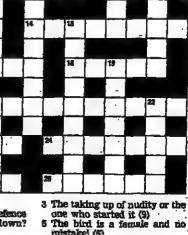

(6,4) 23 Collapsed after a warning noise (5.2)

M British birds and dogs (7)

Not keeping the sort of diary you'd enter a misdeed in (8)

Mean that hat mosto't be left in the cupboard (6)

DOWN 1 The Greek I have to fill in for is the benefactor (5) 2 If the SM barks at him, does

The bird is a female and no mistake! (5)

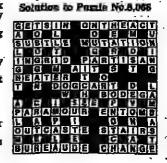

6 Appears at the table to have a meal (5,2)

7 You can't trust them to take the drinks salver in (9)

10 What, to be frank, the cannibal did with the vota seeker (9)

ing (5.4)
15 Fish that has gone berserk in the angler's basket (6.3)
17 Do they never saunter out of the customs shed? (7)

19 Gives the job to, as one promiss (7)
21 Check aloud, as a rule (5)
22 Open — and about time (5)

## US blue chips ease as investors consolidate

#### **Wall Street**

IN spite of more good economic news. US share prices were mixed across the board yesterday as investors consolidated recent gains and searched for fresh incentives to buy, urites Patrick Harverson in New York. At 1 pm, the Dow Jones Industrial Average was down 5.67 at 3,326.51. The more

broadly based Standard & Poor's 500 was down 0.94 at 441.58, while the Amex composite was 0.29 firmer at 411.92 and the Nasdaq composite was up 2.36 at 704.13. Trading volume on the NYSE was 156m shares by 1 pm. After Monday's big advance,

the market opened in a cautious mood, with blue-chip prices easing slightly as some evestors took the opportunity to book profits from recent gains. Although the outlook for the economy continues to brighten, providing underlying support for stock market sentiment, yesterday's economic fig-ures, although bullish, failed to

give prices a lift. The day's data consisted of a 1.9 per cent increase in the December leading index of economic indicators, and a 6.3 per cent gain in December new home sales. Both increases were bigger than analysts had expected, and were consistent with other recent data which have painted a picture of a recovering economy

Equity prices may have been weighed down by the bond market, which suffered losses across the maturity range yes-terday. Recent rises in bond prices have pushed interest rates to six-year lows, so any reversal in the trend was likely to lead to a negative reaction from the stock markets.

Individual stocks continued to be affected by fourth quarter neco climbed \$% to \$41% after the natural gas, and farming and construction equipment manufacturer unveiled fourth quarter net income of \$35m, up from \$26m a year earlier.

Pepsico fell \$14 to \$42 in busy trading after it announced fourth quarter profits of \$265.6m, compared with \$221m at the same stage of 1991. Both sets of figures, however, were affected by restructuring or accounting charges.

GTE held steady at \$34% in spite of news of a decline in final quarter profits, down from 3515m in 1991 to \$417m

Leading drug stocks took a beating. Pfizer slipped \$2% to \$63% and Merck fell \$1% to \$37%; both stocks were removed from the recom-

Brothers, the big Wall Street securities house. The news epressed the rest of the drugs sector, with Bristol-Myers Southb dropping \$1% to \$58. Schering-Plough giving up \$2% at \$58 and Johnson & Johnson falling \$1/2 to \$43%.

Colgate-Palmolive rose \$1/4 to \$57% after it was added to the Salomon recommended list, on the grounds that the stock has growth potential.

On the Nasdaq market, Lone Star Steakhouse jumped \$3% to \$41% in busy trading after the company unveiled plans to accelerate its rate of new store openings this year. Lone Star also said that it was comfortable with analysts' forecasts that earnings would reach 85 cents a share in 1993.

TORONTO was underpinned by continued strength in gold shares while most other sectors traded sideways. The TSE-300 index rose 4.3 to 3,315.2 by midday in volume of 18.72m shares valued at C\$156m.

A 30 cents an ounce rise in old futures lifted gold miners including American Barrick, which rose C\$% to C\$37%. Lac Minerals jumped C\$% to C\$6%

## Singapore peaks again as Nikkei edges higher

#### Tokyo

WHILE share prices traded within a narrow range due to a lack of fresh news, the Nikkei average firmed on small-lot buying from foreigners and arbitrage linked purchases, writes Emiko Terazono in

The Nikkei finished 52.67 up at 17.186.31 in spite of selling by tokkin, or specified money trusts. The index moved between 17,241.60, seen in the morning session, and 17,145.78 before the close.

Volume rose to 240m shares from 175m. Advances led falls by 599 to 341, with 183 issues unchanged and the Topix index of all first section stocks gained 1.80 at 1,310.81. In London the ISE/Nikkei 50 index eased 0.92 to 1,058.63.

Traders said activity was led by the futures market, as most investors waited for the expected cut in the official discount rate. "We are expecting the cut to be as large as 0.75 percentage point now," said a trader

at Nikko Securities. Public funds buying, which pushed the Nikkei Index up 4.5 per cent last week, was absent yesterday as most fund managers had placed buy orders at lower levels. In spite of the sharp rise in share prices, the Tokyo Stock Exchange said outstanding margin buying fell by Y21.1bn to Y1,401.5bn last week, its 16th consecutive decline, reflecting the absence

of genuine investors. Joyo Bank, a regional bank, was the most active issue of the day, rising Y10 to Y860. The issue was beavily crosstraded by financial institutions, realising profits on hold-ings without changing the composition of their portfolios.

Y372 on buying by dealers. The issue has been popular on the restructuring theme. Gajoen Kanko, the financially troubled hotel and restaurant operator. which rose on Monday on dealers' buying, lost Y13 to Y213 on profit-taking.

NEC fell Y13 to Y641 on profit-taking by tokkin funds, foreigners and fund trusts. Some investors are also concerned over the company's fail in profitability due to the personal computer price wars in the lapanese market.

Kyocera, the ceramic packaging maker for integrated circuits, weakened Y80 to Y4,360 on reports that International Business Machines, of the US. had filed a patent lawsuit over Kyocara's software.

Sankyo Seiki, a music box manufacturer, surged Y64 to Y579 on rumours that it would merge with NMB Semiconductor, which is to be acquired by Nippon Steel, the leading steel maker, which owns 16 per cent of Sankyo.

In Osaka, the OSE average moved forward 113.94 to 18,569.05 in 64.7m shares, rising for the sixth consecutive trading day on individual buying.

#### Roundup

THIN trading ranges seemed to be the order of the day in the SINGAPORE continued its

record-breaking run, the Straits Times Industrial index closing 1.24 higher at 1,645.68, the third consecutive all-time peak. Turnover of 119.62m shares compared with Mon-

Keppel Integrated Engineering was the most active stock, adding 10 cents at \$\$1.59 after a brokerage house recom-

Copyright, The Financial Times Limited, Goldman, Sachs & Co. and NatWest Securities Limited. 1987 Latest prices were unavailable for this edition. Malaysian market closed February 1.

announced after the market closed that it had clinched two contracts in Thailand worth about S29m.

HONG KONG closed lower after quiet trading, with demand dampened by the lingering Sino-British dispute over Hong Kong's political reform. The Hang Seng index receded 35,25 to 5,662.53 in the wake of selling by foreign investors, while turnover rose from HK\$1.7bn to HK\$1.8bn.

News that Governor Chris Patten will enter hospital because of a heart ailment was released after the market HSBC Holdings was the most

traded issue, rising 50 cents to HK\$59.50. It was followed by its Hang Seng Bank unit, which was steady at HK\$56.50 after touching a high of HK\$57.50. AUSTRALIA took little heart from an improved balance of

payments and the All Ordinaries index finished just 1.1 firmer at 1,530.2 in thin volume of A\$190.5m. Trade was dominated by

Westpac, which ended 3 cents ahead at A\$3.00. Higher net profits announcements left msmetal 18 cents higher at A\$2.36 and Evans Deakin 20

cents stronger at A\$2.20.

MANUA drifted lower, the composite index ending down

KUALA LUMPUR was broadly higher on a technical rebound after the recent losses. The composite index closed a net 3.89 to the good at 628.38 after some late profit-taking had dragged prices down from

the day's highs. BANGKOK recovered from early losses as heavy buying of leading banks in the final minutes pushed the SET index ahead to end 4.05 up at 969.80.

## European shipping boom still elusive

But the strong dollar should encourage a revival, writes Christopher Brown-Humes

lower ship values made 1992 a grim year for most European shipping companies. Nearly all the major bulk and liner shipping groups saw their shares head downwards, including such leading concerns as Denmark's AP Möller, the Netherland's Nedlloyd, Germany's Hapag-Lloyd

and Norway's Bergesen. The current year may provide a revival, helped by a strong dollar, but the boom time that many had predicted for the 1990s remains as elusive as ever. For the bulk groups, much will depend on whether the tanker market recovers from last year's dire levels, and that in turn hinges

a great deal on Opec output. Mr Ole Slorer, shipping analyst with NatWest Securities in London, comments: "If Opec cuts its output by 1m barrels a day in the spring, the equivalent of 30 supertankers lose employment on an annual basis, so rates weaken."

Norway is one of Europe's two leading maritime nations, and the 35 per cent drop in its shipping index to 308 last year gave as clear a picture as any-thing of shipping company fortunes in 1992. At this level, the index is now less than a third of its peak 1,000 in early 1990. Shares in Bergesen, the big

group, fell to NKr91.50 from NKr130 in 1992. The collapse in tanker market rates and the crisis in the Norwegian financial sector took the group to a NKr32m loss at the eight months stage, although it may scrape back into profit for the year as a whole. Any move to raise vessel

standards in the wake of the Braer shipping disaster in the Shetlands could well have a positive effect on a company such as Bergesen, which oper-ates a high quality fleet of vessels. But it will not be a beneficiary if the action results in a blanket ban on ships over a certain age, because some of

Index and Share price rebased Norwegian bulk shipping

> its ships, though well maintained, are also old. Shares in AP Möller's DS 1912 fell 18 per cent from DKr95,900 to DKr79,000, a smaller decline than the overall drop in the Danish stock market. The group, Denmark's biggest listed company, was insulated from the full effect of the poor tanker market by the broad spread of its shipping

activities, in addition to its substantial North Sea oil and gas production operations. As for all liner shipping groups. its prospects in 1993 will be influenced by the prospects for world economy and trade.

Nedlloyd, the Dutch shipping ind transport group, was a special case, with its poor underlying performance again aggravated by its uneasy relationship with Mr Torstein Hagen, a major shareholder and a longtime critic of group strategy. Although Mr Hagen won a hard-fought battle for a place on Nedlloyd's supervisory board, the perception that financial problems might force him to sell much of his stake undermined the group's share price from mid-year onwards. This contributed to a 43 per cent fall in Nedlloyd's stock price over the year, from F155.60 to F131.70.

Mr Hagen has recently resigned his board position, but 1993 may be another difficult one for the Dutch company because of its exposure to The same concern surrounds Hapag-Lloyd, the German liner shipping company whose shares fell 15 per cent to DM-35 from DM515 in 1992.

This year the expectation is that both bulk and liner markets will pick up, if only marginally. But whether shipping groups feel the full benefit of the trend is another matter. Financing costs and higher vessel operating costs mean that many companies will have worse figures in 1993 than 1992", says Mr Harald Moraeus Hanssen, shipping analyst with Fearnleys in Oslo.

Shipping's perennial problem is that tonnage supply and demand are out of bulance. It needs weak markets to induce significant scrapping to cut supply and push up tates. It also needs shipowners to show restraint when ordering new vessels, if this happens in 1983. then the buil market scenario will be that much nearer.

## Frankfurt's hopes of breakthrough recede

THE STRENGTH of the dollar had less of an impact on senior bourses yesterday than it did on Monday, writes Our Markets

FRANKFURT's hopes of breaking up through 1,600 on the DAX index receded as carmakers fell, an attempt to boost Siemens ran out of impetus, and some profit-taking set in. Turnover remained subdued as the DAX closed 2.07 lower at 1,583.09. Siemens stood out with heavy volume, closing DM2.40 higher at DM606.50 after DM609.

Carmakers eased as traders accepted that the fundamentals were against their recent rally. Daimler dropped DM2 to DM582.50, BMW DM5.80 to DM499 and Volkswagen DM1.80 to DM282.70, but dealers said that their losses were higher compared to Monday's strong post-bourse close on the IBIS screen trading system.

PARIS ended marginally higher with a strong feature in Matra-Hachette after an upbeat presentation from its chairman. M Jean-Luc Lagardere.

The market failed to hold an early rise above 1,800, which traders see as a firm ceiling. The CAC-40 index closed up 1.41 higher at 1,787.31 although turnover was more active tha on Monday, at FFr2.37bn.

M Lagardere's media and defence group rose FFr1.50 to FF198.50 after he forecast 1993 profits substantially higher than those of 1992, and average profits growth of 30 per cent in the period 1993-96, with turnover gaining 5 per cent a year over that time.

Auto industry stocks suffered after a 36.8 per cent drop in French car sales for January. Peugeot lost FFr3 at FFr567 but the tyremaker. Michelin, fell FFr3.40 to FFr187.10 and St Gobain, the glassmaker, by FFr13.50 to

AMSTERDAM focused on Daf, whose shares were suspended as the loss-making

#### SOUTH AFRICA

INDUSTRIALS closed higher across the board, ending 18 higher at 4,543, mainly on renewed interest from local institutions. Golds retreated from the day's highs to close 5 lower at 894, but the overall index ended 19 better at 3,452.

MULAN was in a more posttive mood with the news that the Socialist Party had pledged full support for the administration of Prime Minister Giuliano Amato. The Comit index rose

4.10 to 491.56. Heavy speculative activity in insurance issues was attri-buted both to the imminent creation of pension funds and a view that the weekend death of the Fondiaria president, Mr Camillo De Benedetti, could spark a big reshuffle in the sec-

Fondiaria rose L256 to

L28,033 ahead of a statement by the chairman of AGF, the French state-controlled insurer, that it would not be buying the Italian group's 30 per cent stake in AMB, the German insurer, because it

was too costly. However, analysts noted that Mr Michel Albert left the door open for further talks, telling shareholders: "There is a price below which we could buy." ZURICH closed narrowly mixed in moderate turnover, the SMI index ending 2.0 lower

at 2.118.7 Banks saw SBC bearers SFr3

announcement of higher par-ent company profits in 1992 and an unchanged dividend.

MADRID was boosted by foreign interest in the Spanish bond market, and expectations of a cut in three-month and six-month Treasury bill yields at today's auction may also have boosted equities as the general index closed 4.26 cher at 233.98.

Volume was strong at around Pta25.5bn, almost Pta10bn of which was accounted for by put-throughs and block trades.

ISTANBUL hit a new 12month high, the market index putting on 196.74, or 4.3 per cent to 4,748.11, up 10.9 per cent over the past three days. Turkish equities saw heavy buying by banks and broker ages, buoyed by the banks' plans to set up mutual funds with an equity content, and by strong expectations for lower January inflation and bond auction rates this week.

640,000* French decision-makers always start the day with a full breakfast.

> Among the many fine table traditions enjoyed in France, one is particularly suited to the taste of French decision-makers: les Echos, France's leading business newspaper.

> The results of the 1991 European Business Readership Survey (EBRS) speak for themselves: ks Echos is read by 61.4% of the country's top managers, who also put their trust in Enjeux les Echos, the group's monthly magazine. So whether you have a product to sell or you wish to raise your company's profile, now you know the best way to reach French executives in the morning, beside their croissants.
